4-H RECREATIONAL AND COMMUNITY MEETING CALLED

State Leader Will Conduct Meeting in Old High School Gym

A district community and recreational program school will be held in Thief River Falls on Tuesday and Wednesday, November 4 and 5 for seven northwestern Minnesota counties according to County Agent Ernest Palmer. Delegates from 4-H clubs in all of these counties have been invited to attend this district meeting and bring information on community plays, games, and music back to home programs.

This recreational school will be held in the old gymnasium in the high school in Thief River Falls starting at 9:30 on the morning of the 4th. Anyone in the county interested in carrying back recreation programs to their local clubs are invited to attend.

Mary Anne Mather, in charge of rural recreation for the agricultural extension service, will conduct the training school intended to revive home talent programs and folk games in farm communities. Special emphasis this year at the training school will be given to music, dramatics and social recreation.

The need for developing community recreational programs was stressed at meeting held earlier throughout the state. As a result of local recommendations for a program of this kind, a state-wide plan has been set up under the direction of a recreation committee appointed by Paul E. Miller, director of the Minnesota Agricultural Extension Service.

Nine district training schools have been set up at central points to provide opportunities for leaders in each area to gain recreational training.

We find what we look for—so look for the good.

Community Leader

MISS MARY ANNE MATHER

On the Minnesota extension service, who will conduct a 4-H community and recreation program school in this city next Tuesday and Wednesday.

SHEEP IN THE PARLOR DOWN NEAR WYKOFF

Preston.—We've heard of pigs in the parlor and bulls in a china shop but bucks at large in the house is a new one. Recently the operator of the Albert Kriese farm near Wykoff looked over his sheep and found one missing. Later he found Mr. Buck calmly looking over the interior of the house. How he got there was readily seen when Mr. Kriese discovered a fine beveled plate glass window shattered. Apparently the sheep had wandered onto the porch, saw his reflection in the glass and charged. He had countless pieces in the wool on his head but nary a drop of blood had been shed.

AUTHORITY ON FAR EAST ADDRESSES TEACHERS FRIDAY

Member of New York Times Staff Talks on Japanese Situation

Before a large audience at the convention of the Northern Minnesota Education association in this city Friday afternoon, Robert Aura Smith of the staff of the New York Times, gave an enlightening discussion of the situation in the Far East. He said in part:

"The strengthening of the garrison at Singapore beginning on a large scale last February was one of the real turning points in the struggle for the Southwestern Pacific. It made possible a firmer position for the Netherlands East Indies and a clarified policy for the United States.

"The British position at Singapore is of the utmost importance to the United States because of the threefold character of that city. Its fortress guards the southern reaches of the South China Sea and the Asia-Europe commercial lifeline; it is a naval base that will make fleets in the Far East, including ours, mobile and effective; it is a great commercial port upon which we are dependent for supplies of raw materials that are vital to our national defense.

"A genuine accord with Japan at any time in the near future is unlikely for two reasons. First, Japan is not prepared to make any concessions substantial enough to warrant reciprocal concessions by the United States and, second, Japan is unable under present conditions to give any guarantee that would warrant a change in United States policy.

"Continued Chinese resistance to Japan has been a major factor in determining the policy of the United States. Japan's grandiose schemes of Asiatic conquest cannot be carried out as long as the unbroken army of the Chinese Republic is in the field. This factor has not only justified American assistance to China but has, at long last, clarified our policy in respect to Japan."

Small Audience Attends Presentation of Stage Play Wednesday Night

A small audience turned out at the Auditorium Wednesday night to enjoy the first performance here in many years by a traveling road show company. The Minnetonka Players, appearing here under the auspices of the Junior Chamber of Commerce, presented the highly sophisticated comedy of married life, "This Thing Called Love". The play was given an adequate presentation, especially effective being Cleda Villines in the principal feminine role.

Grade School Operetta Given at NMEA Meeting

The operetta, "Patty Sue's Birthday Party," with a cast of 225 pupils from the Knox, Northrop and Washington schools, was presented at the N.M.E.A. convention Friday morning under the direction of Miss Grace Omundson. Leading roles were taken by Eloise Benson, Don Hulbert, Alice Jacobson, Gloria Bergland, Robert Williams, Paul Green, Truman Johnson, Ramona Johnson, Sonja Meyers and Lawrence Perkins.

REV. TUNGSETH HAS REJECTED CALL TO BELLINGHAM WASH.

Has Served as Pastor of Local Parish for Past 15 Years

Rev. E. L. Tungseth, pastor of the Zion Lutheran Church of this city, who recently received a call to the Ebenezer Lutheran Church in Bellingham, Washington, has just recently reached the decision that he will not accept the call, but will continue as pastor of the Zion church here.

Rev. Tungseth came to Thief River Falls in the summer of 1926 and has served the parish here as pastor fifteen years. He has also been active in community and civil affairs serving as mayor of Thief River Falls, 1932-1935. He is now serving his second term as state senator from this legislative district.

In commenting upon this late decision to remain in Thief River Falls, Rev. Tungseth said, "While the Bellingham call offered a fine opportunity for centralized work in a large city, Thief River Falls has provided opportunities for Christian ministry and community services equal to all my ability and strength. Friends within and without my churches have consistently urged me to continue here."

Besides serving the Zion Lutheran Church of this city Rev. Tungseth also serves the First Lutheran Church of Goodridge as well as the Rindal and Norden churches.

COSTLY ICE CREAM CONES

Tuesday is election day in Thief River Falls and the type of government we will have in the city during the next two years will be determined by the results. There are no issues involved in this election. There has been no campaign oratory and there probably will be none. As far as we know there are no bitter personal quarrels between candidates. This, of course, is fortunate. It does not build up interest in the election however and unless some special effort is made to interest the voters it is likely that a light vote will be cast. That might not be good. The city is an important unit of our government. The men who will be chosen to administer the affairs of our city during the next two years will direct the spending of hundreds of thousands of the taxpayers' dollars. When we elect them to office we confer upon them the right to reach their hands down into our pocketbooks. Among the candidates seeking office there are some who have excellent qualifications. Others are less well qualified. You, as a citizen, have the responsibility of passing judgment on the qualifications of these candidates. It is your responsibility and also your opportunity. Vote Tuesday.

It is encouraging to know that Uncle Sam is adopting the merit system in the promotion of army officers and that incompetants are being weeded out. Such a shake-up in our military machine has been long needed. Because of the practice of promotions by seniority most of the army's senior officers are old men, trained to a method of warfare that is largely antiquated. They have our sympathy but now is not the time for sentiment. What we need is a fast moving, hard hitting fighting machine. Give the men in the ranks the best possible equipment and capable officers and we won't worry about the results. Only other suggestion we could make in the interests of our army, assuming that armies are organized primarily for the purpose of fighting, would be that camp hostesses be demobilized at once.

NOT HOPEFUL.

Will Durant, Friday night speaker at the teachers' convention, goes to the top of our list of the celebrities we have enjoyed listening to. He spoke as a philosopher, without prejudice and without passion. He had much to tell but nothing to sell. He presented his facts, analyzed them, and drew his conclusions.

Some of his conclusions were rather discouraging. He spoke of present conditions in the world. The prospect, as he presented it, was not cheerful. The future he looks forward to is not bright. Regardless of how our immediate problems are solved, there will follow a period of adjustment that will be extremely difficult.

Particularly interesting to us was his explanation of the "Superman" idea that has dominated Germany and plunged the world into the greatest war of history. He attributes the program of the Nazi leaders to the philosophy of Nietzsche, who taught that, "—the strongest and highest Will to life does not find expression in a miserable struggle for existence but in a Will to War, a Will to Power, a Will to Overpower." Democracy and Christianity were effeminating institutions. He advocated a society governed by an aristocracy of force and looked forward to a world that would be controlled by a few "superman" Germans.

What Hitler has written and said and the things he has done justify the conclusion that Nietzsche is his god. An understanding of this not only explains some of the things that have happened but also makes more clear the ultimate objective of Hitler's plans.

Durant did not argue the morality of Germany's aggressions. He neither condemned nor justified them. He spoke merely as an interested observer of a great spectacle. A Frenchman himself, to him the fall of France was the inevitable result of decay and corruption. He intimated that among us there are some symptoms of decay. If we are to survive we will have to make great sacrifices. In the interests of efficiency we will have to put some of our liberties on the shelf. He hoped that we would not be too corrupted by paternalism and that when the emergency ended we would insist on the return of those liberties. He didn't seem to be quite sure that we would however.

You have asked us, Mr. President, to lay aside all personal and party considerations during the present emergency and go along with you in your program for national defense. You have asked us to serve our country in whatever capacity we are best qualified to serve, some to bear arms and others to work hard and save and pay taxes. We believe, under the circumstances, that your appeals for national unity are deserving of wholehearted support and we are doing the very best we can to do our part. Most Americans feel that way, we are sure. But Mr. President, it would be a lot easier for us to be enthusiastic about the whole thing if you would crack down a little harder on some of the racketeers who are cashing in on the flow of tax dollars. When labor organizations hold up defense contracts because they can't agree among themselves as to which organization is entitled to the cut on a particular payroll then we wonder sometimes if the sacrifices we are making are worth while. If it must be a choice between Adolf Hitler or John L. Lewis as to who is going to run this country then we are not sure but that the thing to do would be to turn the whole deal over to Adolf right now. You are the President of our country, Mr. Roosevelt, because the majority of our people wanted you to serve in that capacity. They asked you to run the show and that's ok with us and we'll get in and pitch with you as long as you are President. But you could make it a lot easier for us to be loyal if you would talk a little less and act a little more. It's either an emergency or it isn't an emergency—if it is an emergency what are you waiting for?

Let's hope that that bit of weather we had yesterday was just a pre-view of winter and not the first scene of the play itself.

Topics of the Times
By M. A. H.

We read of a traveling husband who caused his wife some anxiety by sending this message, "Having a fine time. Wish you were her."

The talks given here last week by the education association teachers were an effective shot in the arm for the thinking portion of their audiences.

With so many good looking entertainers coming up from South America to this country, it's not easy to tell whether S. A stands for South America or Sex Appeal.

Turkey growers may take encouragement from the statement of Dr. W. A. Billings, authority from University Farm, that higher prices for the birds are in prospect this fall than last.

It was a poor commentary on the sportsmanship of sportsmen when, during the pheasant season, a large percentage were arrested for shooting more than the limit of birds.

Hint—Save a little folding money for that Red Cross roll call coming up.

About the only time some women are good losers, they tell us, is when they are getting rid of a husband.

This town didn't have its annual corn husking contest this fall, but it did have a couple of real good conventions last week, which is probably a fair substitute.

We hear predictions to the effect that this is to be an open winter, and we trust they don't mean wide open.

Simile—As surprised as President Roosevelt must be to learn that the Nazis are sinking U. S. convoy escort ships.

It is necessary to remove only one letter to change a friend into fiend.

If you have any preference as to who shall run the city government during the next two years, better turn out and vote next Tuesday.

GARTER SNAKES TURN INTO BOA CONSTRICTORS

Fosston. — Apparently garter snakes in this vicinity are afflicted with delusions of grandeur—they think they are boa constrictors. At least that is the impression one would gain from a report from a farm operated by S. T. and P. T. Hovland. The Hovlands raise white Holland turkeys and one day the children noticed one of the birds wobbling across a field. Upon closer investigation, they found an ordinary garter snake coiled around its neck. The snake was removed and killed. A half hour later another bird staggered into the yard, also choking with a garter snake coiled around its neck. Both birds recovered. Garter snakes are not known to use tactics of this kind under normal conditions.

TOMATOES GROWN WITHOUT SOIL

Blue Earth. — Three tomato plants at the George Buscho home are having a race. One plant is growing in rich Faribault county soil. The second is growing in soil with a commercial fertilizer added. The third was planted in washed sand and fed with a special solution of chemicals which duplicate those found in fertile garden soil. It is claimed that the "soilless" method of growing plants (the sand is merely used to keep the roots in place) is a practical way of growing vegetables indoors and in places where there is no suitable soil. This type of plant culture is called hydroponics. The soil-less plant was the first to produce a nice ripe tomato.

Monthly Wage Increase Is Given WPA Workers in State of Minnesota

Final instructions have been received from Washington for application in Minnesota of the $5.20 monthly wage increase for WPA workers, effective with all pay periods beginning on or after November 1, S. L. Stolte, state WPA administrator, announced today.

The increase, Mr. Stolte said, will affect 20,280 workers in the state. The present average labor cost to employ a WPA worker in Minnesota, considering the various classifications of work, is $60.87. The $5.20 raise will be given all but professional and technical classification of workers. This group will receive an increase of $3.90 per month.

Because Minnesota pays its WPA workers on a four-week fiscal basis, the $5.20 monthly raise will be equal to $4.80 for this four-week period, or an increase of $2.40 per two-week period. Professional and technical workers, on that basis, will realize a $3.60 increase for a four-week pay period, Mr. Stolte pointed out.

"This new increase", Mr. Stolte said, "does not change the basic schedule of earnings previously established but provides for additional payment of wages during the present emergency to assist in meeting the increased cost of living."

GORDON CALDIS IS GIVEN HANDSOME WATCH SATURDAY

Four Local Organizations Honor UND Co-Captain at Grand Forks

As a pre-game feature of the University of North Dakota-N. D. agricultural college football contest Saturday afternoon at Grand Forks, Gordon Caldis of this city, co-captain of the U. N. D. eleven, was presented with a handsome wrist watch, the gift of four Thief River Falls organizations.

The presentation was made by Roy Oen, president of the Civic and Commerce association, while also present were Henry Storhaug, representing the Junior Chamber of Commerce; Dr. E. S. Amesbury, president of the Lions club; and A. F. Berge, president of the Rotary club. Caldis expressed his deep appreciation of the gift. The Lincoln high school band and the Shrine Oriental band also represented this city.

The game resulted in a 20-6 victory for the University of North Dakota team, Caldis accounting for two of his team's touchdowns after catching two difficult passes.

Gopher Eleven Opposes Northwestern Saturday

Whether Minnesota will again retain its national fame in football for the coming year is likely to be decided this Saturday, when Bernie Bierman sends his Gophers against Northwestern in the annual Homecoming game in Memorial Stadium. Over the decade since 1930 Northwestern has given Minnesota sterner opposition than any other team, even including the mighty Michigan; and on two occasions the Purple has prevented the Gophers from holding a Western Conference championship.

Gustavus Football Star

BOB HANSON

Bob Hanson of this city will graduate next spring from Gustavus Adolphus college, and when he leaves he will not only leave behind a slightly worn football jersey. He will leave a hole in Gustavus athletics that will probably never be filled in the same way. He was all-state in his junior year and this year he has shown that this was no mistake. He takes care of the center duties on offense and backs up the line on defense. He also holds several state records in swimming. He will graduate this coming June and hopes to enter coaching.

DON OLSON STARS AS SENIORS DOWN VARSITY ELEVEN

Scores Five Touchdowns as Seniors Win Contest by 39-0 Score

With their right halfback, Don Olson, on a scoring rampage, lugging the ball over the goal five times, the veteran Seniors trounced the 1942 varsity, 39 to 0, in a post-season football game played Tuesday afternoon. Fullback Orrin Pederson accounted for the game's first score when he drove over the goal on a five yard plunge; but from then the game's scoring was under Don Olson's control. Twice Don hooked passes from Luther Fjelstad for scores, and once he broke loose on a double lateral.

The 1942 Varsity made their most serious bid for a score in the third period when they slashed through the Seniors for three successive first downs, Homer Matheson and Don Berg doing the bulk of the ball carrying.

The lineups:

ACTION DEFERRED ON ORGANIZATION OF HOCKEY LEAGUE

Difficulty in Securing Canadian Players May be Obstacle

Representatives from Crookston, Fargo, and Thief River Falls met here Tuesday evening to discuss States-Dominion hockey league plans. Meeting with league president Phil Larson were Chet LaDoux of Crookston, John Saul of Fargo, and Alex Campbell and Connie Stanbridge of Thief River Falls.

Two obstacles to be overcome before league hockey can be organized for the year are lack of available players, with Canada refusing to allow players of military age to enter the United States for the hockey season, and Crookston's indecision on supporting hockey.

It was decided that further investigation into the player situation would be advisable, and a definite decision from Crookston on hockey before any further plans could be made. A meeting will be held early next week to decide the league's status.

H. S. SOPHOMORES AND FRESHMEN IN SCORELESS GAME

Both Elevens Pass up Scoring Chances in Chilly Weather

The Lincoln freshmen and sophomores played forty frost-bitten minutes of football Monday afternoon, and the result was a scoreless tie. The deadlock was a fair indication of the play, for the two teams were well-matched.

Both teams had scoring opportunities, with the freshmen making their first bid for a score in the opening period when fullback Chuck Richards and left halfback Billy Bye led a Frosh drive that was stopped on the Sophs 20 yard line, with the freshmen receiving a 15 yard holding penalty. In the third period the Frosh penetrated deep into sophomore territory, but a fourth down pass, into the end zone, bounced off Bob Baker's numbed fingers.

Billy McKechnie's fine return of a punt, to the freshmen 30 yard line; and pass, from McKechnie to Magnuson, carried the Sophs to the Frosh 10 yard line in the third period, but Billy Bye intercepted a Soph pass on the 5 yard line to halt the rally. And in the final minutes of play the Sophs, with a sharp passing attack, carried the ball to the Freshmen 10 yard line, and just as the game ended, a touchdown pass fell incomplete.

The Freshmen revealed a number of promising football players. Billy Nelson played a fine game in the line, while Bob Baker, Chuck Richards, and Billy Bye were the back-field stand-outs. Billy McKechnie, running at the left halfback position, head-lined the Sophomore team, with Bob Carlson playing a strong game at fullback. The Soph line play was paced by Steve Alnes and Cal Traver.

.... With BUCK OLSON

Last Saturday's ceremonies honoring Gordy Caldis, captain of the North Dakota "U" football team, brought to mind the fact that Thief River Falls has provided quite a number of colleges with athletic captains. In addition to Gordy Caldis at North Dakota, I recall that Gordon "Boomer" Dablow captained the football and basketball teams there in the early '30's. And then there was Roy Oen, football captain at Minnesota; Gil Mickelson, basketball captain at Ohio State; Art Myrom, basketball captain at Concordia; Milt Nesse, football captain at St. Olaf; Bob Hanson, football captain at Gustavus; and Ade Lorentson, hockey captain at St. Olaf. That's quite a record.

Chet Nelson to Illinois "U"

That will be quite a leap that Chet Nelson will make this week. Chet, who is the director of physical education in the high school, and coaching gymnastics and tumbling, will leave tomorrow to take up his new duties at the University of Illinois. Chet received a telegram from the Illini authorities on Saturday, requesting Chet's attendance in Chicago on Sunday afternoon, for a personal interview. Chet made the hurry-up trip to Chicago, returning here Tuesday morning; and on Tuesday afternoon he received a wire advising him that he had been selected for the position in the physical education department. Chet will supervise the gymnastics and tumbling classes.

Ducks, Unlimited

You can't beat fun. And that's what the hunters have been having around the flood waters of the Roseau river, north of Greenbush. Orvis Olen, Kern Olson, Sonny Mattson, and Johnny Wiener were up there Sunday and they nearly developed round shoulders from carrying mallards and pin tails. Chuck Herron, Harry Schuster, Carl Kretzschmar, and Ed. Peterson, were in a party that hunted the swamp north of Greenbush, and they, too, reported a limit shoot. Haakon Olson, Milt Larson, George Mostue, and Leon Kallher, were a bit northwest of Greenbush, used a boat and rode up one of the feeder ditches to get into the center of the swamp, and in a little more than an hour they had their limits, with mallards and pin tails. Hank Storhaug and Harold Olson hunted the river on Saturday, and Hank bagged a big Canada goose. Veteran hunters report that not since 1937 have they seen such a massing of ducks as there has been this past week in the Roseau river.

Nearly Missed the Game

Lincoln Arnold, Sewell Gross, Karl Kollitz, and their wives, were on that Minnesota football special that pulled into Ann Arbor after the Minnesota vs. Michigan game had gotten under way. The train was 10 miles from Ann Arbor when one of the engine's main rods broke, and the fans on the special did not get into their stadium seats until just as the first period ended. But they arrived in time to see that kick of Bruce Smith's, from deep in the Minnesota territory to Michigan's 12 yard line. And Bruce's pass to Frickey, and the touchdown play that followed. It's their consensus that those three plays, and Bud Higgin's pass to Garnaas were worth the trip.

Hockey Notes

Manager Art Senstad is in receipt of a letter from C. D. McPherson, divisional registrar for the Canadian War Services Board for the Province of Manitoba, and Mr. McPherson states that it is the policy of the board to refuse permits to hockey players in the military ages of 21 to 25, and to issue permits to these players so that they may participate in hockey in the United States. He gives a number of reasons for such action by the board, the chief of which is that refusing passports to hockey players will quieten the criticism that Canada isn't going "all out" in their war effort when they permit players of military age to play hockey in the States.

Gustafson to Wrestle Here

Promoter Bill LaFave announced that he had signed Cliff Gustafson to headline the wrestling card that he is arranging for Nov. 13th. The program will be sponsored by the Athletic Association. Cliff will meet Mark Hoesly in the feature match, with Andy Moen meeting Alf Johnson in the semi-windup, and Rudy Ptacek wrestling London's Lord Albert Mills in the preliminary.

Chester Nelson Is Given Appointment to Staff of University of Illinois

Chester Nelson, physical education director in Lincoln high school, this week received an excellent promotion to the post of teacher of physical education activities at the University of Illinois. The board of education accepted his resignation at a special meeting Tuesday evening, and he will report for duty at his new post next Tuesday. The appointment came unsolicited to Mr. Nelson, who is a graduate of the University of Minnesota, and who coached the Lincoln junior high school tumbling team that last spring in Minneapolis captured the championship at the Northwest Gymnastic meet.

PRESIDENT CALLS ON AMERICANS TO HALT NAZI REGIME

Roosevelt in Radio Address Says Hitler Is Plotting Against U. S.

President Roosevelt declared Monday night that the "shooting has started" and solemnly called on the nation to help destroy a Hitler regime against which he levelled the following formal accusations:

1. It has drawn up a secret map showing how it intends to obliterate the existing boundary lines of 14 South and Central American countries and substitute five "vassal states"—one of which would have domination "over our great life-line — the Panama canal."

2. It has drafted a detailed plan to wipe out all existing religions, if Hitler wins, and substitute an international Nazi church. In place of the Bible, the words of Mein Kampf would be "imposed and enforced as holy writ," and in place of the Cross of Christ, the Swastika and the naked sword would hold sway.

Mr. Roosevelt, making a major speech at a dinner at the Mayflower hotel held in observance of navy day, declared that he had documents to prove his words — a copy of the secret map, and a detailed plan of the anti-religion program.

Pointing to the attacks on American vessels, Mr. Roosevelt asserted:

"We have wished to avoid shooting, but the shooting has started. And history has recorded who fired the first shot. In the long run, however, all that will matter is who fired the last shot."

Again, he said the nation stood ready to face its newest and greatest challenge — "We Americans have cleared our decks and taken our battle stations."

He called for greater armament production, to provide every soldier with weapons "better than that of any army on earth" and he appealed again for peace between capital and labor.

TWO PENNINGTON MEN PROMINENT IN THE WINTER SHOWS

Paul Engelstad and County Agent Palmer are Given Important Posts

Superintendents for the various livestock departments of the 1942 Red River Valley Winter Shows at Crookston, Minnesota, were announced by President T. M. McCall today. Men elected to serve for the forthcoming show to be held February 2-6, 1942 include: Ernest Palmer, county agent, Thief River Falls, cattle; R. M. Stolen, county agent, McIntosh, swine; George Landsverk, county agent, Ada, sheep; Paul Engelstad, Thief River Falls, will act as business agent for the livestock show. Carl Ash, Crookston, West Polk county agent, will act as superintendent of day admissions.

In the 4-H Club department, H. A. Pflughoeft, district leader of 4-H clubs as general superintendent, will be assisted by John Dysart, county agent at Red Lake Falls as superintendent of crops, and W. O. Woodman, Crookston, superintendent of livestock.

At a recent meeting of the directors and advisory board members of the Red River Valley Livestock Association, the most important building change approved was the change of location of the poultry show. The Board of Directors authorized the building committee to make suitable quarters for the poultry exhibits on the west division of the swine barns and make other changes whereby the usual large swine show will have ample accommodations for the usual number of exhibits.

The board of directors voted to discontinue the high stall fees which have been charged during the period of emergency now that all mortgage indebtedness has been paid. The stall fees were reduced approximately thirty per cent.

Hospital Service Plan Celebrates This Week

The American Hospital association has designated the week of October 27th for national celebration of the growth of Blue Cross hospital service plans which now protect 7,500,000 employed workers and dependents, and which have paid hospital bills for 2,000,000 subscribers since the movement was sponsored by the Association in 1933.

The Minnesota Hospital Service association, the only approved Blue Cross plan in Minnesota, was organized in 1933 when economic conditions had created a grave problem for both the people who needed hospital care and for the hospitals. By the end of its first year of operation, 2,000 persons in St. Paul were subscribing to this plan which helped them budget the cost of unexpected hospital care.

At the present time, 425,000 persons throughout the state are subscribers to the Minnesota Hospital Service association, which now has ninety contracting hospitals in the association guaranteeing benefits to subscribers.

DISASTER CAUSED BY SLIP OF THE FOOT

Baudette.—While the combine on Fred Gillie's farm was in operation last week, his ten-year-old son, Freddie, stood atop. The lad unaccountably missed his footing, falling into the machine and coming out clad with no more than the day he arrived in this world, except his shoes. Fortunately for Freddie one of the men working on the machine saw him dive in and hastened to catch and hold him up until it could be stopped. His injuries include a broken collar bone and several cuts and bruises.

"U" Extension Bulletin Cites Need for Greater Care with Eggs, Poultry

Methods commonly used in handling eggs and poultry have placed Minnesota poultry and egg producers at a disadvantage, says W. H. Dankers, extension marketing specialist at University Farm. While increased production and lowered costs have resulted from better management and improved practices on the farm, these have been offset by delays in marketing and undesirable handling methods.

Maintaining egg quality until it reaches the consumer calls for joint action on the part of producer and dealer. Keeping eggs cool and fresh on the farm will do no good if careless handling causes deterioration before the eggs get to the consumer.

Dealers are making progress, but the need for improvement is still great, particularly in the areas where surpluses make it necessary for producers and handlers to look for markets in the East and Chicago. Most dealers could easily improve their facilities for holding eggs with little expenditure of time or money and get a better price.

In Extension Bulletin 222, "Marketing Minnesota Eggs and Poultry," Dankers points out that high temperature is the largest single item in lowering the grade of the egg when sold. From surveys made, it is apparent that many egg dealers do not realize how rapidly egg quality deteriorates in warm temperatures.

Dads Day at Minnesota University November 8

"Armistice Day blizzards" are frowned upon by the University of Minnesota Dads Day Committee, which this week is broadcasting its invitation to the fathers of all Minnesota students to visit the university campus and their sons and daughters on Saturday, NNovember 8. A year ago Dads Day came a week later, in fact, it came on the Saturday following Minnesota's most destructive storm; and the attendance was held down, especially among those living outside the Twin Cities. Advancing the day to November 8, on which day Minnesota will meet one of its oldest traditional rivals, Nebraska, is expected to reduce the likelihood of bad weather practically to zero.

Benitt-Knutson

At a lovely wedding at the Lutheran parsonage at Holt on Wednesday, Oct. 22, Miss Elda Engel Kathryn Benitt, oldest daughter of Mr. and Mrs. John Benitt of Holt became the bride of Mr. Clinton Martin Knutson, son of Mr. and Mrs. Thomas Knutson, Sr. of Grygla. The ceremony, which occurred at two o'clock in the afternoon was solemnized by Reverend T. C. L. Hanson in the presence of the bride's sister, Miss JoAnn Benitt, and Thomas Knutson Jr., brother of the groom.

The bride chose for her wedding a beautiful street length dress of royal blue crepe alpaca with black accessories and her corsage was made up of tallsman roses and sweet peas. Her only ornament was a gold locket, a gift of the groom. The bridesmaid was attired in an afternoon frock of soldier blue crepe alpaca with copper colored accessories. She wore a corsage of sweet peas and asters with a gold cross, a gift from the bride, completing her costume.

Following the wedding a five o'clock dinner was served to forty relatives by the bride's parents at their home east of Holt. The table was centered with a four-tiered wedding cake, decorated in green and topped with the traditional bride and groom in miniature. White tapers also graced the table.

In the evening a group of seventy-five friends and neighbors arrived and gave the bridal pair an old-fashioned charivari. The merrymakers were made welcome and served refreshments.

Simcox responded in behalf of the faculty. The singing was led by *Professor Snodgrass, better known* as Ted Rustad. The program was then turned over to Professor Stoopenagle, (Clarence Noer). The closing number was a quartette of boys, Orin Stephenson, Portis Christianson, Irving Elsthouse and Dan Josephson, who were costumed as the "Hog Sweethearts". Portis, as a prima donna, made a hit with the audience and as an encore did a scarf dance.

She has had two rooms added to her small home, one room upstairs and one down stairs which is to be the kitchen and a full basement. TAX GROUP SEEKS PLEDGES FOR CUT IN EXPENDITURES

Emergency Committee Seeks Slash In Non-Defense Payments

Organizations throughout the state have joined the Minnesota Taxpayers Association in co-operating with the Citizens Emergency Committee on Nondefense Expenditures, and state taxpayers associations in 13 other states, to push forward the defense effort by cutting out all possible non-military spending.

At a special roundtable conference held during the recent National Tax Association meeting at St. Paul, officials of state taxpayers associations joined the movement to conduct a nationwide "For Defense Today—For Hope Tomorrow", pledge campaign.

The drive seeks to rally the public behind the proposals of Secretary of the treasury Henry Morgenthau and Senator Harry Flood Byrd of Virginia, both of whom insist that nondefense spending can be cut from one to two billion dollars.

A group composed of educators and civic leaders throughout the county have co-sponsored the pledge campaign.

The campaign will seek to pledge the individual support of millions of American citizens to assist the President and Congress in performing the most difficult task of cutting unwarranted spending from government in this emergency.

LOW TAX RATES IN PROSPECT IN CITY NEXT YEAR

Rate of 96.81 Mills Is Indicated on Non-Homestead Property

HOMESTEAD RATE IS FIXED AT 88.05 MILLS

Substantial Cut Is Made in Levy for County Purposes for 1941

Fixing of the Pennington county tax rate for county purposes for 1941 at 39.45 mills, a reduction of 3.4 mills compared to the 1940 rate, brings assurance to taxpayers of the city of Thief River Falls that they will pay taxes in 1942 on the basis of the lowest tax rate in more than twenty years.

In addition to the county board, the city council contributed to the reduction in the total rate with a heavy slash in the rate for municipal purposes.

County Auditor A. M. Senstad, stated that on the basis of a .24 mill state levy on homestead-exempt property, the total rate will be 88.05 mills for 1941, compared to 96.59 mills in 1940. With a state rate of nine mills in effect on non-homestead and personal property, the total rate on these classes will be 96.81 mills, substantially below the 1940 figure of 105.35 mills.

The rate for city purposes for 1941 is only 9.86 mills, while the school district levied 38.5 mills, the same rate as in effect in 1940.

The 1941 levy for county purposes was given by Auditor Senstad in dollars and mills as follows:

	Dollars	Mills
Revenue	$ 38,175.	9.54
Road & Bridge..	36,808.90	10.
Co. Welfare ...	46,120.	12.26
Sanatorium	6,000.	1.65
Bonds & Int. ..	22,083.34	6.
	$145,186.24	39.45

The levy for current welfare needs, Mr. Senstad explained, is nine mills, the additional 3.26 mills being levied to reimburse the city and townships for poor relief disbursements in prior years.

For purposes of comparison, the 1940 levy and mill rates for county needs is given below:

	Dollars	Mills
Co. Revenue ....$	35,960.	9.83
Road & Bridge..	39,459.68	10.
Co. Welfare	53,069.45	14.60
Sanatorium	9,222.	2.52
Bonds & Int. ..	21,959.77	6.
	$159,617.90	42.85

A study of total tax rates for the city of Thief River Falls for each of the twenty years since 1921 reveals that during the period rates reached a high mark of 114.66 mills in 1930, followed by 114.6 mills in 1924, and a low rate up to 1940 of an even 100 mills in 1932. Since the passage of the homestead exemption law, the rate on non-homestead property in the city reached a peak of 116.83 in 1934, and 114.21 in 1939, dropping in 1941 to 96.81 mills.

AAA DEFENSE PLAN CALLS FOR HIGHER MILK OUTPUT HERE

Increase of 8 Per Cent Held Necessary to Meet 1942 Needs

Dairy farmers in Pennington county must produce 4,948,200 pounds of milk in 1942 to meet the milk production goal for the county, Carl R. Anderson, chairman of the county U. S. D. A. defense board, announced today.

"This means that we must obtain 351,800 more pounds of milk in 1942 than the 4,596,400 pounds produced in 1941," Mr. Anderson said. "It means an increase of around 8 per cent in our milk production for next year."

"This increase can be obtained by better management and feeding of our dairy herds and will not mean that we must increase our herds," Mr. Anderson said. "Farmers desiring information on how they can obtain an increase in milk production from their herds should contact the county U. S. A. defense board."

Pennington county's contribution to the state and national 1942 egg goal will be 817,500 dozens, Mr. Anderson, announced.

"This means an increase of 67,500 dozens over the estimated egg production of 750,000 dozens in 1941," Mr. Anderson said.

Mr. Anderson said he believed farmers in the county would experience little difficulty in meeting the egg goals, but warned that only by good care and proper feeding could the goal be reached.

Postmaster Makes Plea to Rural Box Holders

Cooperation in this respect will be appreciated by the postoffice department as well as the local office.

This highly important affair will be held Friday evening, Nov. 14 at the Smiley hall. One of the most important attractions will be the colored movies to be presented by Dave Gustafson from town. His pictures are excellent and consist of scenes taken by himself in Washington, D. C., lake scenes in Canada, corn husking events, and power machinery in operation. These pictures promise to be educating as well as entertaining. Mr. Gustafson will also give a short talk. Following the movies a gay carnival will hold sway. Lunch and candy will be sold also. Now this 4-H event is really a planned get-together to raise some money for the 4-H treasury. The young folks as well as their officers and leaders are working hard now days to make this event a successful affair and through this column they sincerely extend a "double-decker" invitation to anyone, to spend the evening of Nov. 14 with them at Smiley hall.

The grand champion pig was sold to Armour & Company for 80 cents per pound or a total of $320. The First National Bank and Trust Company in Minneapolis purchased the grand champion lamb for $3.25 per pound or a total of $260.

Bidding for place-winning animals was fast and furious. A total of $21,969.20 was paid by bidders to young exhibitors for their prize pets, E. J. Gruber, operating director of the show, announced. This is $1,078.19 more than last year.

A round of cheers to the individuals and organizations responsible for the success of the Halloween parties. It was a swell job and the effort should be commended. Strange custom this annual Halloween worry. Adults get the kids all steamed up to do mischief by telling tall tales of the things they did when they were kids. Then in order to keep the youngsters from doing the things they have been told should be done they are kept occupied playing games and eating apples. It is a form of appeasement that has much merit. The whole funny mess probably could be corrected if those of us who should know better would quit talking about it. If Halloween were not given such a tremendous build-up in the first place the occasion would rapidly diminish in importance as a social problem.

Big excitement in town here this week of course was the city election. A total of 1,908 citizens went to the polls to express their preferences. That is a fairly big vote, considering the fact that there were no issues. The record is 2,099, established in the general election of last year, so approximately two-thirds of the voters turned out. The results were close in nearly all of the contests, which means that the losers have much to feel good about. In none of the contests in which more than two candidates were entered did the winner receive a majority of the votes cast. That should keep the winners reasonably humble and so everyone should be happy about the whole thing. For purposes of good government the results probably are as good as could be hoped for. There will be harmony among the thirty cents a day men who will manage the city's affairs and that is important. Important, too, is the fact that in the new administration both business and labor will be ably represented. And so a round of cheers to the winners and another round of cheers to the losers and congratulations to all of the candidates for their good conduct in a personal campaign that was remarkably clean.

Three men who saw the Minnesota-Northwestern game Saturday told us entirely different stories of what happened in their descriptions of spectacular plays, and none of the stories agreed with the published reports. Such confusion emphasizes the difficulty of reporting. The other fellow who tells what happened is not necessarily a liar because his story does not agree with yours. He may be making an honest attempt to tell you what he thinks he saw, as he remembers it. His memory may be bad. His thinking may be prejudiced. His vision may be defective. And, in telling his story, his power of expression may be inadequate. These are some of the things you might take into consideration when you are inclined to complain that you can't believe what *you read in the papers*. The chances are that, to some extent, your complaint would be justified but it is also quite probable that the professional reporter will come closer to giving you an accurate word picture than you will get from your neighbor who "was right there and saw the whole thing."

Strange what a difference there is in Japan's American diplomacy and the type of diplomacy used in dealing with inferior nations. Our oriental friends didn't argue much with their Chinese neighbors before blasting them with bombs. The only logical conclusion therefore, now that they are sending another special envoy to our capital in an effort to avoid war with us, is that the one thing they don't want right now is war with Uncle Sam. Our turn will come later on but for the present they want a free hand in completing their home work. They will make almost any promises to us if we will agree not to interfere with their program of conquest for the time being. And right now would be a good time for us to tell them to pull in their horns at once or take the consequences. We might postpone a fight by backing away from them again but sooner or later we will have to start pushing back and if we must fight there is no good reason why we should let them set the time. Peace in the Pacific cannot be maintained by a policy of appeasement.

So that you will feel better about the new tax rates announced this week we are glad to remind you that in 1936 the Thief River Falls levy was nearly 116 mills or more than 26 mills higher than it will be on homestead exempt property in the city next year and 18 mills higher than it will be on property that does not enjoy the homestead exemption. That is a big reduction in a five year period. Sorry we can't encourage you to expect a continuation of that rapid decline. The state rate is about as low as it can get. The school district has obligations that will require at least the present levy for a number of years. The county could spend less and should retire its debt faster than it is at the present time, but isn't likely to do either. And the city may not be able to maintain its present low levy over a period of years and meet its obligations. So the prospects for further reductions are not encouraging. That thought, however, shouldn't detract from the enjoyment of the relief we have already received. A tax rate of less than a hundred mills will compare very favorably with other towns of this size in the state.

CONCRETE costs less!

"You know that concrete is safe and easy to drive on, but do you know that concrete is actually the cheapest pavement money can buy? Costs less *to build* than any other pavement of equal load capacity. Far *less than other types for surface maintenance*—as much as $495 per mile per year less. And directly important to you is—that concrete *saves you money in car operation*. Yes, you're well advised to vote for concrete. You'll be money ahead in the long run."

"TIRED? NOT ANY MORE!"

"Since the doctor prescribed beer with my meals I never feel exhausted!"

● More and more people today are slipping into an unhealthy state of exhaustion. Constantly tired and worried, they become easy prey to various ailments.

Because many prominent physicians regard beer as a food as well as a refreshing beverage, they are recommending its daily use in the diet to restore energy, soothe frayed nerves, and build up resistance to fatigue.

"The mineral and vitamin content of beer," says Dr. Clarence William Lieb of New York, "together with its caloric food value, comparing favorably in many respects with milk, makes it highly desirable food. Its predigested malt sugar, which is quickly assimilated, also makes it an invaluable drink in fatigue states of mind and body."

Beer has proved invaluable also in promoting economic health! In our own state, the brewing industry of Minnesota furnishes employment annually for more than 35,000 ... pays about $2,000,000 a year in excise taxes ... and buys over $3,500,000 worth of Minnesota farm products.

Red Cross, OCD Look to Volunteers For Civil Defense

Washington, D. C.—To the question, "What can I do for America?" the Red Cross is providing an answer for hundreds of thousands of men and women who want to do their part on the civilian defense front.

For women, the Red Cross is providing an 80-hour training course to recruit a corps of 100,000 Nurse's Aides. It is the Red Cross' newest project, undertaken at the request of the U. S. Office of Civilian Defense to relieve the current pressure on nursing facilities.

With thousands of nurses being taken into military service with our armed forces, civilian nursing has suffered a direct blow, the Red Cross points out.

Red Cross Nurse's Aides will serve as assistants to registered nurses, performing scores of important duties which will enable nurses to care for more cases. The Red Cross stresses that Nurse's Aides will not take the place of the registered nurse, but will serve in an auxiliary capacity.

On the more dramatic side of civilian defense, the Red Cross is gearing its far-flung disaster fighting machine to handle mass feeding, housing and clothing of evacuees under wartime conditions. In cooperation with the Office of Civilian Defense, chapters are strengthening disaster relief committees to cope with man-made disaster much on the same scale as relief operations following natural catastrophe. Organization along these lines includes preparedness measures for fires, explosions and epidemics which may be expected to result from accelerated industrial activity incident to national defense.

Strictly as a precautionary measure, the Red Cross is devising means of confronting emergency relief in the event of sporadic air or sea attacks, considered conceivable hazards in some coastal and boundary areas.

The need for First Aid in civilian defense has not been neglected by the Red Cross. Last year nearly 600,000 were trained in emergency treatment of the injured. This year the figure is expected to go much higher with special emphasis being placed on the formation of detachments which would serve as units in factories, offices, schools and other places where persons are employed.

Red Cross courses in Home Nursing and in Nutrition also are being expanded as a feature of the civilian defense program, it was pointed out. Mounting health hazards and the shortage of civilian nurses may at any time obligate the housewife—or even the man of the house—to assist in caring for the sick. Likewise, the Red Cross is placing greater emphasis on Nutrition courses designed to teach housholders the art of purchasing and preparing well-balanced meals within the range of the family pocketbook.

State Tax Levy Cut to Nine Mills in '41, Says State Auditor S. King

A state tax levy of nine mills on real estate and personal property, the 1941 legislature's contribution to the cause of tax reduction, was written into the ledgers Tuesday by State Auditor Stafford King.

One mill lower than the present 10-mill maximum, the new levy will save taxpayers in the state a total of $1,100,000, and yield the treasury an estimated $9,900,000.

That one mill saving was the offshoot of a complicated situation that developed during the legislative session, when rural members bucked their city brethern and Governor Stassen to force through a bill raising the state gasoline tax from 3 cents a gallon back to the old 4 cent rate.

Gustafson and Hoesly on Mat Card Nov. 13

Clifton "Cliff" Gustafson, 235 pound Gonvick, Minn. wrestler, will make his second appearance in a local ring when he meets Mark Hoesly, 237 pound grappler from Monroe, Wisc. in the main event on the wrestling program which promoter Bill LaFave has arranged for Thursday night, Nov. 13th in the sports arena. The match, which will be one fall or a one hour time limit, will pit Gustafson who, since he appeared here last spring, has wrestled his way to the top-most rank of the country's wrestlers, being rated as the No. 1 contender for the world's heavyweight wrestling title, currently held by the Hungarian, Sander Szabo.

In meeting Mark Hoesly, Gustafson will be up against a wrestler that is being billed as "comer". Hoesly has had nearly as much amateur wrestling experience as Gustafson, having been an alternate on the 1936 Olympic wrestling team, and having wrestled during the 1935 and 1936 seasons as a member of the Illinois Athletic club team.

Following his appearance here last spring Gustafson wrestled and defeated Nagurski, and wrestled to a draw with the champion Szabo. It will be interesting to note the improvement in Gustafson's grappling.

The semi-final match will find a favorite of the local fans, Andy Moen, meeting the "bad" man of northwest wrestling, Alf Johnson, 233 pounds, of Minneapolis. While the opener will have the well-known "villain" Karl Wampler wrestling Rudy Patek, 216 pound Rice Lake, Wisc. wrestler. The preliminary matches will be one fall, with a 30 minute time limit.

Bill LaFave, who is promoting the card for the local athletic association, announced that popular prices will prevail, with the general admission being 45 cents, with ringside at 75 cents and $1.00, and a special admission fee of 25 cents for high school students.

Atty. General Clarifies Law Governing Storage of Game Birds in State

Game birds may be dressed or undressed when placed in storage, Attorney General J. A. A. Burnquist has ruled in response to an inquiry from the division of game and fish as to whether the law regarding transportation applied to storage as well.

The law provides that only undressed upland and migratory game, or those with head and feet intact, may be shipped, transported or carried.

The attorney general pointed out that while a charge based upon transportation of the birds from the storage site to another place in the immediate vicinity would be highly technical, that there may be instances where carrying them some distance would violate the intent of the legislature in requiring that game be undressed in transportation.

Persons accepting birds for storage under the latter conditions should advise their customers to leave the heads and feet intact, the attorney general advised.

Gives Rule on Keeping Wild Game after Season

The department of conservation today reminded hunters that all game taken must be tagged by a state game warden within five days after the close of the season if it is to be retained for longer periods provided by law. The deadlines are: For tagging water ducks, December 4; for possession of ducks, December 19. For tagging pheasants, November 8; for tagging ruffed grouse, November 4; for possession of all upland game, April 30, 1942.

The older one gets, the more reckless the younger generation appear.

.... With BUCK OLSON

All-time Lincoln Football Team

I haven't been in any red-hot arguments since I picked my all-star D-ball team this summer, and I got plenty of heat from the Hartz club, so I might as well get into a couple by selecting the team that I consider to be the all-time Lincoln high football eleven. And it's quite a task to name the outstanding players that have represented the local school since the sport was installed here, and at that I suppose that I have forgotten several players that merited first-team mention. But here it is: right end, Richard "Rip" Dablow; right tackle, Loren "Bones" Stadum; right guard, Paul Dahl; center, Roy Oen; left guard, Gordon "Boomer" Dablow; left tackle, Charles "Chuck" Herron; left end, Gordon "Tubby" LaBree; quarterback, Alvin "Al" Holzknecht; left half, LaRue "Andy" Anderson; right half, Milt Nesse; and fullback, Ernest "Ernie" Harzen. And in my "pony" backfield I would like to have Ambrose "Dutch" Zeh, Pomeroy Hill, Clarence Bakke, and Austin Shanahan. That's a club that could have played a lot of football.

"Streamline" Nearly a Casualty

Ray "Streamline" Olson won't soon forget the hunting trip that he made last Friday, going with Wally DuChamp and Johnny Jaranson to one of the lakes in the Fosston vicinity, for "Stream" nearly became a drowning victim. The boys had been shooting bluebills, being posted on a duck pass that Clarence Offerdahl has down there, and about noon "Stream" got into a duck boat, to go out and pick up the ducks that had fallen on the ice, and a few that had fallen out in the open water. When Ray reached the open water the boat was leaking badly, the sharp ice having slashed open some of the bottom boards, and before he could get the craft turned around and headed back for shore the boat sank. Trying to save his gun "Stream" hung on to the swamped boat, using it as a raft, but the frail built shell wasn't able to support the 200-pounder. He left the boat and struck out for the rushes, and swim of about 40 feet, thinking that he could wade into shore from there. But when he reached the rushes he found that he could not touch the mucky bottom, and that the ice made it difficult for him to keep his grip. And then, too, the intense cold numbed his muscles. For forty-five long minutes "Stream" battled the rushes and the ice, breaking the ice-crust, and pulling himself in toward shore by grasping the rushes. Johnny and Wally, meanwhile, were running themselves into near-exhaustion in an attempt to get a life-saving apparatus rigged up. A boat was found three miles up the lake and that was "Stream's" life-saver, for it is doubtful if Ray could have held out much longer. "Stream" reports that it was quite an experience, and that it put an end to his appetite for ducks and duck-hunting.

He's No. 1 Challenger

"Since his appearance here last spring Clifton "Cliff" Gustafson, Gonvick's farmer-wrestler, has made himself the No. 1 challenger for Sander Szabo's world's heavyweight wrestling title. Cliff, who will headline promoter Bill LaFave's card here on the 13th, threw Bronko Nagurski in a sensational match in Minneapolis in June, and then went on to wrestle a draw with champion Szabo.

Cliff is on his way to the world's championship, so why not make it a point to attend the matches next Thursday.

Look at Jim Bowl!

Jimmy Dryden is bowling in three leagues, and last week he made the honor roll in each league! Jim bowled 213-180-171—564 in the City league; 205-153-154—512, in the Commercial league; and a 142-172-178—492 in the Service league. And Jim's bowling honor roll stuff in spite of the heckling he receives from Lenny Helquist, his pinochle chum.

Basketball

Lenny Lorentson, guard; Orrin Pederson, center; and Don Berg, forward, were the only lettermen in the squad of fifty Prowlers that reported to coach Harry Newby on Monday afternoon for the first basket-ball practice of the season. Newby plans on dividing the group into three squads, with the eight and ninth graders in one group, the reserves in another, and the varsity in the third squad. In this manner he can give more of his individual attention to the boys, and discover more easily the players with promising ability.

It's too early to determine the makeup of the varsity squad, but judging by the material that reported this week it appears that the Prowlers are a year or so away from a district or regional championship. There are too many untried Juniors on the squad, but they will develop as the season progresses. It will be interesting to see how the Prowlers assimilate the stuff that Newby is going to give them. Harry is an A-1 basketball coach, but it takes a while for a new system to get into the blood of the players.

INCREASE NOTED IN AMERICAN ELK HERD AT RED LAKE

More than 100 Animals are Now in Game Reserve, Report Shows

Minnesota's last remaining herd of American elk, or Wapiti, is multiplying in the wilderness northwest of the Red Lakes, the state department of conservation reported after a survey.

Frank Blair, state game supervisor, said that a checkup by Patrolman Henry Gilthvedt of the Red Lake game preserve indicated that more than one hundred animals are present, compared with 27 six years ago.

The herd is roaming the wilderness fastness between Red lake and Thief lake, an area of upland and bog located in Marshall and Beltrami counties, Blair said.

Gilthvedt penetrated the elk range last month. Traveling on foot, he counted 40 elk, including 17 cows, 14 calves, and 9 bulls. State officials were particularly pleased with the good reproduction indicated by the presence of the calves.

"We believe we are very conservative when we say that the population there is more than a hundred," Blair said. "Patrolman Gilthvedt made his count on foot and necessarily traveled only a small part of the area."

Wapiti once ranged over the northern half of Minnesota, but by 1850 they were uncommon. The last record of native elk occurred in Roseau county in 1896, and the animals' extirpation from the state is believed to have occurred in the next few years.

In 1935, 27 Wapiti, which had been imported from Jackson's Hole, Wyoming, to Itasca State Park for exhibition purposes, were liberated on the Upper Red Lake game preserve, which covers 433,020 acres.

4 Traffic Offenses Cost 5400 Fines in State in First 9 Months of Year

Five thousand, four hundred Minnesota motorists have been arrested by state highway patrolmen and convicted, during the first nine months of the year for just four infractions of the traffic safety laws.

In addition to jail sentences meted out by the courts to many of them, these drivers have paid fines averaging about $22 apiece, or totalling $118,750, and 3,108 of them have been required to surrender their drivers' licenses.

The four offenses which caused so much motorist-misery and caused or threatened countless numbers of traffic accidents—were: speeding, with 2,000 arrests; careless driving with 1,576 arrests; drunken driving with 1,130 arrests; and improper passing with 694 arrests.

PUPILS AT N. W. SCHOOL EXHIBIT HOME PROJECTS

Show Is Feature of Parents Day at School Saturday, November 1

The home project show, a prominent feature of the Parents' Day exhibit at the Northwest School on Saturday, November 1, was a great success with a total of 227 entries in all classes. Judges and superintendents of the show were unanimous that the quality of exhibits in the boys' collection and the girls' sewing, baking and canning projects was the best in years.

Grain and potato projects were below standard in quality due to the wet weather which prevailed throughout the Red River Valley at harvest time. Students at the school, by carrying on summer project work at home during the summer months, earn extra school credits which compensates in part for the six-months school year.

In the girls' home project work, the freshmen girls confine their sewing to making cotton ensembles, baking of bread, cookies and butter cakes. The Junior girls in sewing make silk and wool dresses do "make overs". In cooking the Junior girls do meal planning, baking of pies and cakes, and can fruits and vegetables. Senior girls make silk and wool dresses and various kinds of needlecraft.

Agassiz Scout Council to Meet at Devils Lake

The Lake Agassiz Council Boy Scouts of America will hold its annual council meeting at Devils Lake, N. D., November 9th. The Lake Agassiz Council is made up of the nine Northeastern counties of North Dakota and six Northwestern counties of Minnesota.

This is expected to be the biggest meeting in years because of the renewed interest that has been taken in Scouting. Because of renewed vision in the leaders of the council as to the possibilities of the Scout program as an answer to the future of America, an expansion program is under way to reach as many boys as possible who want to be Scouts.

Two new field scout executives have been employed by the council making an Executive staff of three men with which to do this expansion job. These men will be represented at the annual meeting. They are Wm. Dukelow who will serve the Dakota territory and R. E. Matthews who is now serving the Minnesota territory.

PLUMMER

"Aunt Tillie Goes to Town"

The Junior Class of Plummer high school will present their class play Friday evening, November 7 at the Plummer Auditorium. The story is centered about Aunt Tillie Trask who is very upset because her favorite niece has announced her intentions of marrying Mervin Tucker. When Mervin arrives there is a confusion over suitcases which produces three Aunt Tillies instead of one—and that's where the fun begins.

The cast of characters is as follows: Tillie Trask, who dislikes all males, Gladyce Giere; Lucinda Talbor, a maid who is anxious to be married, Grayce Anderson; Pamela Marsh, Aunt Tillie's charming niece, Eileen Peterson; Lizzie Parsons, an aspiring young novelist, Lois Rufus; Ellen Noeland, who appears suddenly, Rachel Hill; Ronald Howland, who has always an explanation for every thing, LeRoy Norby; Melvin Tucker, who is in a peck of trouble, Walter Gerardy; Charlie one Lung, a Chinese cook, Renlo Nenonen; Mrs. Tillie Tucker, Mervins aunt, Rose Torstveit; and Dr. Hattie Bing, a chiropractor, Mickey Hallas.

The play is the newest type of streamlined farce. The situations are so funny they are sure to produce a riot of laughs. The Junior Class cordially invites the public to attend "Aunt Tillie Goes to Town" and enjoy an evening of real humor in an outstanding comedy.

PREPARE NOW FOR WINTER, HOFFMANN WARNS AUTOISTS

Highway Chief Recalls the Death Toll from Storm Nov. 11, 1940

With many sections of Minnesota already having had a foretaste of winter, State Highway Commissioner M. J. Hoffman today called upon all motorists to prepare their cars—and themselves—for the uncertainties which late fall and winter motoring always bring.

Basing his warnings upon the 47 fatalities resulting from the Armistice Day storm of a year ago, Commissioner Hoffman pointed out that the great majority of these deaths were attributed to the fact that the victims were not dressed adequately for winter travel. To prevent a similar fate befalling motorists this winter, he suggested that every car should be provided with one or more warm blankets and extra clothing to be used by passengers in case of encountering a sudden storm such as struck the state last year.

Automobiles too, he said, should now be equipped with a good set of tire chains, snow shovel and adequate frost shields. Heaters should be checked to determine if they are in good working order; radiators should be filled with a good anti-freeze solution; batteries should be tested for strength and worn, smooth tires should be replaced with new tires to afford better traction in snow and mud.

Observance of these suggestions, Commissioner Hoffmann advised, may go a long way in preventing a recurrence of last year's tragedies when unprepared motorists and hunters died in the grip of the tragic Armistice Day storm.

TWO POTATO CROPS ARE GROWN ON SAME LAND

Hawley.— Not satisfied with one potato crop on his land this year, S. P. Wange has raised two crops on the same piece of ground. The first crop was harvested on June 16, June 22 the second crop was planted on the same land and on October 21 the second crop was harvested. Mr. Wange is probably the first man to harvest two crops of potatoes from the same land in the Red River Valley.

Board of Education Advances Date from Time Set Earlier in Fall

GETS RESIGNATION FROM A. B. STENBERG

Appoint Minneapolis Man as Boys' Physical Education Teacher

The local board of education at its November session Monday evening accepted the resignation of A. B. Stenberg, board member who was elected last week to serve the city as alderman-at-large; changed the date of the Thanksgiving school vacation from November 27 and 28 to November 20 and 21, and elected a boys' physical education instructor to succeed Chester Nelson, resigned.

The change in the holiday period was made to conform to the designation by Governor Harold E. Stassen of November 20 as Thanksgiving Day, the observance having again this year been advanced one week by President Roosevelt.

Elected physical education instructor was Delver D. Daly of Minneapolis, a graduate of Edison high school in that city and of the University of Minnesota this year, where he served as a member of the university tumbling and gymnastic teams, winning state and national honors. He has had practice teaching at University high school, and taught swimming at the Minneapolis YMCA.

Following approval of the state board of education, the local board voted to authorize the transfer to the Thief River Falls high school area of School Districts 13 and 30, at present part of the Goodridge high school area.

Supt. Morris Bye informed the board that the American Surety company of New York had settled out of court the suit brought by Emily Helland arising from injuries alleged to have been sustained when a school bus backed into the Syvert Hanson milk truck February 3, 1941. Amount paid by the insurance company was $1,413, while the sum asked for in the suit was $3,500 and costs.

Mr. Bye announced also that Robert E. Lee Hill, alumni director of the University of Missouri, had been engaged to deliver the address at 1942 Lincoln high school commencement exercises.

The board authorized the maintenance of skating rinks this winter, as in past years, on the Knox, Northrop and Washington school playgrounds.

140 Present at Legion and Auxiliary Banquet

Recalling the happy atmosphere of the first Armistice Day 23 years ago, tempered only by the progress of the years and thoughts of the present world crisis, local Legionnaires and auxiliary members, 140 strong, assembled at a most enjoyable Armistice Day banquet, Tuesday evening in the Civic and Commerce association rooms.

An excellent turkey dinner was served by a group of auxiliary members on candle-lighted tables decorated in the national colors. Post Chaplain Harry R. Lund gave the invocation, and following the dinner Kern Olson ably fulfilled the duties of toastmaster.

York, outstanding hero of the last war.

Mr. Bye recounted a story he had been told by Dean Russell of Columbia University dealing with the tragic plight of the French people under Nazi domination in both occupied and so called Free France. He commented that this shows what America can expect if Hitler extends his conquest to this country, and said he is confident of this country's ultimate choice.

Mrs. S. H. Poston, the only Gold Star mother who was present, was presented with a corsage by Mrs. Robert Plough, president of the Legion auxiliary, who spoke briefly. Dr. H. K. BLAZE DESTROYS FRANK HARDISTY FARM BUILDINGS

One of the most disastrous farm fires in this section in recent years Monday morning destroyed a large cattle barn on the Frank Hardisty farm in Smiley township, together with four purebred Holstein cows and three calves, as well as a sheep shed and a chicken coop.

The fire, of undetermined origin broke out while Mr. Hardisty was away from the farm at a neighbor's place, and his wife was ill in bed. The loss is partly covered by insurance.

John Ward, local fire risk inspector, and Ole Ness, member of the fire department, brought fire extinguishers to the scene, but the fire was too far advanced for them to be of any avail.

The blaze started in the haymow of the barn, which had been erected twenty years ago and measured 64 by 100 feet in dimensions.

ARMISTICE DAY OBSERVED WITH FINE PROGRAM

Judge O. R. Knutson of Warren Delivers Stirring Address

DR. A. E. JACOBSON IN CHARGE OF PROGRAM

Auxiliary Trio and School Chorus Participate in Exercises

Recalling the armistice that ended World War I 23 years ago, Armistice Day Tuesday was commemorated in Thief River Falls with appropriate exercises in the Lincoln high school auditorium, sponsored jointly by Elmer J. Eklund post of the American Legion and the public schools. Dr. A. E. Jacobson presided.

The address of the day was delivered by District Judge Oscar R. Knutson of Warren, who declared that Armistice Day should be considered as another milestone in the world's striving for peace and liberty, adding that the people should bear in mind the goals and ideals for which the last war was fought.

The speaker said the fundamental reason for the present war is the conflict between two different philosophies of government—the totalitarian and the democratic.

Looking toward the future, Judge Knutson said American citizens should ask themselves two questions: "Can we any longer isolate ourselves from the rest of the world?" and "Can we take part in the war and then not help preserve the peace afterwards?"

The program opened with a group of spirited selections by the Lincoln high school band, directed by Glendon E. Ahre, followed by the advancement of the colors and the introduction of officers of the Legion post, auxiliary and Veterans of Foreign Wars seated on the stage.

Rev. S. S. Olafson gave the invocation, after which the auxiliary trio, including Mrs. Emmett Wright, Mrs. Arthur Berg and Mrs. John Stewart supplied three selections accompanied on the piano by Mrs. H. F. Harrison.

Preceding Judge Knutson's address, the audience stood in silence for thirty seconds in respect to the World War dead, while taps were sounded.

The program closed with a group of three selections by the high school chorus, directed by Miss Grace Omundson.

DOCTORS WILL AID IN IMMUNIZING OF COUNTY CHILDREN

Miss Ruby Goodman, Red Cross Nurse, Tells of Plans for Project

The immunization program carried on through the cooperation of the physicians of Thief River Falls will get under way next week, Miss Ruby Goodman, Red Cross nurse, stated today. The county is divided up into areas, the parents in each area to be given a period of one week in which to bring their children in to their own family physician and have the immunizations for smallpox and diphtheria. Parents will be notified through the schools concerning the dates for their area and details of the plan.

Diphtheria and smallpox, said Miss Goodman, can be prevented by immunization, and since only about 12 per cent of the rural school children are protected against diphtheria, and 47 per cent vaccinated for smallpox, parents are being given this opportunity to have their children immunized.

Parents are especially urged to have the preschool child protected against these two diseases, since children from one to six years of age are much more susceptible to contagious diseases.

Pupil inspections will be made by Miss Goodman in the St. Hilaire school on November 17, 18, and 19th. The rural schools will be completed this week.

PLANS PROGRAMS FOR COMMUNITY MEETINGS HERE

County Residents Share in District Recreation School in City

Lots of wholesome, stimulating fun and recreation for young and old at Pennington County farm meetings and rural gatherings this winter is the aim of delegates who represented this county at a two-day district recreation school at Thief River Falls on November 4 and 5 of last week, says Ernest A. Palmer, Pennington County Agent.

Agricultural extension services in about a dozen counties centering around Thief River Falls sponsored the training school in cooperation with the state agricultural extension service, with Miss Ann Mather of University Farm giving the instruction.

Pennington County delegates attending the school were Mrs. V. C. Noper, Dake Ayers, Mrs. Axel Engelstad, Ruby Engelstad, LaVerne Lanska, and Mrs. Ernest Palmer. They spent a very busy two days learning new songs and games, how to lead community singing, how to direct group play activities, and how to produce one-act plays, including ideas on choosing plays, picking and coaching casts, and handling staging, lighting and make-up problems.

Delegates will use this information and training for the benefit of all farm groups in the county by helping out with singing, recreation and play production at 4-H and rural youth meetings, farmers' clubs, and other local and county-wide gatherings. They will also pass along ideas and suggestions to other local recreation leaders.

Armistice Day Weather Was Different This Year

There was little about Armistice Day weather Tuesday to recall the disastrous storm that swept the state a year ago that day, taking a toll of nearly fifty lives in Minnesota. The ground was bare this year and there was little wind, while the mercury mounted Tuesday above the 40-degree mark, following by 55 on Wednesday, the warmest day this month.

Gov. Stassen Goes to Capital on Oleo Order

Governor Harold E. Stassen was in Washington this week seeking support for proposals which will help farmers and small business men over difficulties that now beset them.

One of the problems occupying his attention is the threat to dairy farmers of Minnesota and other states resulting from the much debated oleomargarine regulation promulgated by Paul V. McNutt, federal security administrator. McNutt announced this past week after repeated appeals from state officials and farm groups that he would not reopen the oleomargarine question for further hearing.

Governor Stassen announced promptly that he would go to Washington and make further efforts to obtain a favorable decision from McNutt and if this fails see members of the Minnesota delegation about getting through Congress measures that will nullify effect of the McNutt order.

INCREASE IN EGG OUTPUT IS TOPIC OF MEETING HERE

Community Meetings to be Held Thruout County November 25

Increasing the egg production by nine per cent in Pennington county for national defense was the main topic of discussion at a county-wide farm defense board meeting in the court room in the court house in Thief River Falls on Tuesday afternoon.

Carl G. Ash, County Agent of Polk County, who is at present devoting all his time to poultry work in northwestern Minnesota, discussed methods of increasing this egg production.

The program to increase the production of eggs in Pennington county is being sponsored by the county farm defense board which consists of Carl R. Anderson, chairman; Ernest A. Palmer, secretary; Alfred Longren, H. W. Thelander and S. E. Hunt. Local leaders and community committeemen who were in attendance at the meeting from every section of Pennington county will carry the information back to every neighborhood in Pennington county on the afternoon ad evening of November 25. A full schedule of these meetings will be published in the next issue of this newspaper.

Mr. Ash stated fully that there is risk involved in undertaking increased production of eggs. He stated, however, in order to insure farmers against as much as possible of this risk, the Department of Agriculture has announced average minimum prices on pork, dairy products, and poultry until July 1, 1943. More recently it has announced that it will support prices at 85 per cent of parity until December 31, 1942. It is indicated that further statements will be forthcoming as necessity demands.

ALTER METHOD OF GIVING SELECTEES PHYSICAL EXAMS

To Get Definite Word as to Status Well in Advance of Time to Leave

Announcement of pre-induction physical examinations for selective service registrants was made this week by Lt. Col. J. E. Nelson, state director of selective service.

Under the new changes, the greatest cause for complaint against the selective service system has been removed, Nelson pointed out. The draftee now may know definitely, 30 to 60 days in advance of induction date, whether or not he will be accepted by the army.

From 30 to 60 days before being sent to an induction station, a registrant in class 1-A or 1-A-O will be sent to Fort Snelling at government expense for examination by army medical examiners.

After this examination the registrant will be told whether or not he will be inducted.

This new procedure does not eliminate the function of the local boards' examining physicians who must make the first classifying examination.

NEW KIND OF CONVEYANCE TO MOVE FARMERS' GRAIN

Williams—This may be a little late to be of aid to farmers this year, but you might clip it, paste it in your hat, and save it for another emergency. Over at Hallock, Sheriff Elmer O. Pearson built a horse-drawn toboggan about 8-12 feet to haul the unthreshed grain off the rain-soaked fields. It is claimed that the "toboggan" worked perfectly and many farmers in that section, using the same device, saved thousands of bushels of grain. It is said that the toboggan carried up well with its load in deep water, and glided over the stubble with ease in wet spots.

NATIONAL DEFENSE PROGRAMS ADDS TO RED CROSS NEEDS

Many Opportunities for Aid by Volunteer Workers, Says Kjos

"The Red Cross needs many more volunteer workers this year to carry on the expanded services necessary under the national defense program," Herman A. Kjos, chairman of the Pennington County Red Cross chapter, declared today.

"Opportunities for constructive volunteer assistance and leadership in the Red Cross are greater now than they have been at any time since the World War." Men and women of all kinds of experience and interests can find satisfying work in the volunteer special services of the Red Cross, which include production both for war relief and home use, canteen, motor corps, Braille, administration and staff assistance, nurse's aid corps, home service, and hospital and recreation Gray Ladies.

Financial support of these and all other Red Cross activities must come from membership funds received during the annual Roll Call, but the active cooperation of a great army of volunteers is just as necessary for the carrying out of those services which the nation relies on the Red Cross to supply.

As an example of the way certain of these Red Cross activities have had to expand rapidly in the past year to meet national defense needs, Mr. Kjos cited Home Service. Pointing out that frequently the welfare of the families of men in the armed forces is referred to Red Cross, Mr. Kjos said that with close to 2,000,000 men now under arms, there is a need for home service workers in every chapter. Women taking part in this activity work with the families of enlisted men, assist in doing family case work for disabled veterans and also cooperate in emergency disaster relief.

450,000 Yule Trees Cut on State-Owned Lands

Approximately 450,000 Christmas trees will be cut from state lands this year. These trees are taken from stagnant swamps where growth is extremely slow. The average age of the trees cut is 85 years, and none has reached a diameter of more than two and one-half inches. They never would reach size suitable for pulpwood. Approximately 10 per cent of the black spruce trees growing in these swamps are cut for the Christmas trade, leaving 90 per cent for ground cover.

W. L. DAHLQUIST, Editor
NORMAN A. HOLEN, City Editor
A. L. MATTSON, Business Manager

In a letter to the National Rivers and Harbors Congress, President Roosevelt outlined the administration's attitude toward the type of river improvements the people of this territory have been seeking. Construction projects that do not have defense value will be deferred until the end of the present emergency. The idea of having projects set up and ready to go when the war ends is encouraged. In this letter the President merely confirms what department heads have already stated and from this standpoint there is nothing new in his statement. It does suggest however the importance of keeping alive the projects in which we are interested in the hope that they will receive favorable action when the new public works program is adopted.

It must be apparent by now to all reasonable people that unless some checks are imposed on organized labor we not only are going to be unable to make satisfactory progress in our defense program but we are going to be swept into a vicious circle of rising prices that will end in complete demoralization of all our economic relationships. At the present time organized labor is taking advantage of its right to strike. In a national emergency when the very life of the nation depends upon its speed of production, organized labor threatens to stop production if its demands are not met. At a time when hundreds of thousands of our men are being called into military service at wages that mean a sacrifice to most of them; at a time when our citizens are being asked to pay enormous taxes to meet the heavy cost of our defense program, organized labor is making demands that can be met only by adding additional burdens to the already overburdened shoulders of the unorganized masses. The responsibility for the present condition rests squarely on our government and only by government action can the condition be remedied. If the administration does not apply the brakes Congress will and if Congress is forced to act then organized labor will lose much of what it has gained in recent years.

Armistice Day did better by us this year than last as far as weather is concerned. A year ago winter was really here. It may come tomorrow of course but because last November was so rough we are going to be extra appreciative for every nice day we get from now on.

Things have quieted down on the eastern front of the European war but that just means that another big drive is getting under way and one of these days the slaughter will start on a big scale again. The fighting is expected to be shifted to the south again for the winter months and some dopesters are predicting that Turkey will be the next victim of the Nazi drive. While Germany's losses this summer have been tremendous, observers seem to agree that Hitler's fighting machine has not been seriously crippled. It is estimated that production of war materials in Germany has almost equalled the losses. Encouraging are the facts that the Russian army is still a military machine and that Britain's armies in Africa and Asia are better equipped than they were a year ago to face a blitzkrieg. Time is still the important factor—time to build the equipment that is necessary for modern armies. The odds, in this respect, are steadily becoming more even.

Bill Langer, who has been involved in North Dakota politics for many years and who is now trying to prove to his fellow members of the United States Senate that he is not a crook and should be permitted to represent the people of his state in that body, may not be guilty of the crimes he is charged with. He may be honest but for an honest man he certainly has been involved in a lot of shady deals. Strange thing how a man whose reputation is so questionable can retain a political following. If he is not seated it is quite probable that he will be a candidate again in the next election and possibly will be re-elected.

One thing that is going to improve our chances of surviving the period of adjustment that will come when the war ends without too much disorder is the general realization that a period of difficult adjustment is ahead of us. The fact that many people are now looking forward to that period realistically will in itself do much to cushion the shock. Between now and then however many things can happen to our thinking and possibly we will go into that period as much off balance as we were when we went into the last depression. What a tough problem it is. We no more than get out of one mess and we get into another. Maybe that's what makes life interesting.

RECREATION HIGHLIGHTS

The recreation program is sponsored by the city council in cooperation with Work Projects Administration recreation leaders.

Roller Skating

Roller skating enthusiasts are encouraged to get out and fill up on the indoor sport, because it won't be long before the activity comes to an end. Although no definite date has been set for the close of the season, it is expected the rink will be flooded in the near future. Roller skating is held on Tuesday, Thursday, Saturday and Sunday nights and Sunday afternoon. The rink is also available for private parties.

Game Room

Now that cold weather is here, the place to enjoy recreational games and activities is in the arena game room. Table tennis, ring toss, bean bags, card games and numerous other activities are on hand for all age groups. The game room is open every weekday afternoon at 1:00 o'clock to give the smaller children opportunity to use the facilities. Later on in the afternoons, older children are invited to participate.

Puppetry

One of the finest and most active parts of the recreation program is the arena puppet project. Headed by Camille Dostal, puppetry activities enjoy excellent participation. But there is still room for many more. Puppets can be made to take home, or children may work on puppets to be used in plays that are staged every other Thursday in the arena puppet theatre. A show will be held one week from today. Parents and children are invited to these free shows, which in the past have been very successful. Remember, it's a treat to see the puppets in action.

Handicraft

Handicraft classes, conducted as a part of the recreation program, continue to operate in the arena. Articles of value are being made at the present time by people of all ages. No charge is made for the instruction, and most of the material is furnished. Only a small amount of material is expected from the participants. Hot cloths, pads, stuffed animals, vases, necklaces are only a few of the many articles being made. Everyone is invited to take part in these classes held every afternoon in the upstairs of the arena.

Woodcraft

Many articles made in the shop rival those purchased in stores. Many beautiful lamps have been made recently along with numerous other craft articles. Here again, instruction is free, and only a minimum amount of material is expected to be furnished by the participant. Adults in particular are invited to work in the craft shop. Just a visit will prove the value of such a work shop.

Three-Toed Woodpecker

Wisconsin has a new feathered resident, the Arctic three-toed woodpecker—a rare species of bird. It has a yellow head and has never before been seen in Wisconsin.

Baudette—A load of flax belonging to Mrs. R. C. Fraser of near International Falls brought to the Northern Farmers Cooperative exchange a few days ago contained 257 bushels and netted the sum of $450.00. The flax grader ... said to be the largest single load of flax ever to be brought to the exchange. Looking Backward

1931—TEN YEARS AGO

The formal opening of the Avalon theatre was an event of November 12.—Thirty carloads of turkeys were shipped from this city during the past week.—The mercury mounted to a high mark of 71 November 8.—After long discussion the Pennington county commissioner districts were rearranged by the county board.—The state highway department made a special allotment of $10,000 for a new bridge across the Red Lake river at St. Hilaire.—Ole R. Sande, former county superintendent of schools here, accepted a position with the state department of education.

1921—TWENTY YEARS AGO

Due largely to an increase in the school levy, the total city tax rate was raised to 101.1 mills compared to 89.2 mills for 1920.—The total cost of paving 22 blocks in the business district was fixed at $261,305 by the engineer in charge.—A Parent-Teacher association was formed with Mrs. H. W. Froehlich as president.—Dr. R. Arnold, formerly of Montevideo, has purchased the dentistry practice of Dr. C. B. Crandall.—"Doctor" S. R. Kirby, who recently moved from this community to Northwood, N. D., wrote Peter Engelstad, saying that business continued to be good.

RAILROAD UNIONS REJECT PROPOSED WAGE COMPROMISE

Fact Finding Board Recommends Temporary Raise of 7½ Per Cent

The railroad operating brotherhoods rejected Thursday a proposed compromise settlement of their wage dispute, and one of their leaders declared there would be a nationwide strike December 5.

A. F. Whitney, president of the trainmen, mentioned this date, but heads of the other brotherhoods—the engineers, firemen, conductors and switchmen—indicated no date had been set, though saying there would be a strike.

The railroad brotherhoods rejected the wage compromise advanced by President Roosevelt's fact-finding board after it had been accepted by the railroads.

This board recommended a temporary 7½ per cent wage increase whereas the unions had demanded a 30 per cent raise. Present scales vary among the different roads.

December 5 is the earliest date for which a strike could be ordered since federal statutes provide that 30 days must elapse between the report of a fact-finding board and a strike.

There was no immediate comment from government officials on the brotherhoods' action, but the belief was widespread in Washington that some step to avert a strike would be taken soon.

Outstanding Mat Card at Arena This Evening

Northwest wrestling fans will trek to the sports arena tonight to witness the country's number 1 challenger for the world's heavyweight wrestling crown, Cliff Gustafson, meet Mark Hoesly, Wisconson grappler, in the main event on promoter Bill LaFave's wrestling card.

Alfred "Alf" Johnson, the Swedish villain, will tangle with Fergus Falls stocky Andy Moen in the semi-windup; and Rudy Patek will meet rough-house Earl Wampler in the preliminary. In addition to these matches promoter LaFave has arranged several bouts featuring young, local wrestlers.

The barrel-chested Gustafson, who has spent the summer on his well-equipped farm near Gonvick, is in excellent condition and anxious to begin another season of wrestling, hoping that the year's campaign will bring him the world's championship. In meeting Hoesly, Gustafson is aware that he will be facing a comparative newcomer to the wrestling game, that is, new in the pro-ranks. Gustafson realizes that Hoesly is ambitious and that an upset win by the Wisconsin boy would establish Hoesly as one of the top-ranking wrestlers, and be a severe set-back for Gustafson's title aspirations.

Gonvick Grappler on Arena Mat Card Tonight

Pictured above is Cliff Gustafson, Gonvick wrestler, who will headline the wrestling program scheduled at the arena this evening, meeting Mark Hoesly, well-known Wisconsin mat expert. Several other good bouts will complete the program.

Three Drivers Fined in Municipal Court Here for Traffic Offenses

Three men, two of them from the Grygla community, were brought into municipal court during the past week on charges of having violated the traffic laws. Carl Holte and Orrin Sletten were charged with reckless driving, the former being fined $25 and the latter $30. Drivers licenses of both men were suspended for a period of thirty days. Anthony A. Brasseur of this city was arrested by the highway patrol on a charge of drunken driving on Highway 32 south of Thief River Falls, and in municipal court Monday he was fined $35 and costs and his drivers license was automatically revoked.

Sixty in Attendance at Jr. Chamber Guest Night

Approximately 60 members of the Junior Chamber of Commerce and their guests were present last Thursday evening at a guest night program in the Palm Garden Cafe. W. E. Dahlquist, former president of the Civic and Commerce association, stressed the advantages that would result from cooperation with the senior group in its various undertakings. The Kelly brothers provided a group of appreciated violin duets.

LINCOLN QUINTET GETS SET FOR 1ST BASKETBALL TILT

Schedule Will Open Here Dec. 5th with Game Against Fosston

Coach Harry Newby has been sending squads of Prowler basketball hopefuls through intensive drills in preparation for the approaching season. The schedule will be opened on Dec. 5th when the Prowlers meet Coach Mike Lagather's Fosston Greyhounds on the local floor.

Coach Newby has not made any definite varsity squad selections, but he expects to name his varsity team from among the following players: Lenny Lorentson, Don Berg, Orrin Pederson, Johnny Campbell, Ralph Hunt, Jack Melby, Bob Abbott, Milt Reierson, Bob Powell, Bob Paulson, Billy McKechnie, "Mouse" Efteland, Homer Matheson, Owen Borchert, Bud Elde, Orlin Gjernes, Don Michalsky, Mark Levorsen, Don Aasland, Billy Bye, Loren Buoen, Luverne Olson, and Dale Hostvet. Among the large squad of freshmen that have reported for practice, Newby states that Art Forsberg, Charles Richards, Billy Bye, Bob Baker, and Earl Halle, appear to be the most promising.

The Prowler basketball schedule:

Delegations from Shelly, Crookston, Moorhead, Hawley, Detroit Lakes and Thief River Falls, will also be present.

Keeping Score

.... With BUCK OLSON

They'll be in Condition

At least Harry Newby won't have to worry about the physical condition of the Prowlers this year, or question whether or not the boys are breaking training. The Prowlers that are out of condition won't be able to play the fire-alarm style of basketball that Newby is installing this year. It'll be easy to discover the play-boys on the squad because those fellows won't have the stamina to make more than a couple of fast breaks. Coach Newby is trying to organize the Prowlers into a fast-breaking five-man offense—the system of play that is featured by the Iron Range teams—and it takes condition for boys to play that style of offense.

I have an idea that the fans will be surprised when they see the Prowlers in their first game, against Fosston on Dec. 5th. The Prowlers will perhaps make a number of wild passes, and look ragged in their play; but the boys will be breaking down the floor.

Deer Drive on Sunday

Game Warden Bill Borchert will supervise the deer drive which will be made next Sunday in the game refuge in Smiley township. The purpose of the drive will be to take a census of the deer that are in that vicinity, so that an estimate can be made of the rate of increase, or decrease, that has occurred in the herd. Mr. Borchert stated that he wishes 60 or 70 sportsmen would make arrangements to participate in the drive. It should be an interesting experience, so why not inform game warden Bill that you will be on hand for the drive? Remember it's next Sunday.

Note to Ames P. I. Pederson

Did you notice that your Jack Sprat bowling team is tied for last place in the Business league standings? They need reinforcements, so you better arrange to be in town on the night the team bowls. The boys figure that you would be a quite a reinforcement—that is, if your bowling game is as strong as your talking game!

Gay Haugen's Four Strikes

There was considerable excitement on the DuChamp alleys last week when Gay Haugen struck out from the 8th frame, piling up four straight strikes, to give his Palm Garden team the win that sent them into first place in the Classic league standings.

If you know Gay, and his bowling, you know that it was quite a feat for him to get those strikes. Gay felt so exuberant that he trotted down to the pits, shook hands with the pin boys, bought them pop. I think Gay is carrying that score-sheet around in his bill-fold, he's that tickled about those strikes.

Ole's Goose

Great Northern Ole Ness finally shot a goose. And it was a big one, a Canadian honker weighing 11 pounds. Ole and Al Berge were hunting near Crystal lake Sunday when the big event occurred, and it was a big event for Ole, who has been hunting for 30 years and this is his first goose. Ole noticed this lone goose circle the lake, and apparently settled in some rushes in the north-east corner of the lake. Taking his springer spaniel, Ole trudged along the lake shore, and suddenly his dog dashed through the rushes and into a clump of brush bordering a field. There was the goose. For a few moments there was a flurry of goose feathers and spaniel hair, and then the goose began to "take off". That's when Ole fired a load of number five's, and bagged the goose.

It's Wrestling Tonight

If you enjoy rough-house entertainment you better make it a point to be in the Sports Arena tonight when Cliff Gustafson meets Mark Hoesly in the feature match of promoter Bill LaFave's wrestling card. It's the consensus of wrestling authorities that Gustafson is on his way to the world's heavyweight championship, and that he will win the title as soon as he can get the champion Szabo into the ring with him in a "shooting" match.

Too Late —and Too Little

That describes my duck hunting results for this season. I've got a brief case full of maps, giving details of where-to-go to get your limit of mallards, etc. I went into the Ada territory, but a week too late, went up to ditch 200, but a week after George Williamson and Snuffy Holmstrom had shot that out; went up Clearwater river, but was there a week after Ole Ness had chased all the ducks out of there; hurried up to the Greenbush swamp, and came there a week after Helmer Bauman, Orvis Olen, John Mostue, and others had blasted that wide open; made a trip down to the Fertile corn-field, and found that Cliff Overum had stirred up all those mallards; sat in a barley field south-east of town, and then learned that Phil Prichard and Jess DuChamp had taken all the mallards out of the place. I've rent for a duck call, and phonograph record on duck calling, so next year all I'm going to do is sit in the Fair Grounds grandstand and call the mallards to me.

MINNESOTA HISTORICAL SOCIETY

STORM WARNING SYSTEM BEING SET UP IN MINNESOTA

Seek to Avert Recurrence of Armistice Day Death Toll Last Year

The safety division of the Minnesota department of conservation and more than a score other organizations are cooperating in a storm-warning setup calculated to prevent recurrence of the great loss of life which occurred in the Mississippi river bottoms in the Armistice Day blizzard of 1940.

The cooperating agencies include the United States naval reserve, coast guard and auxiliaries, engineer's office, the federal weather bureau, the railroads, state highway patrol, radio stations, municipal authorities and many sportsmen's groups safety councils.

Every possible means of spreading the warning of an impending storm of unusual severity has been arranged for, and 24-hour protection has been set up for the entire district in which at least 32 persons lost their lives November 11, 1940.

The plan is based on a system of signals and personal warnings, in which bells and sirens in the various communities along the river will be sounded.

When weather bureau observations indicate a severe storm is virtually a certainty in the river valley, the word will be relayed to the cooperating agencies, which will swing into action.

U. S. DEFENSE BOND SALES NOW NEARLY TWO BILLION

SMILEY

4-H Event

Another reminder is this announcement by the officers and committees of the Silverton-Smiley 4-H club that all arrangements are complete for a super-affair at the Smiley hall this Friday evening, Nov. 14 at 8:30 p. m. There will be loads of fun for all, big or small, what with a good short program with movies, a carnival filled with games, dart boards, target shoots, and candy and refreshments will be sold. Let's all turn out for the general welfare of these dandy 4-H young folks. The "double-decker" invitation still stands and all the more cordial for the reminding!

Mrs. Palmer Wold of Highlanding had a lovely birthday party on Sunday for her daughter Ila Mae who was six years old that day. Those from Smiley that attended were Mrs. A. B. Newton, Mrs. Ida Bjorgie, Mrs. Leonard Helgeland and three daughters and Mrs. Leo Swedberg and two daughters. Two large birthday cakes and nice gifts were the attractions of the day.

Mrs. Violet Kraemer was the hostess to the Helperettes club at her home Sunday evening with the club members and their men folks as guests. A social time and an hour of cards were enjoyed followed by a lovely lunch served by Mrs. Kraemer assisted by her mother-in-law.

Thursday evening visitors at the Mark Olson home were Mr. and Mrs. Bill Grundhaus and son and Ed Grundhaus, Sr.

The social at the Hummer school was a huge success Friday evening. A Patriotic program, commemorating Armistice was presented by the teacher, Mrs. Grace Graige and her pupils.

Mrs. Adam Londobeja attended the Leader's council of the 4-H clubs with such noted people as Miss Mildred Schenk and Mr. H. A. Pflughoeft as speakers. These latter two are state leaders in 4-H work.

1½ MILLION TELEPHONES IN 1941

A million and a half telephones will be added to the Bell System in 1941 and $500,000,000 will be spent for new construction.

In spite of this immense expenditure, unprecedented demand for telephone service in many communities is rapidly using up reserve facilities.

Already we are using substitutes for many metals but there is no known substitute for copper for telephone wires in cities and between towns, and soon we may not be able to get any copper for extension of telephone plant except as it is considered essential for national defense.

The situation already is such that in many localities, it is not possible to provide everyone just the type of telephone service wanted and there may be delays on some long distance calls.

Bombers Must Breathe

Today American-made bombers can fly at the unbelievable height of six miles. Here is the story of the small but all-important device that helps make stratosphere flying possible.

1. It started on Pike's Peak in 1918, when Army Air Corps engineers showed that an airplane engine could be made to run efficiently 2½ miles above sea level.

2. This amazing feat was possible because a "turbosupercharger"—developed by the Army Air Corps and G-E engineers—pumps extra oxygen into the carburetors.

3. For 23 years these engineers have worked constantly to improve their device. As a result, U.S. bombers can fly above the reach of anti-aircraft fire.

4. Dr. S. A. Moss, G-E engineer, who pioneered in this work, now at 69 has the thrill of watching the supercharger help carry our fliers higher than any others!

J. H. Sargeant of Crookston Elected President of Association

More than 600 parents of students of the Northwest School of Agriculture at Crookston were present for the meeting of the Parents' Association and as guests of the school on November 1. Fifteen counties of the Red River Valley area in Minnesota and three counties in North Dakota were represented by parents at the meeting of the association.

Retiring president O. A. Flaat of Fisher and Martin Larson, secretary, gave reports of the activities of the year. Newly elected officers for 1942 include J. H. Sargent of Crookston, president; Emil Lerud of Twin Valley, vice president; and Otto Hoppe, Secretary-treasurer.

The parents of Northwest School students were guests of the school throughout the entire day. The program started with visitation of class rooms and laboratories and a football game in the morning. Dinner for the parents in the school dining hall at noon, Parents' association meeting, and a student program in the afternoon followed by the coffee hour completed the afternoon program while a program of motion picture films in the evening concluded the day.

At the student program, ninety-two girls, under the direction of the home economics department, staged a style revue modeling dresses made in summer home project work. Boys' summer work was demonstrated with colored film slides taken of the boys working in their projects on their home farms.

Stillwater—A purebred Holstein cow belonging to W. S. Moscrip of Lake Elmo produced 6,643 pounds of milk the past year and 504.6 pounds of butterfat. The cow was milked three times daily under the supervision of the University during the entire time. If this kind of production becomes general there will be no cause for alarm that the country will run short of butter and cheese that can be consumed in the United States, Great Britain and other countries

TOO MANY FROGS BRING HEAVY FINE

Waconia—Too many frogs brought four Excelsior men into the toils. According to reports 50 pounds of frogs were in the lot and when brought into court the judge thought $92.80 was about the right penalty to attach as fines. Frogs are one delicacy that few people have the opportunity to enjoy and it is safe to say that the treats in store for the four men would not taste too good, now.

Look into the Last Mile—FIRST

BUICK BUILDS FOR DEFENSE

MAYBE it's a little hard to picture this trim Buick as it will look on that unknown day when you come to turn it in.

There may be scars in its fenders, and use-stains on its upholstery—but the thing that matters is it'll still be giving great runs.

You can count on that husky valve-in-head straight-eight to be ticking off the miles with the satisfying extra efficiency it now boasts.

You can rely on Compound Carburetion† to hold your gas-costs down, squeezing every last power-packed mile out of the fuel you burn.

There won't be any loss of easy comfort in those all-coil springs, or any need for care to keep them gentle.

As for the drive—well, there's just nothing to go wrong with a simple steel shaft encased in a stout torque tube!

Tires? You may be through the second or third set before you're finished with any car you buy now—but those Buick broad-rim wheels will see to it you get the top mileage each can give.

As for such things as connecting rods and bearings—Buick rods are extra strong, while tests show that our oil-cushioned bearings last twice as long as others under the same load and service.

So go right ahead! Buy this Buick on its last mile instead of its first. That's the smart way to buy these times.

Of this you can be sure: No other car's going to offer greater surety of long, pleasurable, dependable service—so if you can get a Buick now, better grab it!

No other car has ALL THIS FOR YOU IN 'FORTY-TWO

THANKSGIVING DAY OBSERVED TODAY IN STATE

Business Activities Come to a Standstill for Occasion

PROCLAMATION IS ISSUED BY GOVERNOR

Sixteen States to Observe Thanksgiving Holiday November 27

Public offices are closed today, November 20, and business activities are virtually at a standstill while citizens of the nation pause to observe the time-honored tradition of Thanksgiving Day instituted more than 300 years ago by the Pilgrim Fathers.

In the Thief River Falls community the observance takes the form of family gatherings in many homes, while special services are being conducted in a number of local churches.

Governor Stassen Saturday issued a proclamation designating November 20 as Thanksgiving Day, and called upon Minnesota citizens to give thanks "for the many blessings we enjoy" and to display the American flag.

"In a world prostrate with grief and strife", said the proclamation, "we, the people of Minnesota, come to Almighty God humbly to offer solemn and public thanksgiving for His bountiful blessings of food, raiment, shelter and countless things granted us for a full life in a peaceful, rich and fertile land, and

"No less do we pray for strength to help the many who are distressed by want and privation that we may share His favor with all men and bring hope and cheer to the disconsolate, and

"With hearts filled with compassion of those stricken and in want, which we have, it is fitting a day be set aside when no business shall be transacted in any department of this state, a day when our homes shall be enriched by gatherings of loved ones."

Thirty-two states, including Minnesota and the District of Columbia will observe Thanksgiving, Nov. 20 as proclaimed by President Roosevelt.

Sixteen states will observe the traditional "last Thursday," Nov. 27.

Christmas Seal Proclamation

As mayor of Thief River Falls I feel it not only my official duty but my great pleasure to endorse the annual sale of the double-barred cross Christmas seals, the method of raising funds for the great local, state and national fight against tuberculosis.

The Christmas seal is a safeguard of our community. It protects our homes—all homes—from the ravages of tuberculosis. We pride ourselves that ours is a community of homes. Let us join whole-heartedly in the fight to defend our home front against this enemy of youth.

I hope that all our citizens will buy and use as many seals as possible this year. Costing but a penny, they give everyone, rich and poor, the opportunity to take part in this work of saving human lives. Let us show that our community is alive to its responsibilities and is doing its part to wipe out tuberculosis.

MAYOR W. W. PRICHARD.

CO. FAIR GROUP HEARS REPORT ON GOOD YEAR

Nearly 100 Men Present at Successful Meeting Tuesday Night

GATE AND GRANDSTAND RECEIPTS SHOW GAIN

Frank Hardisty, E. O. Peterson, Toomey Named on Board

A greater appreciation of the problems confronting the management of the county fair, together with a better understanding of the progress the fair has made in recent years resulted from a well-attended dinner meeting at the Palm Garden Cafe Tuesday evening that preceded the annual meeting of the Pennington County Agricultural society, sponsor of the fair.

Present at the dinner were nearly 100 persons, including members of the county board and city council, as well as farmers and members of local civic groups.

In the annual business meeting reports covering the successful operation of the 1941 fair were submitted by George M. Wilson, secretary, and E. O. Peterson, treasurer. The election of three directors resulted in the retaining on the board of Frank Hardisty and E. O. Peterson, and the naming of Cal Toomey to succeed O. C. Paulson.

Gate and grandstand receipts at this year's fair were reported at $7,696.75, well above the 1940 figure, while the carnival and concessions yielded $2,362.52. Major items of disbursements included music and attractions, $4,207.46; premiums, $1,840.25; prizes, [illegible]; labor, $1,114.07; and advertising, $631.84.

Treasurer Peterson reported that as soon as the state appropriation of $1,500 is received, the mortgage debt of the association will be reduced from [illegible] to $2,000, which will leave a cash balance of approximately [illegible] with which to start the coming year.

S. E. Hunt, president of the association, was in charge of the dinner program, which opened with a discussion by W. R. Dahlquist, board member, of the financial outcome of the 1941 fair. He cited figures showing the steady growth of gate and grandstand receipts in recent years.

Robert J. Lund, who served for many years as secretary of the association, discussed the program of improvements carried out on the fair grounds during the past 12 or 15 years, saying that they represented an aggregate investment of more than $12,000.

This Thanksgiving finds our country in a state of verbal turmoil. Seems that we can't agree among ourselves on anything. This is not a complaint. On the contrary it is a thought that gives us considerable satisfaction on this annual occasion for being thankful. There are very few places left in the world where people are permitted to disagree verbally. That's the thing we are fighting to retain. It may become necessary for us to relinquish that right for a while in order that we may preserve it. On this occasion we are extremely thankful that we still have it.

There are no startling developments in the news from the war fronts these days and that means that something sensational is in the making again. Big news of the week was our cancellation of our neutrality laws which pleased us particularly because the action was so displeasing to Herr Hitler and so encouraging to the nations that are resisting him. In the meantime the Japs are stalling for time and probably a little uncertain what they should do, afraid to risk a war and at the same time unwilling to abandon their program of conquest. A few years ago any one of several things that happened during the past week would have justified headlines down to the fold but in these days of super-exciting things the week has been uneventful.

Local Red Cross officials are well satisfied with the results of their annual drive for memberships to date and express the hope that Pennington County will go over the top again this year. We hope so too for certainly this is one organization that deserves all possible support under present conditions. We don't know of any organized charity that operates more efficiently or that serves a more worth while purpose.

To the organization that sponsored the show and to the merchants who provided for the free admission of the army of children who attended the Shrine Circus, a round of cheers. It was a nice piece of work that deserves an encore.

Among the things we have heard no complaints about during the past week is the weather. On the day before Thanksgiving many farmers were getting caught up on their fall plowing. That just about tells the whole story.

Many of us have become impatient with President Roosevelt because he has not dealt more firmly with some of the labor organizations that have delayed defense production by striking for demands that to most of us seem unreasonable. Well there probably are two sides to the argument and while the President may properly be criticised for some of the things he has done, or has failed to do, it must be admitted that his policy is not entirely without merit. He now faces the difficult problem of dealing with a mine workers' strike. He has no authority to force the miners to go to work. He can protect those who will work, and he no doubt will do this, but there still is the problem of getting the co-operation of the great mass of striking miners who no doubt believe that their demands are reasonable. Because of his sympathetic attitude toward this group, which he has demonstrated so many times in the past, he is now in a better position to ask their co-operation. That he still has the good will of a large portion of the individual members of the unions he must now throttle was proven this week when the CIO, against the wishes of John Lewis, went on record approving the foreign policy of the administration. That was an important concession for the union members to make in the thick of a crucial battle with that administration. Whether the President has delayed too long in putting a stop to strikes in the defense industries is a question that will be determined not so much by what has happened but rather by what happens from now on. There is a possibility that he has been more right than wrong.

The major construction project of the year got under way yesterday when excavation was started for the new Hartz building on Horace Avenue at Second Street. It tops the list of improvements because of its size for one thing but chiefly because it will give the business section of the city a transformation, extending the retail zone to an area that in the past has been useful mainly for parking. The building will not be completed this year but the late start this fall assures an early start next spring and brightens the prospect for next year's activities.

And while we are on the subject of drives for funds we are glad to throw in a plug for the sale of Christmas Seals. This is not a charity in the sense that it is a contribution to aid others. When you buy Christmas Seals you are buying protection for yourself because your contribution will be used to combat a disease that threatens you. It is encouraging to know that substantial progress has already been made in the control of tuberculosis and that leaders in this fight now look forward to the time when the plague can be eradicated. But that time is a long ways ahead of us and before the war is won a lot of battles will have to be fought. The money you spend for Christmas Seals will help maintain the necessary struggle.

EVENING CLASSES HELD AT PLUMMER SCHOOL

The Plummer evening school classes were resumed for another year on Friday evening. The first class was well attended. The following were there: Mr. and Mrs. E. R. Groom, Mrs. Helmer Mahla, Robert Yde, Fredolph Swanson, William Starken, Carl Quam, George Hesse, D. E. Ostby, Mr. and Mrs. Arthur Halle, and five school board members.

The topic which was discussed during the first meeting was the Livestock Situation for the year 1942. This was somewhat of a prediction as to what the next year would hold in store for the livestock producer but all are agreed that it does look rather favorable.

The second meeting was held on Wednesday evening. The eleven remaining meetings which have been scheduled are as follows:

Feeding Dairy Cows for Increased Production, Nov. 24th; Improvement of livestock through breeding, Dec. 1st; Motion Picture Show, Dec. 8th; Mineral hunger in livestock and its prevention, Dec. 15th; Growing Hybrid Corn in this locality, Dec. 22nd; Legume and Grass Mixtures for hay and pastures, Jan. 5th; Growing soybeans in this locality, Jan. 12; Motion Picture Show, Jan. 19th; Cold Storage, Jan. 26th; Growing Small Fruits in this locality, Feb. 2nd; Results of Crookston Expt. Station on crops, Feb. 9th.

Invitation is gladly extended to all farmers in the Plummer vicinity to attend these meetings and join in with the discussion.

Miss Lucille Felder, senior student nurse at St. Mary's hospital, Duluth returned Wednesday after a week's stay at the home of her parents, Mr. and Mrs. Theo Boulke.

"An appreciated Christmas gift for that home town boy in army service would be a subscription to *the Great Family Journal.*

Bank clearings in Thief River Falls in October were greater than in either Crookston or Bemidji, both larger towns. Sounds like brisk business here.

Author Sinclair Lewis, who recently produced a play, "Good Neighbor", is being sued for divorce. Maybe he was too good a neighbor.

This and other towns might well prepare to receive an influx of jobless people when the defense industries finally shut down.

The time of year has come when we no longer hear the greeting, "Is it hot enough for you?"

The British people had reason to observe Thanksgiving Day last Thursday, when Congress repealed the neutrality act.

This is a good time for youngsters to remember that rubber ice has a snapping point.

Judging by current rumors, the two Harolds don't seem to be on the best of terms—meaning Governor Harold Stassen and Congressman Harold Knutson.

Quoted sermon—"The harder I work, the more good luck I seem to have".

Our office pal rises to question the longevity of poultry mentioned in a classified ad in the Times last week, which offered for sale "75 year-old chickens".

A turkey, a colleague points out, isn't dressed until it is denuded of its covering. Somewhat, it seems, on the same order as some of the movie ladies.

LEADS BIBLE CONFERENCES

Rev. V. L. Peterson of the First Baptist Church conducted Bible Conferences at Virginia, Chisholm, and with Dr. Tapper of the Bethel Baptist Church of Duluth last week, returning home Monday.

HIGHLANDING

Mr. and Mrs. Alfred Hammarsten, Joe Schisshoffer and Mrs. Wm. Vaughan attended the leader's training meeting for National Defense on Tuesday P. M. The meeting was conducted by Carl G. Ash, county agent of Polk Co., on poultry. Meetings will be held throughout the county on Tuesday Nov. 25th.

Larry Lee Ellingson and Mrs. Wm. Vaughan celebrated their birthdays at the Leo Ellingson home on Thursday. A delicious lunch was served the guests by Mrs. Ellingson. Present were Mrs. Andrew Ellingson, Mrs. Ray Ellingson, Mrs. Grace Pauline and Mrs. Vaughan.

Gunnuf Gunstenson transacted business in Fisher on Saturday.

The Sigurd Sigurdson family moved into their new home, the old Davis farm east of Highlanding, on Monday.

Mrs. Walter Johnson visited her sisters, Mrs. Martin Troland and Mrs. Orlando Bishop in Thief River Falls on Saturday.

Mrs. Henry Hjelle who has been on the sick list the past week is much improved.

Mr. and Mrs. Avlon Johnson and Mr. and Mrs. Lewis Thompson were among the guests who helped Mr. and Mrs. Ole Ihle of Thief River Falls celebrate their 40th wedding anniversary.

A farewell party was given at the Club House in Highlanding Thursday night for Carl Johnson and Oluf Dahlen who are returning to camp after enjoying their furloughs at home. The guests were served a delicious lunch and dancing was the diversion of the evening. All report a very enjoyable time.

Mr. and Mrs. Anton Johnson, Mr. and Mrs. Andrew Fimrite and Mr. and Mrs. Lewis Thompson spent Friday evening at the Wm. Vaughan home.

Looking Backward

1931—TEN YEARS AGO

At the annual meeting of the fair association, Emil Griebstein, H. S. Dahlen and C. G. Hillard were re-elected to the board of directors.—Otis L. Wold became proprietor of the Riverside Grocery.— Rev. R. M. Fjelstad was elected president of the Thief River Falls circuit of the Norwegian Lutheran church.—Fifty carloads of turkeys were shipped from this city in November.—Sam L. Hauge of Bagley succeeded the late Paul Hanson as Land O'Lakes field man in this district.—Mrs. A. M. Campbell left for a visit with her mother in Minneapolis.

1921—TWENTY YEARS AGO

A. Holzknecht, Hadrath, Kiland, Roy Brown, Hermanson and Irvin Carlson were members of the city basketball team.—Rev. R. L. Barackman, for six years pastor of the local Presbyterian church, resigned to accept a call from a Lincoln, Nebraska, church.—C. G. Selvig was being mentioned as a possible opponent for Halvor Steenerson in the race for Congress from this district.

Kitty's Komments

With flaming destruction striking at one of our neighbors, it makes all of us take a little more notice to that thing called fire.

Even with the utmost precaution fire can happen and does, but there are measures we can take to help prevent fire to a great extent.

How many of you folks have given your chimneys a good cleaning? That with a thorough inspection of faulty chimneys should be an annual ritual in the fall.

Storing of oiled rags in closets is a nice way to start a fire. Spontaneous combustion is the cause of many conflagrations. Keeping your dust cloths in metal containers helps to prevent this.

Keeping matches out of the way for little folks can be the way of preventing many a fire.

The habit of striking matches to find your way around at night or to look for something in a dark closet is a poor one considering a flash light is so inexpensive and gives a much more satisfactory light.

The usage of kerosene to build a fire or to quicken a dull one is often a sure ticket to a burning death. A few pieces of dry kindling doesn't require much of an effort to have.

The habit of carrying matches in your pockets is one that should be broken unless you use the safety book matches. An ordinary match dropped from the pocket and stepped on can be ignited without a person's knowledge.

With electricity coming to many of our farms, a watchful eye to all wiring is imperative since a short can start a fire.

Yet with all precaution taken fire can happen and does, but if you have been careful, at least you won't be blaming yourself, "you might have prevented it"

GETS QUICK ACTION ON TIMES CLASSIFIED AD

Speaking of quick action from Times classified ads, Harry Brumund inserted an ad in last week's issue offering four used tires for sale. The paper came off the press shortly after 12 o'clock noon, and by 1 o'clock Mr. Brumund had turned his tires into cash.

Appreciation

The Thief River Falls Elks lodge takes this means of extending its sincere thanks to the many citizens of the community who supported the annual Elks charity carnival with their patronage last Thursday, Friday and Saturday evenings.

The delegate assembly is the policy-making body of the MTA and includes one hundred twenty-two elected delegates from the eight divisions of the association who represent the 10,000 or more members of the annual meeting. Reports of standing committees, a consideration of the findings of the educational policies commission, appointed a year ago, and nomination of president and vice president to be elected in 1942 will be the major items of business.

The donors of the scholarship according to Superintendent T. M. McCall, have through the past five years assisted twenty-five students in financing their educational training. The scholarships have been awarded to boys on the basis of achievement either in 4-H club work in their communities or on their record at the Northwest School. Recipients of scholarships this year are boys who intend to continue in farming.

The reports of accomplishment of the 1941-42 scholarship winners show that four boys have made outstanding 4-H Club records in livestock projects and one in gardening.

Donald Boutain of Red Lake Falls has carried on successfully 4-H Club projects in baby beef, gardening, potato, sheep, health and safety, and has served his club as president, vice president, secretary and reporter. Howard Ristau of Thief River Falls has specialized in sheep and lamb projects during his five years of club work and has won two trips to the Junior Livestock Show at South St. Paul.

Certain people we think of are all right in their way. The trouble is they're always getting in ours.

Booklet Explaining Job Insurance Now Available

A new workers' informational booklet was ready this week at all offices of the employment security division for general distribution to persons interested in unemployment compensation or, as it is sometimes called, "Job Insurance."

A copy of the booklet can be obtained, without cost, by calling on or writing to the local employment office at Thief River Falls, or any one of the division's part-time offices in this area.

Issuance of a new booklet was necessary because of changes made in the program by the 1941 law. A feature of this new literature is that it contains specially ruled pages which make it convenient for workers to keep a record of their earnings."

In Memoriam

In loving memory of our darling mother, Mrs. Emma Langquist who passed away to be with Jesus two years ago Nov. 20th.

She always loved to watch for us,
Anxious if we were late;
In winter by the window,
In summer by the gate.

And though we mocked her tenderly
Who had such foolish care,
The long way home would seem more safe
Because she waited there.

Her thoughts were all so full of us—
She never would forget;
And so I think that where she is
She must be watching yet.

Waiting 'till we come home to her,

PROWLER QUINTET LOSES PRACTICE SET-TO THURSDAY

All Members of Squad Given Workout in Game with City Loop Team

Harry Newby's high school Prowlers dropped an informal practice game to the city league Bjorkman's Toggery team Thursday night, losing by a 43 to 33 score. The game gave Coach Newby an opportunity to study the player reactions of the Prowler varsity candidates, and the high school mentor gave every player on his 20-man squad a chance in the scrimmage. Of the Prowlers, Lenny Lorentson, Johnny Campbell, and Bob Abbott, played the strongest games.

Red Eide and lanky Si Kompelien paced the Bjorkman's team, each connecting for 5 field goals.

Cliff Gustafson Wins Over Hoesly Thursday

Cliff Gustafson, taking advantage of his superior speed and skill, threw Mark Hoesly in 15 minutes and 45 seconds to win the main event on promoter Bill LaFave's wrestling card in the sports arena Thursday night. The fair-sized crowd saw Gustafson weaken Hoesly by tossing the Wisconsin grappler to the mat in a series of body slams, and then apply a headlock to force Hoesly's shoulders to the canvas. It was apparent that Gustafson possessed too much strength and ability for his opponent, and at no time was Gustafson in danger of losing the match.

In the rough-house match of the evening, Andy Moen, Fergus Falls wrestler, forced Alf Johnson to concede the one-fall semi-final match. After twenty minutes of hair pulling and body punching and eye gouging, Andy applied a toe-hold on his bulky opponent and forced Johnson, who was in apparent misery, to concede the match.

Earl Wampler and Rudy Patek treated the fans to 30 minutes of "straight stuff", with referee Phil White declaring the match a draw.

In the opening event on the program, "Mouse" Eftelend defeated Harry Paul Long in a one-fall match. "Mouse" getting the decision after 7 minutes and 45 seconds.

Ernie Palmer, former U. of M. wrestling captain and Big Ten light-heavyweight titleholder, and Orrin Pederson, high school athlete, wrestled 15 minutes to a draw.

One of the entertaining features of the program was a "free-for-all" in which nine local boys—Kenny Melin, Mouse Eftelend, Harry Long, Don Olson, Orrin Pederson, Marlyn Dorn, Allen Andre, Saul Larson, and Doug. Snelling—participated, with the winners, the two boys that remained the longest in the ring, being Eftelend and Olson.

COUNTY FAIR BOARD HOLDS SUCCESSFUL MEETING TUESDAY

(Continued From Page 1)

Among the major projects mentioned were the moving of the livestock and poultry sheds, the purchase of a house and of 14 acres of land, erection of a new grandstand, 4-H club building, livestock barn and two race barns, and the installation of a new entrance to the grounds this year. Projects now needed, he said, are a new grandstand and agricultural building, and water and sewer facilities.

Mr. Lund paid tribute to present and former members of the association, including Roy Lambert, H. S. Dahlen, Daniel Shaw, Herb Fuller, J. J. McCann, W. J. LaBree, Emil Griebstein, Fred Bierbauer, Cal Toomey, Carl Hillard, John Cronkhite and Albert Johnson of Warren.

Short talks were given by O. C. Paulson, who handled the carnival and concessions in recent years; County Agent Ernest Palmer, Cal Toomey, agriculture superintendent; Frank Hardisty, livestock; C. W. Vorachek, admission gate; Harry C. Woolson, poultry; Harry R. Lund, police; and Chairman Paul Roy of the county board.

Ralph Luhman, president of the Junior Chamber of Commerce, which handled the advance ticket sale for Thief River Falls Day at the fair this year, gave assurances of the continued cooperation of his organization. On motion of Dr. Edward Bratrud, members of the fair board and their aides were given a rising vote of thanks by the assemblage.

Clark Gable Is Starred with Rosalind Russell in Falls Drama Sunday

Combining the versatile talents of Clark Gable and Rosalind Russell as co-stars, "They Met in Bombay", coming to the Falls theatre Saturday midnight, Sunday, Monday and Tuesday, is a romantic melodrama keyed into international complications in the Orient.

Gable's role is cut smartly to the dictates of his outstanding work as a two-fisted man of action. Here, as a one-time British army officer, he assumes with equal nonchalance the part of a clever modern crook operating in smart circles.

Miss Russell forsakes many roles to invest her talents in the unusual part of a feminine Raffles matching her cleverness with Gable's.

Showing at the Avalon Theatre Sunday and Monday is "Here Comes Mr. Jordan" with Robert Montgomery and Rita Johnson.

Elks Charity Carnival Was Well Patronized

The third annual Elks charity carnival staged at the municipal Auditorium last Thursday, Friday and Saturday evening was well patronized by local citizens, and it is anticipated that a larger sum than last year will be netted to finance the lodge's charitable activities, Gordon Ballingrud, exalted ruler, announced this week.

Keeping Score

.... With BUCK OLSON

He Panicked the Boys

Doc Hedemark caused an uproar last week in the Commercial league. The Bratrud Clinic team was bowling a crucial series with the Hartz Bakery, and the Clinics were trailing by about 150 pins in one game when Doc picked up his ball to roll the 10th frame. Doc, who bowls in the anchor spot, was having a terrible time, with a 96 in the 9th. You can imagine how surprised the boys were when Doc, in all seriousness, turned to his team-mates and asked, "How many do we need, fellows?"

Yes, Doc surely is getting a lot of good-natured kidding about his 96 in the 9th, and his "How many do we need, fellows?"

Harry Simons' Want Ad

Harry Simons, of the Hartz office team, just a newcomer to bowling, is taking the game seriously. He's looking for a 16-lb. weight, with handles attached, so that he can do some basement practicing at home, to get his footwork in order. He's using a four-step delivery, but he takes off on the left foot, and that sends him off balance when he reaches the foul-line. And Harry thinks that some conscientious home practice will remedy that off balance stuff. Maybe he could put a handle on a 16-lb. pumpkin?

It Was Bill LaFave's Show

It's all to the credit of promoter Bill LaFave that last Thursday night's wrestling show was a success. Bill promoted and publicized the show, with very little outside assistance, and the card grossed around 250 dollars, with a net of about 65 bucks. The fans around here have a great deal of confidence in Bill's ability to promote wrestling and boxing shows, and it was this confidence that caused the patrons to attend the program.

Kornek to the Millers

Paul Kornek will be given a try-out with the Minneapolis Millers if the red tape at the border can be unravelled so that he can report to the Minneapolis club. Paul, you know, is exempt from military service because of his "trick" knee. Remember how that knee used to be bumped out of joint, and Paul carried to the dressing room, but after a few minutes of manipulation the knee would pop back in place and he would bounce back on the ice ready for some more hockey.

And speaking of hockey, it is reported that considerable hockey interest is being generated down in Crookston. They have had a couple of meetings, and the fans in attendance have agreed to support a team. But the "bug" in Crookston's plans is to find a sponsor for the club. Since the disastrous season the Crookston ball-team had this year, it is difficult to get reliable parties to sponsor and under-write the hockey team. With Chet and Emmett LeDoux, and Snooks Julien, on hand the Crookston club would have a nucleus for a fairly strong team.

Nickie Drees' Friend

Ed. Carlson invited Nickie Drees into a friendly bowling match the other afternoon, and all Ed did was to bowl a 262 score. Ed. started off with four strikes, picked up spares in the 5th and 6th, and then racked up five strikes for a 262. Nickie has already scratched Ed. off his Christmas list.

And during the same afternoon's bowling Wally Carlson rolled a 248 score. Wally "blew" the 1st frame, struck the 2nd, spared the 3rd, and then laid in seven strikes in a row.

Schmidt's Belong on Top

Judging by Friday night's bowling against the Thief River Pharmacy, Stan Cockrell's Schmidt's City Club team belongs on the top rung of the City league standings. They are tied for first place with the Hamm's outfit. Friday night, with Cockrell bowling games of 213-177-199, and Snort Langseth collecting scores of 169-208-190, the Schmidt's bowled actual pin games of 876-926-961, for a 2763 total, to take two of their three games with Pharmacy.

A Les Boyd Affair

Les Boyd took charge of the bowler's honor roll last week when he topped the three leagues in which he bowls. He rolled a 599 total in the City league, and it could as easily have been a 600 total, for he picked a couple of "cherries"; a 557 total in the Business league; and his 551 total in the Commercial league tied for that league's high.

Red Cross to Sponsor Classes in First Aid

Fred Protz, first aid chairman of the Pennington county Red Cross, announced this week that plans are under way for instruction in first aid to be given school bus drivers and all other persons, men and women, who are interested in attending the classes. Two certified doctors, Dr. M. J. O. Gullingsrud and Dr. C. W. Jacobson will be the instructors. Further details will be given later.

GOVERNOR WOULD AVERT POST-WAR FARM DEPRESSION

Stassen Discusses Problem at National Grange Meeting

The necessity of taking preparatory steps at once to safeguard agriculture in the period of readjustment after the war was stressed by Governor Harold E. Stassen this past week in an address before the National Grange, one of the nation's leading farm organizations, in Springfield, Massachusetts.

"Careful study should be made of the requirements for agricultural products in that period," he said, "and steps planned to prevent recurrence of the terrific blows to agriculture that followed the last world war. This means the planning of a program that will give to agriculture a just and fair share of the national income upon the products that are consumed within this country and a means of marketing surpluses in other parts of the world. It may well involve new types of cooperation in the handling of surpluses with other countries of the world, but it should at the same time carefully safeguard a fair share of the income spent in the American market for American agriculture."

Research must be pushed, he said, to find new industrial uses for agricultural products, opening up opportunities such as provided by the soy bean and flax fibre developments.

300 POUND PORKER MAKES EXPENSIVE MEAT

Grand Rapids. — A Bowstring settler seemed inclined to have pork for winter meat and started out in search of a live hog. He cast his eyes upon a 300 pound porker in the hog lot on the Mrs. Bessie Busler farm, a near neighbor. The said hog was appropriated without the consent of the owner. The county sheriff's office was notified and after a careful investigation the remains of the butchered hog was discovered near the home of the suspected neighbor and when confronted with "lifting" the porker he owned up, and was given a 60-day jail sentence and promised to pay the owner for the hog. In the meantime the meat had spoiled and now there is no meat for winter.

Miss Hessburg Maps Christmas Seal Plans

The St. Paul Pioneer Press pictures Miss Margaret Hessburg, Oakland Park Sanatorium nurse, who studies a giant Christmas Seal in preparation for the Seal campaign of which she is the Thief River Falls manager. The seal sale will start on November 24. Those in the picture from left to right are Miss Hessburg, Mrs. Marion Neilson of Worthington; Mrs. Jay Payne of Austin and Mrs. W. A. Grottum of Little Falls. The four attended the 35th annual meeting of the Minnesota Public Health Association in the Twin Cities.

DRIVING ON WRONG SIDE OF HIGHWAY CAUSES 23 DEATHS

October Death Toll Results in Safety Drive Getting Bad Start

Disregard of one of the oldest and best known precepts of safe driving—"keep to the right side of the road"—gave the Minnesota editors' "Save 100 Lives" campaign a disastrous start in October and resulted in the killing of 23 people.

The budget of allowable deaths, basis upon which the traffic safety committee of the Minnesota Editorial Association hopes to prevent 100 traffic fatalities during the 12-month period which began October 1, allowed for only 50 fatalities during the past month. Sixty-nine persons, however, were killed in the month's traffic mishaps, 19 over the budget allowance.

But for 14 accidents attributable to driving on the wrong side of the road—that is over or partially over the centerline — the number of fatalities would have been four under the budget allowance—and 23 people would have been alive today.

The 69 recorded traffic deaths resulted from 57 accidents. In addition to the tragedies resulting from driving over the centerline, accident reports received by the state Department of Highways showed that the next greatest factor in the toll of human life was excessive speed. Ten accidents, for which speeding was chiefly responsible, claimed 10 lives.

Five more persons died in five accidents which resulted when drivers disregarded stop signs or traffic signals.

Nine pedestrians were killed in an equal number of traffic accidents attributable solely to improper pedestrian action, that is disregard for traffic signals and the safety rules for safe walking.

RECREATION HIGHLIGHTS

The recreation program is sponsored by the city council in cooperation with the Work Projects Administration recreation leaders.

Girls' Club

Camille Dostal's O. F. D club, local girls' recreation group, is doing its part in spreading happiness and cheer on Thanksgiving Day. Each member is responsible for a part of a food basket to be given to some worthy family of Thief River Falls. This gesture is only one of the many fine things being done by the club. Members meet every Monday night in the arena for business and social meetings.

Puppet Show

The puppet show originally scheduled for Thanksgiving Day will not be held. This move has been made, because most of the children will want to spend the holiday at home. There will be a show a week from Thursday, and all are invited to attend.

Recreation activities of the local program will be at a standstill Thursday in order that recreation leaders might spend the day with their families. However, on Friday, when school is not in session, activities will be available all day. The craft shop, puppet theatre, handicraft room, and other parts of the program will be in full swing.

NORTH

Don't forget 4-H members, you are to meet this Friday evening at the hall. There will also be election of officers.

The pupils in County Line school were taken to town Tuesday so they could enjoy the Shrine Circus.

Mrs. Ranum has received word that her brother, Art Olson, has left the hospital and that his wife has returned home. We hope he too can soon come home.

Mr. and Mrs. C. Klefstad have moved to Thief River Falls to live and on Sunday they were social callers at the Glen Olsons. Mr. and Mrs. W. Jablinske were there also.

The Steiner Community Club will dedicate their new hall Friday evening, Nov. 28. Everybody welcome.

1,406 ARE SEEKING 10 STATE HIGHWAY PATROL POSITIONS

Class of 45 to be Selected Following Written Examinations

Kenneth C. Pennebaker, state civil service director, this week was completing preparations to give, on Nov. 22, written examinations to 1406 persons who aspire to jobs on the highway patrol.

All but about 100 of those who filed applications will be admitted to the examination rooms. Admittance cards were sent to all except those who obviously did not have the required minimum qualifications. The examination was announced on October 10 with November 5 as the deadline for filing applications.

Those who survive the written test will be given a physical and oral examination and of those then having the best averages, a class of 45 will be selected to attend a training school. This will be conducted by the highway department, under Elden Rowe, chief of the highway patrol service.

After completion of the training course, the names of the highest 40 applicants will be placed on the civil service register and about 10 appointments will be made immediately.

Examinations will be written at St. Paul, Minneapolis, Duluth, Hibbing, Bemidji, Fergus Falls, St. Cloud, Rochester, Mankato and Marshall.

Eckhlund Post News

By G. Schilbred, Commander

The Armistice program at the Lincoln High, as well as the Legion Auxiliary banquet banquet in the evening at the Auditorium, are now past history. Both were well attended, and the committee in charge deserve great praise.

The Elmer J. Eckhlund post, still lack a few members to get "over the top". Your commander had hoped to reach this goal before the Armistice celebration; but there still are some service men, who seem to like to be tardy.

The Legion year starts Oct. 20th, so please bear that in mind, and hurry up with your dues, and let the adjutant have the pleasure of reporting the post over at the next meeting.

Talking about meetings. Do not forget to attend. The post has a big program; but the officers can not do much, if the members do not show up, and voice their opinions.

Remember it is your post, and your duty to be present and voice your ideas, so we can learn what you want, and carry out your mandate.

What has become of all our past commanders? Have they lost all their vim, vigor and vitality after fulfilling their term in office? We need your advice, you have the experience. Come out, and continue to serve in your advisory capacity.

Every former service man, who served in the armed forces of the United States, between April 6th 1917 and November 11th, 1918, should be a member of the American Legion. It is your special privilege, and your duty to be an active member.

So quit your grumbling, come out and join in with your buddies.

Let us go! Carry on, For God and Country!

NOTE INCREASE IN JOB PLACEMENTS IN LOCAL OFFICE

Employment Office Places 158 Workers in October, Says Hjolander

Nearly three times as many persons were assisted in finding employment by the local office of the Employment and Security Division at Thief River Falls together with the itinerant offices at Hallock, Roseau, Warren, and Red Lake Falls in October of this year, compared to October 1940, it was reported today by C. J. Hjolander, manager of the Thief River Falls office.

The offices placed 158 workers, in comparison to 53 in the corresponding month a year ago, the manager said. A large increase is also shown for the entire six months' period ending in October, compared to the corresponding period of 1940. The number placed during this period in 1941 was 996 compared to 441 in 1940, a difference of more than two to one.

In the Thief River Falls area the October placements of 158 compared to 224 in September of this year. New claims for unemployment compensation increased from 18 in September to 30 in October. They were substantially lower, however, than a year ago when 72 new claims were received in October. A similar decrease is shown in the number of initial claims for the last six months which numbered only 145 compared to 338 in the corresponding six months of 1940, a decrease of 57.0 per cent. There also was a large drop in continued claims for benefits over the six months' period.

The Thief River Falls office, Mr. Hjolander reports, has placed 50 men with the Lockheed Aircraft Corporation and the Vega Airplane Company in their California plants. The office has received applications and given Lockheed tests to approximately 475 individuals. Many of these are expected to receive employment in the aircraft industry.

PURSE STOLEN IN JUNE, 1940, RECOVERED NOW

Winona. — While some small boys were checking upon a dead squirrel in a tree, one of the boys discovered something partly buried at the base of the tree. Some of the contents, including a fountain pen, a house key and some make up articles remained in good condition; but the purse had rotted.

The eighteenth of November is quite an anniversary in the lives of Mrs. Anna Brorby and Mrs. Gunder Olson (Pearl Brorby). Thirty-seven years have passed since they came out on the newly opened reservation to start the winter with a one and only building, a little barn in the wild and lonely country. It was eleven o'clock at night, a bright moon lit the way, no road to follow, just prairie and swamp, and the reflection of countless prairie fires on the heavens. It must have been a weird and exciting journey. Yet the weather was mild with no snow and when they reached their destination, the barn which Mr. Brorby had built in the summer, they retired for the night with doors standing open and bright moonlight shining in.

Ernest Olson who for the past six months has been employed at Dutch Harbor, Alaska is visiting with his mother, Mrs. Anna Olson and brother, Myles. Ernest was employed operating one of these rock crushers and had received rather the unique name of "sandman" from the little children up there.

Thanksgiving

The whole house permeates the scent of spices, warm and delicious from a busy kitchen. An oven opens and the rich fragrance of roasting turkey with its complement of sage and onion dressing wafts to hungry beings.

A half an hour more and then a gleaming white table covered to overflowing with all that's good invites the family to partake.

Mother and father, the children and grand-children are seated around the long table with bowed heads as father gives the blessing for the abundance of food.

Mother unconsciously looks at a vacant place. "Yes, Mom, one is gone from your table today."

Her thoughts are with a stalwart son who is having his Thanksgiving feast at some army camp so far away.

But still there is so much to be thankful for. He is still at home in our own country, he can still partake of the abundance of food our U. S. has to give, he hasn't yet been in the real of the blood of battle. Thank God for that!

And the rest of us who haven't the heartbreak of sons in an army camp, let's give thanks for the mothers and fathers who have.

Let's offer our thanks for a nation who is willing to offer sacrifice to be able to keep that which we have enjoyed for so long, our own liberty, our own private domain, our homes, our own business, our own religion, our own work without the restraint of an iron hand ever clenched with the threat of death.

We enjoy so much and have for so long that it has become common place to us, and it doesn't seem like a great deal, but if ever we were to lose it, we'd find we'd lost everything.

Dear mother, who looks at a vacant place by a Thanksgiving table, we are thankful America has mothers like you!

The insurance you buy tomorrow does not cover today's loss. Then why not call on us and talk things over?

MINNESOTA HISTORICAL SOCIETY

AAA CHA[illegible] CITES COUNT[illegible]S RECORD IN 1941

Reports $62,166 in Conservation Checks Received to Date

$85,222 BORROWED THRU CROP LOANS

107 Farmers Report Losses on 1941 Crop Insurance Policies

Pennington county AAA committeemen reported a successful year in the 1941 AAA program and a good start on the 1942 program as announced by the county chairman, Carl R. Anderson.

Pennington County was one of the first counties in northwestern Minnesota to receive payments for their 1941 participation and to date have received 608 checks totaling $62,166. This payment represents approximately 40 per cent of the total payment to be received. Mr. Anderson states that over 70 per cent of the 1941 applications for payment have been signed by farmers who have cooperated and these papers have been submitted to the state AAA office for payment.

The commodity crop loan program which will close on December 31, 1941 has already brought to the farmers of Pennington County $85,222 on 65,824 bushels of flax, wheat, barley, and rye. This grain is stored under the ever-normal granary program and is partly stored on the farm and partly in elevators and warehouses.

In 1941 301 policies of crop insurance were issued to Pennington County farmers by the Federal Crop Insurance Administration insuring 3,182 acres of wheat or an insured production of 27,570 bushels of wheat. This acreage represents approximately 40 per cent of the wheat acreage in the county. The premiums on this insured acreage amounted to 2,205 bushels of wheat or a cash equivalent of $1,764.

The crop insurance losses show that 107 farmers out of the 301 insured claimed losses and received the cash equivalent for 4,016 bushels which at the insured rate of 95c per bushel amounted to $3,814. This means that Pennington County farmers who complied with the crop insurance program benefited by a net of $2,040.

Next week starting December 1 community committeemen will call on farmers of Pennington County and sign up the 1942 insurance applications.

96 per cent of Pennington County farmers have already signed up for the 1942 farm defense plan. Community committeemen completed this sign up last week after contacting all the county farmers. According to the way that farmers have signed the 1942 plan it indicates that there will be a larger number cooperating next year than in any other previous program.

Taxpayers Assn. Will Name Directors Dec. 5

To enable a larger number to be present, members of the Pennington County Taxpayers association at their annual meeting Wednesday afternoon in the civic and commerce association room voted to defer the election of four members of the board of directors to an evening meeting to be held in the same room Friday night, December 5, at 8 o'clock.

A. J. Rau, president of the association, announced the appointment of special committee to assemble comparative data on real estate valuations in rural Pennington and adjoining counties for submission at the December 5 meeting. Serving on the committee will be O. L. Ihle, Alfred Longren and B. E. Hunt.

At Wednesday's session Mr. Rau submitted a report on activities of the association during the past year. He commended the city administration for the substantial cut made in the city levy for the coming year, and also called attention to a slight reduction in the county levy.

Lincoln Arnold presented figures relating to the bonded debt situation in Pennington county, stating that the present six-mill levy for purposes of debt retirement does not supply quite enough money to meet the interest charges on the debt, which last spring amounted to $598,000. Since that date 20,000 was scheduled to be paid on the principal, he added.

AVALON THEATRE WILL CLOSE NEXT TUESDAY, DEC. 2

Local Manager Announces Shutdown for Indefinite Period

Thief River Falls movie-goers will be served exclusively by the Falls theatre beginning next Tuesday, December 2, when the Avalon theatre will be closed for an indefinite period, it was announced this week by Miss Dorene Gadde, acting manager, who added that Joseph Schwangler of Alexandria will arrive early next week to take over the duties of manager, representing Baehr Brothers, owners of both local movie houses.

Given as the reason for closing of the Avalon was the state law prohibiting block-booking of films, which has made it impossible to obtain enough worthwhile pictures to supply both theatres.

The only change to be made in the Falls theatre schedule is that, instead of the Sunday program being continued thru Tuesday, the latter night will be devoted to a double-feature bargain night program.

Marriage of Edna M. Gilchrist-Elvester Stromberg Solemnized

The marriage of Miss Edna M. Gilchrist of this city, niece of Mr. and Mrs. James S. Steen of Thief River Falls, and Elvester Stromberg of Park River, N. D., son of Carl Stromberg of Rosewood, took place at 8 o'clock in the Community Church on Sunday evening, November 23, with Rev. S. S. Olafsson officiating. The single ring ceremony was solemnized against a background of tropical palms and lighted tapers. Large baskets of chrysanthemums and heather were arranged around the altar.

A half hour interlude of organ music was played by Mrs. H. F. Harrison before the ceremony. Two vocal solos, "Because" and "O Promise Me" were sung by Miss Marion Swanson accompanied by Mrs. Harrison. The bridal march from Lohengrin and the wedding march by Mendelssohn were played by Mrs. Harrison at the organ and Mr. Harrison at the piano. Miss Swanson wore a formal gown of peach satin with lace insets and a shoulder corsage of pink roses and white sweet peas. Mrs. Harrison's gown was of yellow chiffon with which she wore a corsage of pink and white carnations.

The bride, who was given in marriage by her uncle, Mr. Steen, was lovely in a gown of champagne slipper satin with short full puffed sleeves and a double skirt of net. Narrow satin pleating edged the sweetheart neckline and the sleeves. The gown was styled with a long train. A tiara of orange blossoms held the fingertip-length veil and blusher in place. To complete her attire the bride wore a four-strand pearl necklace given her by her aunt. Her arm bouquet was composed of Johanna Hill roses, white pompons, bouvardia and ferns tied with ribbon of the same shade as the bridal gown.

Miss Myrtle Stromberg, sister of the bridegroom, was maid of honor, and wore a gown of rose taffeta and marquisette. Bridesmaids were the Misses Vivian Stromberg and Eleanor Steen, both of whom wore gowns of aqua taffeta and marquisette. Little Phyllis Steen, flower girl, wore aqua taffeta and net. All of the bridal attendants' gowns were identically styled with short puffed sleeves, sweetheart necklines, and full skirts, and all wore roses in their hair. Each wore a heart shaped locket given her by the bride. The arm bouquet carried by the maid of honor was fashioned of yellow roses and heather tied with yellow satin ribbon. The bridesmaids carried bouquets of Talisman roses, yellow chrysanthemums, and pink sweet peas tied with pink satin ribbon. A colonial bouquet was carried by the flower girl.

Mrs. Steen wore a street-length ensemble of black silk crepe trimmed with white. Her corsage was of Johanna Hill roses and white pompons.

Clarence Stromberg of this city, brother of the bridegroom, served as best man, and Clifford Stromberg and Ray Johnson were ushers.

About 80 guests gathered in the church parlors for the reception which followed the ceremony. The table at which the bridal party was served was centered with a three-tiered wedding cake topped with a pink basket filled with orange blossoms. Wedding bells were used as place cards and floral decorations prevailed. Members of Mrs. Steen's Ladies Aid group served. Miss Lucille Holmgren poured and the bridal party was served by the Misses Helen Holmgren, Darlene Edwards and Marion Swanson.

Mr. and Mrs. Stromberg left that night on a wedding trip, planning to arrive Wednesday at Park River, N. D., where Mr. Stromberg is manager of the L. B. Hartz store. For travel the bride wore a gold dress with a matching hat and a blue coat. The bride was graduated from the Lincoln High School in 1936 and until recently was employed at the F. W. Woolworth store here. Her husband attended the Rosewood schools and was employed at the Hartz store here for some time.

Inga Loken and George Aanstad Nuptials Take Place Thanksgiving Day

Aanstad of this city, son of Mrs. Rose Aanstad of Anoka, formerly of this city, were solemnized at 3 P. M. on Thanksgiving Day. The single ring candlelight ceremony took place in the Trinity Lutheran Church, Rev. R. M. Fjelstad officiating in the presence of about 100 guests.

A half hour of nuptial music was played before the ceremony by Mrs. Gaston Ward, who accompanied Mrs. Glyndon Thoe as she sang "O Perfect Love" immediately preceding the exchange of vows. Lohengrin's processional march and Mendelssohn's recessional march were used.

The bridal party was led by the bridesmaids, Miss Gwendolyn Smith and Miss Donna Morley, both of Crookston, who wore gowns of gold velveteen made with sweetheart necklines, molded bodices and full flared skirts. They wore matching butterfly turbans and each of the bride's attendants wore a single strand of pearls, gifts of the bride.

The maid of honor was Miss Ardis Brenne of Crookston, whose gown was of mint green velveteen made in the same style as the bridesmaids'. She also wore a matching turban. Her bouquet was of white pompons and Talisman roses. Leo Aanstad of Anoka, brother of the bridegroom, was best man. Ushers were Marvin Benson of Minneapolis, and Ernotte Hiller and Kermit Halvorson both of Crookston.

The bride, who was given in marriage by her mother, was gowned in white silk jersey fashioned with a sweetheart neckline finished with beaded embroidery trim. The skirt ended in a long train and the sleeves were full length. Her fingertip veil was held in place by a tiara of white roses, and to complete her costume she wore her mother's pearls. The bridal bouquet was of white roses.

Mrs. Loken was dressed in a gown of delft blue silk jersey. Her shoulder corsage was of Talisman roses and pink pompons.

A reception for 50 guests was given in the church parlors by the bride's mother assisted by six of the members of her Ladies' Aid circle. Mrs. H. H. Kelly and Mrs. W. K. Hoefer poured. A green and white color scheme was followed in the decorations. The serving table was covered with a white embroidered Chinese linen tablecloth. The centerpiece was a two-tiered green and white decorated wedding cake on either side of which was placed a rock crystal candelabrum holding three white tapers. Bouquets of white chrysanthemums and ferns were used throughout. Out of town guests included friends and relatives from Crookston, Plummer, Walker, and Minneapolis.

Both young people are graduates of the Lincoln high school, the bride graduating with the class of 1934 while her husband was graduated in 1929. Mrs. Aanstad received her Bachelor of Science degree from the University of Minnesota in 1940 after which she served her internship at General and University hospitals in Minneapolis. She is at present employed as a medical technician at the Crookston clinic. Mr. Aanstad was graduated from the University of North Dakota in 1936 and is employed as a salesman for the Wilson Meat Packing Co. at Crookston. He recently returned from army service.

After a wedding trip to Duluth, Minneapolis, Chicago, and the south, the couple will return to Crookston to make their home after December 1. For travel the bride is wearing a brown wool dress with matching accessories and a tan tweed coat with racoon collar.

MEANEST MAN STEALS DEAD MAN'S WOOD

Dawson—The meanest man has popped up many times, but now we believe Dawson has that creature in its midst. About a week after Gustav Olson, bachelor, died and was laid to rest, thieves came to the premises located north of highway 212, and carted away a large chest of fire wood. The chest was not an ordinary one, but a relic, a type that was used in many early Scandinavian homes. It was probably 150 years old and was brought over from Norway, having been used for many generations.

Road Costs in Minnesota Aggregate .79 of a Cent for Each Mile of Travel

Expenditures for roads and streets in Minnesota average 79-100 of a cent for each mile traveled in the state by vehicles owned in the state, according to data compiled by the Highway Planning Survey. This figure includes all outlays for construction, maintenance, interest and other current needs, but not debt retirement, for all state, county and township roads and municipal streets and alleys.

The total net direct expenditures both from road-user taxes and proceeds of property levies, averaged $51.60 in a typical year, for each vehicle owned in the state. This represents $24.21 spent by the state on trunk highways, $15.73 spent by the counties on state aid, county aid and county roads, and $11.66 spent by cities, villages and townships for local roads, streets and alleys. Expenditures by local units were not far different in rural and urban areas, being $12.30 per vehicle in the townships and $11.30 in all municipalities.

Glencoe —Yams—commonly called "sweet potatoes" in the north, which are a product of the south, are being successfully raised in this northern country. Abram DeLeeuw is taking pardonable pride in several bushels of them grown in his garden. Many are the size of those that come from the southern states, but many are "whoppers". ANNOUNCE PLANS TO COLLECT NEW U.S. FEE ON CARS

Federal Use Tax on Motor Vehicles Takes Effect February 1

Collection of the recently enacted federal $5 use tax on all motor vehicles, including passenger cars, effective February 1, 1942, will be administered by the office of collector of internal revenue in the various states, according to plans approved by the bureau of internal revenue of the United States Treasury.

Present plans call for the initial mailing of application forms from the office of collector of internal revenue to motor vehicle owners in their respective collection districts about the first of the year. These are expected to be returned by motor vehicle owners with a remittance of $2.09, covering the months of February, March, April, May and June, 1942. The tax is levied on a fiscal year basis and application forms for the payment of the $5 fee for the full fiscal year 1942-1943 will be mailed about the first of next June.

Upon payment of the use tax, motor vehicle owners will receive a receipt in the form of an internal revenue stamp which, according to present plans, must be displayed on each vehicle. Enforcement of collection of the tax will be by agents of the bureau of internal revenue.

Vagrant Deer Invades Store in Minneapolis

Anthony Vellella was giving his clincher sales talk to a customer in his upholstery shop in Minneapolis Thursday.

Crash went the front door glass. A traffic-panicked deer leaped through the entry and into the midst of the conference.

Pandemonium reigned. Vellella swung a shovel, the customer ducked. The animal knocked over furniture, raced to the rear of the shop and plunged through a rear window. Later captured, the animal, a doe, was trundled off to a state game farm.

With less than a month remaining before Christmas the holiday aspect of the city will be enhanced during the coming week by the installation of festive lights and greenery on streets in the downtown district, it was announced today by E. PET DOG CAUGHT IN A SQUIRREL HOLE

Elk River.—Ranger is back and the Marcus Trask family is happy once more. Ranger is a family pet, being the constant companion of Jimmy Trask and his little sister. Two weeks ago Ranger disappeared and the children were desolate and convinced that their pal had either been killed or picked up by hunters. While Vernon Morell was hiking along the Elk river, he came upon a dog with his head wedged in a squirrel hole in a tree. Unable to free him alone he sought assistance and learned of the disappearance of the Trask dog. Marcus Trask was taken to the scene where care was exercised to make sure that the dog was not wild or dying before releasing it from the hole in the tree. When the dog was finally released it waved a weak wag of the tail to insure its rescuers that it was not wild.

RECREATION HIGHLIGHTS

The recreation program is sponsored by the City Council in cooperation with Work Projects Administration recreation leaders.

Puppet Shows

This afternoon at 4:20 o'clock "The Courtship of Hiawatha" will be staged in the arena puppet theatre along with "The Little Red Hen." Parents and children, alike, are invited to the free show. Next Thursday afternoon at the same time "Sleeping Beauty" and "The Owl and The Pussy Cat" will be produced. The puppets sell themselves to the spectator at each performance. Persons who have not been on hand for a show are especially invited in order that they, too, might take advantage of this free and educational activity.

Puppetry

Shows are the results of the efforts put forth by a number of children who take advantage of the puppet project. Many puppets and dolls are being made every day. Others are welcome to the arena to work on puppets and dolls, which make ideal Christmas gifts.

Handicraft

Lucille Thomas, handicraft leader, is in the arena upstairs afternoons and evenings holding classes. Adults as well as children are welcome in these classes. Table cloth and napkin sets, wall hangings and table cloths with potato block printing, hot pads, stuffed toys, and Christmas decorations are a few of the craft articles now being made. Many of them serve as excellent gifts.

O. F. 2 Club

The O. F. 2 Club, local girls' recreation group under the direction of Camille Dostal, met at the arena Monday night of this week along with their guests for a social evening. Social dancing, games, and lunch were on the fun menu for the children. Mrs. Dostal and Faythe Nelson supervised the activities. Club members attending the party included Ariane Eide, Katherine Sagmoen, Grace and Irene Forsberg, Sue Prichard, Wanda Reieragaard, Shirley Simonson, Grace Michalsky, Helen Amundson, Donna Mae Tweete, LaVonne Prugh, and Carol Southard. Guests of club members included Francis Koblitka, Billy and Bobby Nelson, Jimmy Magnuson, Herbert Claffy, Stanley Gibson, Corn Olson, Norman Furuseth, Manny Forsberg, Arthur Storhaug, Sonny Mattson, Ralph Long, Eddie Hulbert, and Bill McKechnie.

Miscellaneous

Many pieces of old furniture are being restored in the craft shop. Old spinning wheels are being dressed up. New desks and lamps are being made. This is just an example of the activity going on in the arena craft shop. It's open to all for repair of old articles or the making of new ones, so why not take advantage of it.—Roller skating will wind up this coming Sunday, which makes one think of ice skating. All boys interested in midget hockey ought to prepare themselves for the coming season. Midget hockey is going to be a big thing this winter.

$700,000 More Highway Projects in New Letting

Early reconstruction next year of more than 43 miles of Minnesota's trunk highway system is provided for in a November 28 call for bids issued by Commissioner M. J. Hoffman on nine roads, to cost upwards of $700,000.

Located in nine counties, including Polk and Clay, the proposed work provides for 43.4 miles of grading and gravel, 24 concrete box culverts, four bridges and the drilling of a well.

Seven of the projects will be paid for entirely out of state road funds, with the other two, one of which is on the "strategic network", to be paid for with state-federal matched funds.

Sharp Drop in Claims Asking Job Insurance in 3d Quarter of 1941

A decrease of 28.5 per cent in claims for unemployment compensation in Minnesota for the third quarter of 1941, as compared with the third quarter of 1940, was reported today by Victor Christgau, director of the state employment security division.

New claims for benefits declined from 16,625 in July, August and September, 1940, to 11,879 in the corresponding months of 1941.

Mr. Christgau also reported a 21.1 per cent drop in the total number of new claims received for the first nine months of the year, from 85,655 in 1940 to 67,560 in 1941. The change, he said, reflects improved employment as a result of the defense program and other factors.

The state now has a balance of about $26,300,000 available for payment of benefits, the director said.

Senators Taft of Ohio and Gillette of Iowa, who have opposed the administration's foreign policy, now state that they will support President Roosevelt's course in international affairs "so long as it is covered by congressional enactments." Their announcement followed the recent enactment by congress of amendments to the Neutrality Law which, for all practical purposes, repealed the law. Under the circumstances the repeal of this law was pretty much the same as declaring war. Although they were opposed to the amendments, Senators Taft and Gillette accepted the majority decision in good American spirit. Their offer of support to the President is a good example of proper procedure in a well ordered Democracy. In an emergency minorities must not only yield to the judgment of the majority but must also do all they can to promote the success of whatever course the majority has decided upon. As leaders of the minority these Senators are to be commended for their recognition of right procedure in an emergency.

Merchants have been extra liberal this year in the prizes they are offering for attendance at the Times Cooking School to be held at the Auditorium Monday and Tuesday. The merchandise that will be distributed during the three sessions has a value of more than $150. There is no admission charge and the program will be both entertaining and instructive. Figure it any way you want to, this is one deal on which you cant' lose.

The quarter of a block that will be occupied by the new Hartz building has served the city well as a parking lot and now that it is no longer available for this purpose the problem of parking cars is going to be more difficult than ever. It is a problem that will not solve itself and steps should be taken now not only to provide for present needs but also to make provision for the greater demands for parking space that will come with future development. Several things can be done to relieve the immediate congestion. The two hour limit parking zone can be extended. Vacant lots can be converted into parking lots. By proper organization more parking space could be provided at the rear of buildings, accessible from the alleys. For the long time problem the city should acquire property that will be set aside permanently for parking. The site of the Central School would serve well for this purpose and there are other areas, for instance in the Auditorium and post office blocks, that could be made available. The sooner this problem receives serious attention the easier will be the solution.

Conversations with Japan's special envoy seem to have come to an end. Secretary of State Hull has reaffirmed the administration's position which, while it recognizes *Japan's right to expand by peaceful means*, is definitely opposed to the program of expansion by military conquest. The Japs insist on their right to expand by force. As long as neither side is willing to make concessions on this fundamental difference there can be no good reason for further argument. We would not want our country to yield an inch on this proposition. By yielding today we might avert war today but in order to avert war tomorrow we would have to yield again tomorrow. Sooner or later we would have to stand our ground and fight if necessary. We might as well do that now and settle the problem in the only way it seems possible to settle a problem with our Oriental cousins.

American war equipment is getting its first severe test in the fighting that is now going on in Libya. Hundreds of our light tanks and planes have been in action several days with the outcome of the battle still uncertain. It is the first engagement with the German army in which the British have not been at a big disadvantage in equipment and a large part of the equipment used by the British in this engagement is said to be of American manufacture. Because of this fact the outcome of the struggle is of special interest to us.

When Horace Avenue was paved a couple decades ago it was laid out like a residence street, with wide boulevards. That plan presumably cut paving costs at the time and it no doubt has served its purpose well during these twenty years. Now however, in the business section, the boulevards have become unsightly and the space they occupy is needed for traffic and parking. Horace avenue, in the business section, should be widened.

Adolf Hitler seems to be in great spirits these days. The Russian army, which he has annihilated a dozen times before, is being annihilated again. The downfall of Communist Russia and the Democracies is certain. The Nazi system is going to prevail. The verbal blasts that have come out of Berlin lately have become increasingly hysterical. Can it be that he is still trying to frighten us into submission? Or is it possible that he is putting on a show for the folks at home? One very plausible reason, of course, would be to give assurance to the Japs and discourage any thought they might have of becoming sensible.

October Traffic Deaths in Minnesota Aggregate Total of 57 for Month

More people were killed in ordinary, avoidable traffic accidents in Minnesota during the month of October than were killed in all the submarine attacks upon U. S. naval defense craft and all of the commercial airline crashes in the country during the same period of time.

A preliminary study of 57 reported traffic fatalities for the month, by the accident reporting and analysis bureau of the state highway department, shows that:

Carelessness or inattention in just four traffic accidents, one in which a dance-band car and a truck hit head-on in a fog and three in which motorists crashed into moving railroad trains, brought death to 11 persons—three more than died on the U. S. Destroyer Kearney.

Add to these the death of a mother and two children in a two-car collision at an open intersection near Lake Benton, and the toll is already up to 17—three more [illegible] died in the flaming crash of the giant Minnesota airliner at Moorhead October 30.

Two aged women killed when their chartered bus left the road on a curve near Park Rapids bring Minnesota's October toll of multiple-death traffic fatalities to 19 dead in just six accidents, ten of them killed in two disastrous collisions.

In 10 of the 38 accidents involved, a driver was on the wrong side of the road. Not clear over, perhaps, but just the few fatal inches that are all it takes, over that life-saving centerline.

Approaching Station

A standard code of operating rules governs locomotive engine whistles. When an engine sounds one long blast it is approaching a station.

University Makes Plea for Study of Nursing

Minnesota women, both those of college age and those who have finished college, who wish to take some active part professionally in the national defense, have their best chance in the field of nursing, according to Miss Katharine J. Densford, director of the University of Minnesota's School of Nursing.

The School of Nursing has broadened its admission policy, not with respect to the merits of students accepted, but by admitting entering students at more times of year than has hitherto been the policy.

Both young women who wish to enter the three year course and those looking to a five year training course will be admitted at the opening of the winter quarter, just after Christmas. The school also will admit five-year trainees when the spring quarter begins at the first of April.

FARMER ATTACKED BY ANGRY BULL

Glenwood—Casper Anderson of Minnewaska township had a miraculous escape from an angry Holstein bull on his farm. He was driving his cattle from the pasture when without warning the bull rushed him and threw him to the ground, pinning one shoulder to the ground. Mr. Anderson grabbed the other horn in his free hand and attempted to twist the bull's neck so that he could get free. The animal threw up his head at the same time and threw Mr. Anderson over a wire fence which was charged with electricity. The bull charged again but when it came in contact with the electric fence it stopped. Mr. Anderson was taken to the hospital at Starbuck and while his injuries were painful he is recovering nicely and expects to return to his home soon.

Facial Wax Removes 'Mustache'

There is a facial wax on the market that costs but a few cents and that easily removes a "mustache" from a woman's face. This wax will not cause the hairs to grow back stiff. On the contrary it will decrease the growth of hairs. It is very simple to use. So ladies, don't worry about the growth on the upper lip and don't use peroxide to keep the hairs light.

SPORTSMEN'S CLUB TO GIVE PROGRAM TUESDAY EVENING

To Show Wild Life Movies; Mud Lake Refuge Manager to Speak

The December session of the Pennington County Sportsmen's club will be held in the Civic and Commerce association rooms next Tuesday evening, December 2, William Borchert, secretary, announced today. He added that the meeting will start promptly at 8 o'clock owing to the length of the program.

Carl Vogen, superintendent of the Mud Lake refuge, will give the principal talk, in addition to which there will be colored motion pictures of game bird migrations supplied by the state department of conservation, and movies of fishing obtained from the South Bend Bait company.

Following the program, a wild life lunch will be served.

Northwest Aggies Win 1941 Conference Title

The Northwest School of Agriculture football and cross country teams from Crookston brought their seasons to a close at Morris on November 8 by winning state sub-collegiate championships in both sports. The Northwest Aggie football team won conference games from the North Central and West Central Schools of Agriculture at Grand Rapids and Morris respectively and clinched the title for 1941.

Nagurski Is Headliner on Mat Card Dec. 11th

He'll Oppose Bronko

DICK RAINES

One of the country's ranking wrestlers, who will tangle with the famed Bronko Nagurski, twice world heavyweight wrestling champion, in the headline bout of a mat program arranged by Promoter Bill LaFave for local fans Thursday evening, December 11.

Bronko Nagurski, twice world's heavyweight wrestling champion, and Dirty Dick Raines, the famed exponent of the "back-breaker", will meet in the main event on the wrestling card which promoter Bill LaFave has arranged for Dec. 11. The semi-windup will feature Andy Moen, a favorite with local fans, and short, squat Abe Coleman, the powerhouse wrestler, pit the monocled Lord Albert Mills against Mark Hoesly, the young Wisconsin wrestler who appeared here a couple of weeks ago.

In meeting Raines, Nagurski will be facing one of the ranking wrestlers in the country, and a wrestler who is capable of extending the powerful Nagurski to the utmost. Dick Raines, who hails from Texas, is a colorful grappler, one of the so-called villains in the game, and in developing his "back-breaker" he has found a weapon which makes Raines a dangerous opponent. But the football-wise Nagurski, as a result of his many years as a Minnesota and Chicago Bears football star, is well able to evade the lunges of Raines, and to throw a few crushing blows of his own.

Promoter LaFave announced that the card is nearing completion and that he hopes to have Ernie Palmer and Orrin Pederson in preliminary matches, if suitable opponents can be found for the local grapplers.

Condemned murders in Utah have the privilege of choosing death by hanging or by the firing squad.

Stars in Final Game

BRUCE SMITH

Captain of the University of Minnesota football team and prominently mentioned for all-American honors, who contributed largely to the Gophers' 41 to 6 victory over Wisconsin in Minneapolis Saturday. By winning every game this season, the Minnesota team again won the Western Conference and national championships.

Only Eight Days to Go

That's all that are left before Harry Newby sends his Prowler basketball team into its first game. And the club they bump up against, the Fosston Greyhounds, with their smoothpassing and fast break, will be a fine opening-game test for the locals. The week following the Fosston game the Prowlers tangle with the eighth region champs, the Bemidji Lumberjacks. It's no wonder that Newby has been pushing the boys in practice.

While no definite line-ups have been chosen it is indicated that the make-up of the team that will face Fosston in the first game will be selected from the following players: forwards, Johnny Campbell, Lenny Lorentson, Don Berg, and Milt Rickerson; centers, Jack Melby, Bob Abbott, and Dale Hostvet; guards, Homer Matheson, Orlin Gjernes, Orrin Pederson, and Boob Powell. The Prowler "B" team will be named from the following reserve players: forwards, "Mouse" Efteland, Billy McKechnie, Billy Bye, and Glen Sande; centers, Mark Levorson and Bob Baker; guards, Bob Paulson, Don Michalsky, Bud Eide, and Gordy Prestby.

This classification of players as forwards and guards doesn't mean very much in Newby's style of play, for the boys are supposed to be capable of alternating at those positions. And too, the boys that are named to the early season varsity squad aren't a cinch to be there when tournament time rolls around. Newby stated that he didn't intend to choose the ten-man tournament squad until March, and that promotions and demotions on the varsity squad would be made throughout the season. The mentor feels that several of the younger players, immature and inexperienced now, may develop into first team material by tournament time.

I'm afraid that I'll be buying milk shakes for a couple of months if I lose all those slow wagers I've made with the Prowlers. I've picked them for a third place in the district standings; and that they will lose to Bemidji and Cass Lake; and that Cass Lake will win the regional. Lenny Lorentson and "Soup" Campbell, especially, are fed up with my touting of the Cass Lake team.

Sportsmen's Meeting Tuesday

Better make a note of the fact that the Sportsmen's club is holding a meetig in the Civic and Commerce room Tuesday night. A very interesting program has been arranged, a member of the state conservation department will show colored movies of outdoor life, and a lunch will be served.

Nagurski Here on Dec. 11th.

Promoter Bill LaFave completed an attractive holiday wrestling card when he signed Bronko Nagurski as the headliner on the program which is scheduled for the Auditorium Dec. 11th. Bill had not intended to promote another card before Christmas, but when he found that the Bronk was available and against such a first-rate opponent as Dirty Dick Raines, he hurriedly completed arrangements for the show, feeling that the fans would be anxious to get another look at the former world's heavyweight champ.

According to present plans it is hoped that the American Legion's 40 & 8 will join with the Athletic Association in sponsoring the show, with the net receipts being divided between the two organizations. With States-Dominion hockey abandoned for the year, the 40 & 8's junior hockey program will be given support by the Association, and a successful wrestling show will increase the 40 & 8's junior hockey fund by a considerable amount.

Orrin Pederson Wrestling Prospect

County agent Ernie Palmer, a top-flight wrestler in his college days, has been working out with Orrin Pederson, and Ernie states that the high school athlete is showing splendid progress as a wrestler. The well-muscled Orrin, who played tackle on this year's Prowler football team, and who's a member of the basketball squad, under Palmer's tutorage is becoming a capable grappler. Maybe promoter LaFave can arrange a match for Pete?

They're in the Canadian Air Force

George Beverly, Eddie McMillan, and Jimmy Bronson, members of last season's hockey team, are in the Canadian Air Force. According to reports, Bev is a gunner on a bomber.

Those New Backboards

By the way, they have installed those new fan-shaped backboards at the high school. Don't know, but I don't think that the new boards will increase the scoring, although they will decrease the mob of players that are usually gathered under the basket.

STATE INCOME TAX RECEIPTS IN 1941 OVER $12,750,000

State Tax Commissioner Reports Gain of Almost $2,500,000

With improvements that have been instituted in administration, receipts from Minnesota's state income tax have increased approximately $2,500,000 in the last two years, or fully 24%, G. Howard Spaeth, state tax commissioner, reported to Governor Harold E. Stassen this week.

Spaeth was put in charge of the re-organized and enlarged tax department soon after Governor Stassen took office and proceeded at once to work out a program designed to improve collection procedure and stop up loopholes through which taxpayers had escaped payment of taxes properly due. Particular attention was given to firms from outside the state doing business in Minnesota, and special efforts made to check carefully returns for back years, both on the part of corporations and individuals, and push collections.

State income tax receipts have risen from $10,295,000 in 1939 to $12,758,000 for 1941, Spaeth reported. Of the increase of almost $2,500,000, fully $1,000,000, it is estimated, came from the additional payments obtained by the drive to get in omitted or incomplete returns for previous years. The improvement in business conditions also contributed materially to the increase.

The number of returns filed increased from 157,000 in 1939 to 240,000 in 1941, representing a gain of 53 per cent.

John Brandt Reelected to Membership on Farm Credit Board, St. Paul

John Brandt of Litchfield and Minneapolis, nationally known dairyman and cooperative leader, has been re-elected as a member of the Farm Credit Board of St. Paul, *by a poll of approximately 300 farmers'* cooperatives in Michigan, Wisconsin, Minnesota and North Dakota. Announcement of his election has just come from the Farm Credit Administration headquarters in Washington, where the votes were tabulated. With 16 candidates in the running, Mr. Brandt received more votes than all the others put together. As members of the Farm Credit Board, Mr. Brandt will be ex-officio a director of the St. Paul Bank for Cooperatives, the Federal Land Bank of St. Paul, the Federal Intermediate Credit Bank of St. Paul, and the Production Credit Corporation of St. Paul. His new term of office will be for 3 years beginning January 1. This is his third term as a director, his selection in each case having been made by the cooperatives that are borrowers, and therefore are voting stockholders, of the bank of cooperatives.

Chicago Livestock Show Will Open November 29

A final tally of entries for the individual live stock classes of the 1941 International Live Stock Exposition and Horse Show, to be held at the Chicago Stock Yards November 29 to December 6, discloses a huge increase in the total number of animals listed over a year ago, the management reports.

An all-time record entry for the three breeds of beef cattle, that are the main source of supply of the nation's finest meats, has been registered by the leading breeders and feeders of this country and Canada, says B. H. Heide, secretary-manager of the Exposition.

LIGHT BULB CAUSES FIRE IN HAYLOFT

Glencoe —A light bulb which had been burning in the hayloft of the Jos W. Zich barn while fodder corn was being shredded caused a small blaze by igniting some of the corn stocks. Quick thinking on the part of Mr. Zich, and with the help of his hired man, a garden hose was attached to the water source in the barn and the fire extinguished without serious damage. Sometimes electricity proves as dangerous as the old fashioned lantern.

The volume of money changing hands here by check during the first ten months of this year amounted to $17,621,000, 20 per cent ahead of the similar figure for the like 1940 period.

October, statewide, check cashing volume registered an average gain of 20 per cent while totals for the first ten months of this year show an average gain of 12 per cent.

My Garden Project

By Dake Ayers

Dake Ayers of Norden township, last week selected by the State Horticultural society in Minneapolis as Minnesota champion 4-H club gardener, submitted the following account of his work in connection with his exhibit at the Minnesota state fair this fall:

"I plowed my garden in the fall because I learned in vocational agriculture in high school that fall plowing helps prevent cutworms. It was very interesting to note that I had very little trouble with them.

When the ground was in proper condition in the spring, I disked and harrowed it thoroughly. I had started my tomato and pepper plants in the house. When the danger of frost was passed, I transplanted them to the garden. My tomatoes are the Bison of which I save my own seed from year to year.

The rest of my garden was planted the first part of May. There was quite a heavy frost after it was up, but nothing froze as my garden is so well protected by woods. I did, however, have to replant some sweet corn which the crows pulled up. I had saved all my seed for the garden from the year before except radishes, lettuce, carrots, beets, and some flower seed.

The rows in my garden are far enough apart to make cultivating with a team and cultivator possible, so this lessened the job of hoeing by hand. I think it also helps preserve the moisture.

During the month of June we had some very cold, wet weather which made the vegetables somewhat later than they would have been otherwise.

I have many kinds and varieties of vegetables. There are string beans, baking beans, Swedish Brown Beans, shell beans, German Butter Beans, and golden wax. I also have peas, sweet corn, popcorn, tomatoes, potatoes, carrots, beets, radishes, lettuce, salsify, pumpkins, and squash. I think that many varieties make the garden project more interesting. I also have strawberries and raspberries from which we have canned many quarts this year. If the weather is favorable, the strawberries will bear this fall.

I have little trouble with insect pests except potato bugs, and I have had to spray them three times.

A large garden of this kind is a great saving at home and also a very educational project. I think more and younger club members should be encouraged to enter this project because it is a real thrill to see small, lifeless looking seeds grow into many different kinds of vegetables and fruits. I have thoroughly enjoyed my work in the garden projects and hope to have even a better garden next year.

BERTHA BANK ROBBED OF $2,717.50 LAST WEEK

Bertha—Bank robbers drilled a hole through the vault door of the bank safe and besides taking what money was found in the safe also rifled safety deposit boxes of patrons of the bank. Reports are that the yegg men took $2,717.50 from the vault. No trace of the robbers have been unearthed to date.

It's a lot better to have that run-down feeling from work than from gossip.

256 Drivers Forfeit Licenses for Drunken Driving in October

Two hundred and fifty-six motorists were barred from the wheel for a period of one year as a result of drivers' license revocations for driving while drunk during the month of October.

Total drivers' licenses revoked during the month were 274 as compared to 172 in October of 1940, the monthly report of the drivers' license division to Highway Commissioner M. J. Hoffmann disclosed.

During the month, one hundred and seventy drivers' licenses were suspended for second violation of speeding and six were revoked outright for three violations under the same traffic offense. Another 75 motorists suffered suspensions, and one a revocation, for reckless driving, and 14 more for running through stop signs and signals.

In all, 334 drivers' licenses were suspended during the month, which added to the 274 revocations makes a total of 608 motorists who lost their driving privileges for transgression against the state's traffic safety code.

Fruit Cake

Here is a marvelous recipe for a real fruit cake that is simply popping with all the goodness of Christmas. This cake, like all fruit cakes, should be made now. This recipe comes from Mrs. Walter Lendobeja who states that it is a real old English recipe called the "Tidewater" fruit cake and that she has never had a failure with it. It is delicious. Here it is—Soak 1 cup of wine (port is good) in 2 lbs. of fruit peel, 2 lbs of white raisins, ½ lb. dates, 2 lbs seedless raisins, ½ lb. figs over night. The raisins and figs are to be ground up and the dates torn into sizeable pieces. The raisins, of course may be left whole if desired. In the morning cream 1 lb. butter, add 1 lb. light brown sugar, mix good, then add 1 tablespoon molasses, 12 eggs, beaten into this mixture one at the time. Now add, alternately, 1 cup buttermilk or sour milk with 3½ cups flour that has already been sifted several times with 2 teaspoons baking powder, 1 teaspoon soda, 1 teaspoon each of cloves, nutmeg, cinnamon, and salt. Beat hard. Now to your soaked mixture add 4 chopped tart apples, the juice and rind of 1 orange and one lemon. Beat the two mixtures together and add another 3 cups of sifted flour and ½ lb. nuts. Stir good for about ten minutes. Pour into lined loaf or tube pans and bake 2 hours slowly. This sounds like a lot to put in a cake but it is every bit worth it as it makes many loaves.

The Carl Beiswenger, Sr. were honored in having their son Ted Beiswenger of Morton, as their Thanksgiving holiday guest.

The Ole Yalaviks have electric lights now too. Finishing touches were made Saturday.

Expediting heavy freight and passenger trains across the Rocky Mountains is the job of this new three-unit Diesel-electric engine. Its 4,050 horsepower is assurance against "bottlenecks" in the Rockies.

That "Bottleneck" Scare

The Defense Effort, as everyone knows, has been slowed down in spots by "bottlenecks."

As was to be expected, the peace-time production of a peace-minded Nation couldn't be adjusted overnight to the mass production of the implements of modern warfare.

But today wheels are whirling—men are working—"bottlenecks" are being blasted! American Sweat, American Genius, and American Capital are on the job!

Railroads were not called upon to fashion a *new* product as were many other industries. Their job was to produce *more transportation*—to carry a *bigger* load than *ever before*.

Besides providing for the normal requirements of the country, they were called upon—almost overnight—to transport *unprecedented quantities* of vital Defense materials. Upon their ability "to deliver" depended the *success* of the whole Defense program.

Yes, there were those who said the railroads couldn't do it. There were some, of course, who *hoped* the railroads couldn't do it.

But the railroads did do it—they are still doing it—and *nothing short of denying them what they need to maintain and operate their facilities will prevent them from continuing to do it.*

In the pursuits of normal business, or in defense industries, *not a single hour of production has been lost through any failure of the Great Northern Railway.*

Said Congressman Clarence F. Lea, Chairman of the House Committee on Interstate and Foreign Commerce, speaking recently in the House of Representatives:

"In all the world, no job is being better done today than by the American Railroads."

STABILIZATION OF EMPLOYMENT IN CITY LEGION GOAL

Commander Schilbred Picks Committee to Handle Project

Elmer J. Eckland post of the American Legion today joined a state-wide program to stabilize employment by making jobs more steady in all types of business. A committee of Legionnaires consisting of E. O. Peterson and W. E. Dahlquist will have charge of the drive here. This committee will see that every employer in the city is contacted to secure his cooperation and to provide him with data and actual case histories prepared by the research department of the American Legion Employment Stabilization service.

"Employment stabilization," Post Commander Gustave Schilbred said, "will produce three results in Thief River Falls. First, it will give more employes steady employment and regular wages; second, it will increase purchasing power, thus benefiting all lines of business, as well as the farmers in our community, and third, it will give employers a lower payroll tax rate and make it distinctly to the dollar and cents advantage of the employer to cooperate."

After each employer has been supplied with free factual data in the form of printed pamphlets, bulletins, and case histories covering similar kinds of business, a discussion group or round table is to be conducted by the Legion to assist local employers in taking advantage of the experience rating phase of the law.

Through the service, a Minnesota foundation, the Legion plans to inform the 29,000 employers in the state who pay taxes into the unemployment compensation fund, how they may reach the low rate by stabilizing employment to give their employes steady, year-round work.

While it is the aim of the commander's committee to discuss the employment stabilization service with every employer in Thief River Falls those who desire immediate details of the plan may obtain them from Commander Schilbred immediately.

Strong Demand from Consumers Favors 1942 Outlook on Livestock

While near record feed supplies on farms for 1941-42 will be partly offset by a 5 per cent increase in livestock numbers, strong consumer demand is expected to maintain price levels as high or slightly higher during 1942. Prospects for profits in cattle feeding in 1942, however, are not as favorable as in recent years, according to D. C. Dvoracek, University Farm extension economist.

Favorable factors in the livestock outlook for 1942 are continued strong domestic demand and government support of meat and wool under lease-lend and relief programs.

Hog prices will average much higher for the last three months of this year compared with 1940, while prices for the first three quarters of 1942 can hardly be expected to duplicate the rise during the same period in 1941. No sustained decline in hog prices need be expected in 1942.

Dvoracek points out that because keen demand has raised feeder prices relative to fat steer prices, cattle feeding in 1941-42 will be safest in experienced hands. Investment in permanent equipment and high priced breeding stock may not be profitable, says Dvoracek, in recommending best possible production with present herd and facilities.

Industrial activity is now at the highest level ever reached in this country. Some increase is expected during the coming year but not at as rapid a rate as in recent months. Increased consumer purchasing power has been reflected in stronger demand for agricultural products, which demand is likely to continue to improve for the duration of the war and defense effort.

TIRE TROUBLE?

Buffalo.—It cost Gilbert Mattson exactly twenty-four dollars to offer assistance to a pair of "stranded" motorists recently. Mattson on his way to work in Minneapolis at five o'clock in the morning, noticed a car parked along the roadside and two men appeared to be in the act of fixing a tire. He generously stepped out of his car to assist them. As he did so both men brandished guns and relieved him of his wallet containing $24.

RED CROSS HELPS 217,000 DISASTER VICTIMS IN 1940

Annual Roll Call Is Means of Providing Financial Assistance

Floods, tornadoes, fires and other disasters where 217,201 persons were given food, shelter, medical attention and rehabilitation assistance last year thru the National Red Cross, officers of the local chapter announced here today.

"The manner in which the Red Cross was able to answer these calls for disaster relief assistance emphasizes the need for strong membership support at Roll Call time," it was stated.

The past 12 months fortunately brought no major disasters. Yet during the year the incidence of catastrophe was such that nearly twice the number of persons received Red Cross help compared with the preceding year.

Red Cross disaster relief, a chartered obligation of the Red Cross, is extended those disaster sufferers financially unable to recover disaster losses. If a family suffers complete or partial destruction of their home, the Red Cross steps in to assist in rebuilding or repairing. Likewise, essential household goods and clothing are replaced.

STUNNED BIRD FOOLS HUNTERS

Melrose.—Two young sons of Walter Weidner went pheasant hunting recently and after bagging their limit placed the birds in the trunk of their car. They thought it strange to find one bird missing and could not account for the loss. Sometime later Mr. Weidner had occasion to open the car trunk and was surprised to see a fine live pheasant rooster strut from behind a tire in the back of the trunk. The boys concluded that the bird was not killed but merely stunned and when it came to had crawled in back of the tire. Well the limit was had after all.

Moisture-Damaged Flax May Form Deadly Poison, "U" Farm Bulletin Says

Flax seed that is damp and partly sprouted because of wet weather before threshing should be looked on with suspicion, both in the grain bin and in the local elevator. It may be poisonous if fed to livestock, and it may give off a gas fatal to man.

When a Twin City elevator worker died recently from poison gas in a flax bin, University Farm chemists analyzed the flax seed and found that it was giving off fumes of hydrocyanic or prussic acid. Enough gas had been liberated by the wet flax to be fatal.

"Persons entering bins containing flax of high moisture content or a large proportion of damaged or sprouted seeds should see to it that the space above the grain is thoroughly ventilated with fresh air, and a second person should be nearby to assist in case the person entering the bin is overcome", warns R. A. Gorther, chief in the biochemistry division at University Farm.

He says that prussic acid is one of the most rapidly acting poisons. Even gas masks are not full protection because the poison can be absorbed through the skin even when the breathing is protected.

Health Officials Start Campaign for Smallpox Vaccination in State

Health officers from all over Minnesota met at the University last Friday to discuss Minnesota's serious smallpox situation. Minnesota had the worst record of smallpox in the entire country last year these officials were told, and already in 1941 there have been 120 cases.

As a result of their discussions this week has been set aside by the state board of health and the Minnesota State Medical association as a time to urge everybody who has not been successfully vaccinated in the last five years to be vaccinated now.

Universal vaccination will remove the blot on Minnesota's otherwise top ranking record for public health, the doctors said. It will also wipe out smallpox in this state before—not after—another malignant epidemic comes along to claim lives and cause wholly unnecessary suffering and expense.

DEFENSE SAVINGS STAMP SALES SHOW BIG GAIN

Sales of defense savings stamps for October reached a total of $5,935,934.50, establishing the highest monthly total since the stamps were placed on sale last May 1, the treasury department announced Friday. This figure, compared with the $4,678,000 worth of defense stamps sold in September, shows an increase of 19.2 per cent. It marks the fourth straight month that the sale of stamps has risen.

COUNTY FARMERS TO ATTEND FARM PLANNING SCHOOL

Sessions to be Conducted in Civic & Commerce Room Dec. 2 and 9

Farmers of Pennington County will have an opportunity to take part in a farm planning school this winter, according to County Agent Ernest Palmer, who announces that J. B. McNulty, extension farm management specialist at University Farm, will conduct the school. Interest in these farm planning sessions, which aim at helping individual farmers plan their operations over a period of years to obtain highest possible returns, has grown rapidly since they were held last year in a limited number of counties.

Any Pennington County farmer, whether owner or tenant, is invited to take advantage of this service. Mr. McNulty will provide materials for farm planning and consult with farm operators individually.

Farm plans will be set up for a period of years. Among the problems to be dealt with are field arrangement for most efficient use of machinery and labor, crop rotations to meet the needs of the farm as to weed control, maintenance of fertility and maximum production for the type of soil. A suitable livestock-crop ratio will also be worked out.

With farm power and labor at a premium, good management will be increasingly important this year. Farm records have also become a necessity with the advent of farm programs, income tax returns, and new complications in the farm business. While these schools deal principally with planning the farm operations over a period of years, valuable suggestions on how to use a farm record to improve the farm income are also made.

The planning school in Pennington County will be held in two one-day sessions. Meetings will be held in Thief River Falls for two days at the Civic and Commerce Rooms on December 2 and 9 starting at 10:00 A. M. each day and continuing until 3:30 P. M. Farmers who are interested should get in touch with County Agent Ernest Palmer as soon as possible.

COUNTY AG[illegible] REVIEWS WORK OF PAST YEAR

Reveals Cooperation in Work of Various Federal Agencies

285 WOMEN ENROLLED IN COUNTY PROJECT

441 County Boys and Girls Participate in 4-H Club Work

The far-flung activities of the agricultural extension service in Pennington county are depicted in the annual report completed during the past week by County Agent Ernest Palmer, assisted by Miss Margaret Gunelson, 4-H club agent. The first half of the year beginning in November, 1940, is reviewed by Mr. Palmer's predecessor, Lester A. Lerud, who resigned April 21.

The summary of activities and accomplishments reveals that the extension service continued to cooperate fully during the past year with the various federal agencies and projects, including the Farm Security administration, the Surplus Marketing agency and the Rural Electrification administration.

As a part of the national defense undertaking, a "Food for Defense" program was successfully launched to stimulate the production of dairy products and poultry. Another project that aroused widespread interest was the making of 1,064 mattresses by 520 low-income farm families.

Other projects included the holding of 17 flax-cleaning demonstrations, the encouragement of windbreak plantings on farms, and the holding of demonstrations to encourage better livestock feeding and sheep handling. A successful ram exchange day was conducted, and a poison bait mixing program to combat grasshoppers was carried out.

A total of 21 women's home project groups were formed with 285 members, who canned an aggregate of 20,924 quarts of vegetables. Also perfected in the fall of 1940 was a county rural youth organization, which this year had 56 members.

Highlighting rural activities in the county was the work of 15 4-H clubs with a total enrollment of 441 members, of whom 411 carried their projects to completion. The clubs were directed by 25 women and seven men adult leaders, assisted by 21 girls and ten boys in a junior leadership project.

Among major 4-H activities were the annual banquet served in April by the Civic and Commerce association, and participation of county members in 4-H club week at Northwest School, Crookston, as well as the state fair and the Junior Livestock Show in South St. Paul.

Interesting motion pictures supplied by the conservation department were shown, depicting the migration of wild geese, as well as showing the habits of ducks, sharp-tailed grouse and other birds. Also presented was a film dealing with fishing in Ontario, Canada, supplied by the South Bend Bait company.

A novel feature of the lunch enjoyed at the close of the program was the serving of beaver meat, which proved to be quite a delicacy.

FSA AGENCY ASKED TO EXTEND RELIEF TO FLOOD VICTIMS

Situation Arises from Overflow of Two Rivers in Eastern Area

A meeting of county and township officials was held Tuesday afternoon in the court house to consider ways and means to provide necessary relief for farmers suffering severe losses because of floods caused by the constant overflow of Clearwater and Red Lake rivers this past season.

The meeting was called by Sen. E. L. Tungseth, who presided. He outlined several possible ways whereby some relief funds could be obtained. Paul E. Pressller, district supervisor, and H. W. Thelander, local manager of the Thief River Falls office of the Farm Security Administration were present and outlined what their agency program included for relief grants and how they could be secured.

After some discussion the meeting went on record favoring a petition to the Farm Security Administration for the designation of certain townships, as an area where flood relief should be granted to needy applicants. Even now the agency will give grants in special cases to such as have F. S. A. loans.

By designating a certain area as a territory in which larger number of relief grants are needed because of seasonal crop failure, grants would be given those in need even though they do not have F. S. A. loans. This source of relief being considered adequate to take care of the situation, the meeting was adjourned.

Among those who attended were Eddie Arveson, Ole J. Olson, William Vaughon, Christ Vad, Theo. Hyland, Alf Lokken, M. J. Anderson, Ole O. Lee, O. M. Mandt, Frank Race and J. A. Lund.

PLAN CENTRAL BUTTERMILK DRYING PLANT

Favorable Action Taken in City by Men from 20 Creameries

WILL BE LOCATED IN 1 OF SEVERAL TOWNS

Similar Plant Built at Fertile Is Now Running at Full Capacity

Plans to establish a Land O'Lakes central buttermilk drying plant to serve creameries in this section of the state were approved last Thursday afternoon at a meeting in the Civic and Commerce association rooms attended by representatives of twenty creameries.

A committee of three men was appointed at the meeting to determine in which of a half-dozen towns expected to enter bids the plant will be located. Serving on the committee are Carl Nordling of Lancaster, Mr. Wurmer of Badger and Arthur Nordby of Grygla. Invitations from the various towns are being received at the office of John Lager, manager of the Thief River Falls Land O'Lakes plant.

Among the factors which will be taken into consideration by the committee in selecting the location are good sewage facilities, favorable tax rates, accessible highways and low rates on electric power.

A similar plant established last spring at Fertile, and now running at full capacity, involved the expenditure of more than $50,000. The projected establishment will be financed to the extent of 60 per cent by Land O'Lakes Creameries, with the remaining 40 per cent to be supplied by the creameries served by the institution.

John Lager of Land O'Lakes presided at last Thursday's meeting, while also present to participate in the discussion were B. G. Norby of the Minneapolis office and P. L. Andersen, field man in District 14. Mr. Lager stated that efforts will be made to complete the plant so that operations can be commenced around the first of the year.

The Ultimate In Fine Christmas Gifts

Hudson's Bay "POINT" Blankets

The first order recorded for Hudson's Bay "Point" Blankets is on December 22, 1779. In those days Indians traded furs for goods. Short indigo lines called "points" meant prices. This 3½ "points" meant three large and one small beaver skin. Four "points" meant four beaver. Today "points" indicate sizes. 3½ "points" blankets measure 63x81 inches and weigh 10 lbs. per pair. 4 "point" blankets measure 72x90 inches and weigh 12 lbs. per pair.

On account of their special weave they cannot fray so require no binding nor stitching. Selected wools come from the four corners of the world. Wool is dyed before spinning so that the dye can penetrate every fibre. Air and sun-drying give them their distinctive freshness.

Hudson's Bay "Point" Blankets are sold singly or in pairs. When dividing the double blanket do not cut with scissors or knife. Make a cut about an inch deep on the edge and tear across by hand. Due to the special weave no stitching or binding along the torn edges are necessary.

Dry cleaning or washing are both satisfactory. For washing, select a warm, breezy day. Use pure soap flakes, lukewarm water and rinse six times, drying in the shade. Be sure to shake well before hanging.

For over 150 years the high quality and fine reputation of Hudson's Bay "Point" Blankets has continued unchanged. Colors are beautiful and they are a lasting satisfaction to those who delight in owning fine things.

Standard Colors: Camel, Scarlet, Empire Blue, Green, White and Multi-stripe.

'Cookie Tree' Is Easy to Make

A Christmas tree that looks good enough to eat, and really is, is the novel cookie Christmas tree. It's an easy tree to make, and as a table centerpiece it is sure to delight the youngsters, as well as the most sophisticated holiday guests.

Necessary equipment includes a wooden stick 9½ inches tall, ¼ inch in diameter, one end sharpened to a point; one round wooden base, 5 inches in diameter, with a ¼-inch hole in the center; one 12-inch circle of colored transparent paper; nine cardboard patterns of six-point stars, ranging in size from 10 inches to 2 inches in diameter, with a difference of one inch between sizes, and one round cookie cutter, 1½ inches in diameter.

The recipe for the cookies is as follows:

1 cup shortening
1 cup sugar
1 cup molasses
1 cup all-bran
4 cups flour
5 tsps. soda
½ tsp. salt
5 tsps. ginger
3 tsps. cinnamon
Candied cherries
Silver candies
Green-colored sugar
Almond halves

Blend shortening and sugar thoroughly, add molasses and all bran and mix well. Sift flour, soda, salt, ginger and cinnamon together and work into creamed mixture a small amount at a time. Mix well and chill.

Roll dough on a well-greased baking sheet to one-fourth inch thickness. Place patterns on dough and cut out stars. Brush with egg whites. Cut out 10 small round cookies—do not decorate these. Decorate stars with almonds, candied cherries or silver candies. Sprinkle with green sugar. Cut small hole in center of each cookie to fit over standard. (This may be done after baking while cookie is hot.) Bake in moderate oven, 350 to 375 degrees F. for 15 minutes, or until done.

To assemble the tree place stick, pointed end up, in hole of base to make standard. Place transparent paper over standard so that it lies flat on base. Pile cookie stars on standard, starting with the largest size star at the bottom. Use one or two of the small round cookies between the stars to separate them.

Smaller trees may be made from smaller stars by using skewers stuck into halves of apples or round pieces of baked cookie dough for standards.

Yule Seals to Finance Increased Anti-T. B. Projects in Counties

Increased anti-tuberculosis effort in every country in Minnesota in 1942 will result from the new plan to accredit countries for the control of human tuberculosis.

This is predicted by the Minnesota Public Health association which pronounces the plan a great incentive to the campaign to eradicate tuberculosis. Pointing out that increased effort will call for more funds, the Association in this week's bulletin urges generous purchase of Christmas Seals.

The new plan which was developed by the tuberculosis committee of the association, is adapted from the accreditation program of the veterinarians. It calls for certification of counties by the State Department of Health as they meet certain requirements, based on tuberculosis death rates and the rate of infection among high school seniors.

"The plan will be a great spur to the program of tuberculin testing high school pupils," says Dr. E. A. Meyerding, executive secretary of the association.

RED CROSS OPENS DRIVE TO TRAIN CANTEEN AIDES

National Agency Seeks Half Million to Handle Group Feeding

The American Red Cross has launched a campaign to train 500,000 canteen aides to handle group feeding in event of disaster or wartime catastrophes and another 100,000 volunteers as nutrition aides to assist in the national nutrition program, Chairman Norman H. Davis announced in Washington.

The canteen aides, Chairman Davis said, will remain under the jurisdiction of the Red Cross, which has been given responsibility for emergency group feeding under the civilian defense program. They will wear the Red Cross volunteer canteen uniform. Nutrition aides will wear the uniform issued by the Office of Civilian Defense and will be assigned to limited hours of volunteer duty with local nutrition projects.

Chairman Davis reported that already 1,000 nutrition instructors have been certified by the Red Cross and that courses are underway in many chapters.

"Within a year," he said, "each instructor may train from 100 to 1,000 volunteers. Our goal is to have nutrition instruction provided in each of the 3,700 Red Cross chapters and a corps of canteen and nutrition aides established in every community."

FIVE-YEAR OLD BOY SAVES BROTHER FROM DROWNING

Sauk Centre. — Donald, five-year-old son of Mr. and Mrs. Pat Thornbloom, saved his little two-and-a-half-year old brother Jimmy, from a watery grave last week. The boys went out on thin ice on the city park pond. They broke through the ice and as Jimmy was unable to assist himself out of the icy water Donald pulled him up on the ice again and leaving him there ran for help. Adults, unable to reach the child by walking on the ice, built a bridge from the snow fence of the railroad and in this way little Jimmy was rescued from his perilous position on the ice to which his clothing was frozen. A doctor was present when the rescue was made and he ordered the boy to the hospital at once where he recovered from the cold and shock. Donald's quick call for help will long be remembered by his parents.

Farm Security Agency Urges Winter Storage of All Late Vegetables

Storage of all surplus late vegetables from the farm garden as a means of contributing to the farm economy while supporting the "Food for Freedom" drive is being urged by the Farm Security Administration among its borrowers.

"Most farmers say that home storage of vegetables is a good practice every year," Miss Dorothy F. Rau, county home management supervisor for the FSA, said. "It is especially important this year, with food prices rising and the nation demanding an over-increasing supply of food for use at home, and for shipment to the allied nations at war".

Beets, late cabbage, carrots, celery, onions, parsnips, potatoes, salsify or oyster plant, turnips, and many other vegetables can be kept in good condition throughout the winter by using the facilities that exist on the farm, with little or no outlay of cash required. Most farms have either a root cellar, a basement, an unused attic, or a large closet. Any of these places can be used, providing the atmosphere is kept slightly damp and the temperature just above freezing.

Good Poultry Feeds Important to Profits, Says 'U' Farm Expert

As Minnesota poultry raisers step into the food-for-defense picture with plans for record egg production next year, Cora Cooke, extension poultry specialist at University Farm, points to improved feeding and management as a means of increasing net income as well as total production.

In Extension Folder 103, "Feed Makes Eggs," published recently at University Farm, Miss Cooke lists ingredients of an all-purpose mash which can be mixed on the farm and used as a ration for layers, breeders and chicks. Changes in the protein, vitamin and grain feeds are indicated wherever possible to effect lower feed costs.

Use of homemade feeders to get the most from good feeds is also recommended by Miss Cooke. Complete plans and a bill of material for a five-foot feeder that will accommodate 50 hens are also featured in the new folder. Homemade feeders are economical, she says, and save much-needed defense materials.

Copies of Extension Folder 103 may be obtained from the local county agent or by writing to Bulletin Room, University Farm, St. Paul.

Urge Quick Response in National Defense Truck, Bus Inventory

Good progress has been made in the truck and bus inventory for National Defense now being conducted in Minnesota, but returns are not yet sufficient to insure complete success of the project, M. J. Hoffmann, Commissioner of Highways, said today.

Questionnaires sent to owners of trucks, busses and freight trailers ask whether the owners will be willing to lease them to a government agency in an emergency, and what seasons they most urgently need the vehicles in their own business. It is to the interest of the owner to make a prompt return whether he is willing to lease his vehicle or not, Mr. Hoffmann said. Information will be kept confidential.

Mailing of questionnaires was completed Oct. 28 and somewhat more than 40 per cent had been returned on that date. Follow-up letters must be mailed to those who do not send in replies in a very few days.

The inventory is being made in Minnesota and all other states for the highway traffic advisory committee to the War department, to provide detailed central and regional records of all trucks, busses and freight trailers in the country. With the aid of these records, plans will be developed for more effective use of highway transportation in the assembly of defense-industry materials, delivery of military and civilian supplies, relief of dock and terminal congestion, and movement of passenger traffic in emergencies.

X-RAY FINDS TB

"G-man" of the tuberculosis fight is the X-ray.

The above picture shows the great detective taking the picture of the chest of a school boy. An important agent in the Christmas Seal campaign to search out unsuspected tuberculosis in youth, the X-ray examination is recommended for all positive reactors to the tuberculin test.

"Early discovery means early recovery" as far as tuberculosis is concerned. Through X-ray examination, active disease is now being discovered long before any physical signs of the disease appear.

The Christmas Seal campaign gives everyone an opportunity to help extend this program.

RAILROAD STRIKE THREAT IS ENDED BY COMPROMISE

Substantial Pay Boost Given Workers Under Terms of Agreement

Nine hundred thousand non-operating railroad men will receive pay increases of 80 cents a day and 350,000 operating workers will receive raises of 76 cents a day under a compromise agreement with the railroads announced Tuesday by President Roosevelt.

The wage settlement, which averts a nationwide strike called for December 7, was reported to Mr. Roosevelt earlier in the day by an emergency fact finding board.

It is expected to add between $300,000,000 and $325,000,000 to the carriers' annual costs. The agreement was worked out over the week-end by the board acting as a mediating agency between union and management officials.

The settlement provides that the wage increases be raises in basic pay rates and not temporary. In a previous report, based on lengthy fact-finding hearings in Chicago, the board had recommended temporary increases totaling approximately $270,000,000, with the stipulation that they be subject to revision after Dec. 31, 1942.

The board's previous recommendations, calling for pay raises of 7½ per cent for the operating men and of 13½ per cent for the non-operating groups, were rejected by the unions. The unions originally had asked increases which the carriers estimated would cost them an additional $900,000,000 a year.

Sleep Walking

Sleep walking, nightmares, night terrors, and to a slight extent, talking in one's sleep, are signs of emotional disturbance. If sleep walking or terrors occur in children, their parents should ask the family physician or school principal to recommend a specialist who can clear up the emotional trouble before it becomes ingrown and difficult to adjust. Adults who talk or walk much in their sleep should also consult a specialist.

Watching the Workmen

Impatiently, Mrs. Jones jerked at Billy's hand. "Come along," she said sharply. "I haven't got all day to stand here."

Reluctantly, Bill followed his mother, impeding their progress by looking back from time to time. What he was so intent on watching was the erection of a brick wall around the spacious lawn of a large new house in the neighborhood. Row by row the bricklayers were deftly slapping on a bit of mortar, placing a brick, and slicing off the surplus mortar. It was a scene calculated to absorb any small boy; the workmen, wielding their tools with such precision, the piles of brick, the mortar-mixing board with its fascinating "pudding".

But Billy's mother's thoughts were elsewhere. She was thinking of how long it would take to cook the dinner whose ingredients she was carrying home from market. Engrossed in trying to remember whether or not she had on hand enough lard to make the apple pie she had suddenly decided on, she gave no thought to what the trip to the market meant to Billy.

Of course she had not set out with the idea of making the trip to market an educational adventure for her small son. But why not let it serve that purpose as well? By thinking of errands and walks as an opportunity to enrich a child's learning experience a mother takes on the qualities of a very good teacher, a teacher whose time she would have to pay very well for. There had probably been no other sight or happening that day that had brought as much knowledge and interest into Billy's life. Too bad he had to be hustled away from it, instead of being able to drink it all in in leisurely fashion.

In many small towns the lack of a kindergarten is deplored. By using their ingenuity, mothers can provide many of the experiences that the kindergarten teacher plans for her group. Excursions to see different kinds of work being done are among the most popular activities for young children, offering much food for future thought and imitation. How better could Mrs. Jones spend an hour than in answering Billy's questions about how bricks are made, how the men keep the wall level as it goes up, where the various materials used come from. A more profitable hour, from the point of view of educating her child, than one spent in making an apple pie! An apple pie can be made any day, but the chance to watch a wall going up may not come again right away.

To Protect Youth

"A Tuberculin Test for every high school student!"

This is the objective of the Christmas Seal program to find and prevent tuberculosis. In the above picture is shown Dr. Kathleen Jordan of the staff of the Minnesota Public Health Association. Dr. Jordan has administered the test to thousands of high school pupils in Christmas Seal school surveys to search out early boys and girls threatened by the disease.

Tuberculosis kills one out of every four young women who die from any cause, and one out of every six young men. For this reason the campaign concentrates on youth.

WHEN GIRLS GET TOGETHER

It used to be fudge that the teen-age girls would make when they assembled together at one another's homes. They still make fudge, of course. But Brownies have come to be the girls' pet. Brownies and cocoa or tea or lemonade depending on the season and the girls' tastes.

First Cousin to a Brownie

And now here's a recipe for brownie-like peanut chews that have every chance of becoming as popular with the sub-deb group as the fudge and brownies. They are called Caramel Peanut Butter Squares—you know how the young love peanut butter. Well, here's the peanut butter flavor combined deliciously with a caramel flavor. The squares as we've said are the consistency of brownies—somewhere about halfway between cake and fudge. Like brownies and fudge they're easily and quickly made.

CARAMEL PEANUT BUTTER SQUARES

2 eggs
½ cup peanut butter
2 tbsp. soft butter
1½ cups brown sugar
½ cup SIFTED all-purpose flour
½ tsp. salt
½ cup chopped nuts

Beat eggs until light and fluffy. Stir in the peanut butter, the butter and brown sugar. Then the flour and salt. Blend in the nuts. Bake 25 minutes in a slow moderate oven, 325° F. You'll need a lightly greased 8-in. square pan. Cut the cookies into 16 two-inch squares.

Also Easy to Make

Date Bars are also in this class of easy to make "squares" for impromptu entertaining. Here is the recipe.

DATE SQUARES

½ cup SIFTED all-purpose flour
½ tsp. salt
1 tsp. baking powder
2 cups chopped dates
1 cup chopped nuts
3 eggs
½ cup sugar
1 tsp. vanilla

Sift flour, salt and baking powder together, and mix in the chopped dates and nuts. Beat egg yolks until light. Beat in the sugar gradually, to blend well. Stir the flour, date and nut mixture into the egg yolk mixture. Fold in the stiffly beaten egg whites and vanilla. Spread in well greased and floured 8-inch square pan. Bake 1 hour and 15 minutes in a very slow oven, 275° F. Mark into squares or bars with a knife. Remove from pan when cool. This makes 24 squares. Dust with confectioners' sugar, if you like them that way.

Good "Keepers" Too

These are not only excellent "spur of the moment" squares, but they are excellent keeping confections, too. So if there are any left, they should be packed in a tightly covered box for "next time".

IT MIGHT BE A TURNING POINT

War news this past week is more encouraging than it has been at any time since Hitler started the invasion of Poland more than two years ago. For the first time, in all the many months of fighting, a Nazi army has been forced to retreat. Driven from Rostov by Russian soldiers and civilians, the Germans have been forced to abandon territory that required a month of hard fighting to take. This one reverse may not be of great importance from a strictly military standpoint but measured in terms of diplomacy and morale it may have far-reaching consequences.

At any rate, during the past week, leaders of the Japanese war machine suddenly decided they should continue talking to Uncle Sam and Japanese newspapers became a little less certain that their problems could be settled only by war. Hitler's difficulties may have had something to do with this change in attitude. Recent developments indicate too that Turkey has become less afraid of Axis armies. President Roosevelt's announcement that American munitions will be loaned-leased to the Turks must mean that the Turks have decided to resist any invasion attempt. Such a decision on the part of the Turks would materially simplify the problem of the British in the Near East, enabling them to concentrate their forces at other more vulnerable points. These diplomatic reversals for Hitler might be charged directly to his forced retreat from Rostov.

And still more important could be the result of the retreat on morale, bringing, as it does, discouragement to those who hope for an Axis triumph and encouragement to the nations already conquered as well as to those still struggling. It has now been proven that Hitler's war machine can be defeated. That fact brings new hope to many who long ago had concluded that resistance is futile. Considering these things, there is a possibility that Rostov might be the turning point of the war.

American troops are now stationed in South America, having occupied Dutch Guiana with the consent of the Dutch government and the governments of South and Central America. It is the fact that we have been able to land troops in South America with the consent of other South American countries that strikes us as being particularly important in this development. It proves conclusively that South Americans no longer fear us, and that is a fine testimonial to the effectiveness of the good neighbor policy of the present administration. There have been times when we have thought our government a little too yielding in the face of both insults and injuries from some of our neighbors. The present situation suggests that perhaps our forbearance in recent years is now bringing good returns.

Is there reason to be alarmed over the threat of inflation? Authorities are agreed that there is. One of them, quoted in Business Week, says, "There is a great deal of public talk in America about the menace of inflation and the necessity of avoiding it. But there is painfully little willingness to face the steps that will have to be taken to achieve that end. Public opinion is still attached to what may be called the King Canute theory of price control." If we are to safeguard ourselves from the chaos that results from inflation we must erect some real barriers against rising prices. Price control will not be popular but it will require less sacrifice than that which we will be forced to make if the present tendency toward increased costs, and the vicious circle of rising prices, is not checked. We already are moving definitely in the direction of inflation—and ruin.

Provisions of the anti-strike bill that passed the lower house of Congress yesterday are drastic curbs on labor only in the sense that some of the other proposed bills dealing with this problem are less drastic. All reasonable rights of labor are safeguarded in the measure which seems to be designed chiefly to check the activities of labor gangsters and racketeers. The legitimate interests of respectable labor organizations, as well as the public interest, make legislation of this kind not only desirable but necessary.

We have concluded that the weather is one thing that just can't be adjusted to the satisfaction of all people. Most of us, of course, would be pleased if the fine weather of the last few days would continue several weeks more. There are some who want it otherwise however. We discovered this by listening to a few youngsters complaining because they have no ice for skating. They want winter, right now, and no fooling. Well, kids, be patient. The chances are that one of these days you will have your wish.

Minnesota's football team has been rated as the Nation's best again this year. There wasn't much difference of opinion among the authorities who decided the question and so on this point there isn't much to argue about here at home. We agree we are good. But here in Minnesota we are pretty mad because Bernie Bierman has not been rated as the greatest coach. By a close margin he came in second and some of the Minneapolis scribes are really up in the air about it. To them we would say, keep your shirts on men. We agree that Bierman is tops and should be so rated. And he has been so rated by many of the nations most capable judges and with few exceptions all of them placed him either first or second. To some extent a vote of this kind is a popularity contest and griping about the decision of the judges will not change this year's result nor will it improve Bierman's chance to head the list next year. So pull in your ears you guys who speak for Minnesota through the columns of our metropolitan press. We have friends in other states who read your stuff.

CRUMBS FOR DESSERT

"Molly's the savingest woman", an old man complained of his new daughter-in-law. "She even saves bread crumbs", he added in a low impressive voice.

You see, he'd come from a farm where table scraps went to the chickens. Therefore, seeing a woman carefully hoarding bread crumbs looked like the height of frugality to him. He admitted later, when he'd had a chance to sample some of the delicious scalloped dishes and even desserts that Molly had contrived from her bread crumbs . . . that perhaps after all there might be something to that crumb-saving business.

Lots Of Crumb Dishes

Fried foods rolled in crumbs and beaten egg . . . scalloped dishes and au gratin dishes . . . as well as bread puddings, are all familiar crumb-users to all of us. Au gratin, you know, literally means "with crumbs". But there are more crumb desserts than many women seem to realize.

Bread crumbs played an important part in the old-time plum puddings of England and early America.

Some Quite Elegant Desserts

Then there are those delicious European Torten. Really quite elegant desserts some of them . . . yet here is a definition of what a torte is really supposed to be:

"Torten are cake usually containing no butter, but made rich with nuts and light with eggs. Bread or cracker crumbs usually take the place of flour."

And here is a typical torte that fits this definition to a "T".

DATE AND NUT TORTE

4 eggs
1 cup sugar
1 cup ground dry bread crumbs
1 tsp. baking powder
1 package dates (cut fine)
1 cup walnut meats (cut fine)

Beat the eggs and add the sugar gradually. Blend in the bread crumbs, which have been mixed with the baking powder. Stir in the dates and nuts.

Bake in a well greased, shallow 8-in. square baking pan for 35 minutes in a moderate oven, 350° F.

Cool and cut into squares. Serve with whipped cream or ice cream. This will make about 10 servings.

BROWN BETTY

No discussion of bread crumb desserts is complete without mention of that perennial favorite, Brown Betty. Here is the recipe:

4 tbsp. butter
2 cups stale fine bread crumbs
3 cups thinly sliced apples
½ cup brown sugar
½ tsp. cinnamon
½ cup hot water

Melt butter, add bread crumbs and stir until brown. Arrange layers of crumbs, then apples in a buttered baking dish, sprinkling each layer with brown sugar and cinnamon. Press down quite firmly. Have crumbs on top. Pour water over top. Bake in a deep baking dish, 8 inches in diameter, for 1 hour at 350° F., moderate oven. Serve hot with whipped cream or hard sauce.

More Ways To Use Bread Crumbs

Danish Apple Cake . . . Custard Type Bread Pudding . . . Friend Hannah's Quaker Plum Pudding . . . these are some of the recipes for delicious "crumb" desserts that have been perfected in Betty Crocker's tasting kitchen. If you'd like them, just send your name and address and 3c in postage with your request to Betty Crocker in care of this newspaper.

Jacobson. Members present were: Jacobson, Hellquist, Rulien, Stenberg, Sharstad, and Superintendent Bye. Absent: Larson.

KINDLY OFFICER

Up hill and down dale the speeder roared. Sixty, seventy, seventy-five and then he heard the wail of the siren all speed demons dread. He pulled off to the side of the road and resignedly awaited for the motor cop to park his cycle. Up came the officer and with a foot on the running board he pulled out his notebook and pencil.

"Give me your name, address and business and I will give you a ticket for speeding in return," was his business-like greeting.

"Okay," said the offender, "you asked for it."

"Certainly I asked for it," snapped the law, "and I intend to get an answer."

"Well," said the speeder, "my name is Beneustolzixt Hounmtixlavalob, I live on Afrontelina avenue and my business is—"

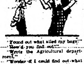
"Never mind," said the officer hurriedly, as he put away his notebook, "just you be careful I don't ever catch you again."

One Good Reason

"Just tell me one good reason why you can't buy a new car now," said the persistent automobile salesman.

"Well, I'll tell you, man," replied the farmer. "I'm still paying installments on the car I swapped for the car I traded in as part payment on the car I own now."

MIGHT TRY IT



"Found out what ailed my hogs!"
"How'd you find out?"
"Wrote the Agricultural department."
"Wonder if I could find out what ails my summer boarders? No two of 'em speak."

Case of Scotch

A Scot was engaged in an argument with a conductor as to whether the fare was 25 or 30 cents. Finally the disgusted conductor picked up the Scot's suitcase and tossed it off the train just as they passed over a bridge.

"Mon!" screamed the Scot. "It isn't enough to try to overcharge me, but now you try to drown my little boy!"

Absent Minded

Prof.—Didn't you have a brother in this class last year?
Student—No, sir. It was I. I'm taking it over.
Prof.—Extraordinary resemblance.

Vacuum

Ruth—Bob has a sovereign contempt for anybody who doesn't know as much as he does.
Hugh—I should think he would!

Then He Cashed In

Leo—Do you like girls with brown eyes?
Milton—No, I like girls with green backs.

Too Many Questions

"Don't ask so many questions, child. Curiosity killed a cat."
"What did the cat want to know, ma?"

Every Child Likes To Decorate Tree

Child development experts say that children will enjoy Christmas more if they help in getting the house ready for the coming of old Saint Nick. One of the most important duties, especially to a child, is that of decorating the tree.

A little boy or girl will love the opportunity to cut out cardboard stars, then dip them into a thick mixture of water and laundry starch and finally, sprinkle them with artificial snow. Small gourds, seed pods and pine cones can be treated in a like manner, after they've been painted with quick-drying enamel, or with aluminum paint.

Much pleasure will be derived by a child if he or she is allowed to make strings of cranberries, popcorn or small pieces of stale bread to hang on a special Christmas tree for the birds. Later children can string them about a shrub or tree in the front yard, and watch the birds enjoy Christmas, too.

Even the united efforts of these children couldn't budge the huge Christmas tree selected for their schoolyard — but they had a good time trying to help.

Santa Claus, Ind., Attracts Volumes Of Christmas Mail

About 75 years ago the people of a community in Indiana applied for a post office, asking Santa Fe as a name. There already was a post office by that name in Indiana, and since it was a short time before Christmas, the people decided to name the town Santaclause, in one word.

In 1928 the name was changed to two words, Santa Claus. Since then letters from all over the world have come in, until now it takes a force of about eight people through November and December to handle the Christmas mail with a new electric canceling machine. About 60,000 pieces a day are dispatched around Christmas.

A Santa Claus headquarters is maintained where thousands of tourists and visitors buy gifts and post cards. During the Christmas week, Santa Claus, in full uniform and long whiskers, presides.

Although this is the only town in the world bearing this name, other places have names associated with the Yule holiday.

Christmas Island, in the Pacific ocean, is so named because Captain Cook landed there Christmas day, 1777.

Five communities in the United States are named for this holiday. There is a Christmas in Gila county, Arizona, Orange county, Florida; Lawrence county, Kentucky; Bolivar county, Mississippi; and Roane county, Tennessee.

Minnesota boasts of a lake by the name of Christmas. It is located in Scott county.

JUST WAIT!

"What did your mother say when I didn't come home until late last night?"
"She said, 'Just wait until after Christmas. I'll fix him.'"

Origin of 'Anxious Seat'

The origin of the slang phrase "anxious seat," has a religious background in the custom at early protracted meetings (revivals or camp meetings) of conducting repentant sinners to the anxious seat or mourner's bench, near the altar, there to receive prayerful aid in seeking salvation.

Words of Bible Laud Virtues In 'Giving'

A little research reveals that many of the familiar quotations on the virtues of "giving" have a sound basis in Holy Scripture. Though they were not all made in connection with "giving" at Christmastime, the verses below (all taken from the Bible) provide definite clues to the origin of the many more modern "give" slogans so often heard in the holiday season.

• • •

Give, and it shall be given unto you; good measure, pressed down, and shaken together, and running over, shall men give into your bosom. For with the same measure that ye mete withal it shall be measured to you again.

—Luke 6:38.

• • •

I have shewed you all things, how that so labouring ye ought to support the weak, and to remember the words of the Lord Jesus, how He said, It is more blessed to give than to receive.

—Acts 20:35.

• • •

Every man according as he purposeth in his heart, so let him give; not grudgingly, or of necessity; for God loveth a cheerful giver.

—II Cor. 9:7.

• • •

A gift is a precious stone in the eyes of him that hath it: whithersoever it turneth, it prospereth.

—Prov. 17:8.

• • •

He that giveth unto the poor shall not lack: but he that hideth his eyes shall have many a curse.

—Prov. 28:27.

• • •

But rather give alms of such things as ye have; and, behold, all things are clean unto you.

—Luke 11:41.

• • •

And now abideth faith, hope, charity, these three; but the greatest of these is charity.

—I. Cor. 13:13.

• • •

If thou hast but a little, be not afraid to give according to that little.

—(Apoc.) Tobit 4:8.

• • •

Every man shall give as he is able, according to the blessing of the Lord thy God which He hath given thee.

—Deut. 16:17.

• • •

Now there are diversities of gifts, but the same Spirit.

—I. Cor. 12:4.

• • •

Freely ye have received, freely give.

—Matt. 10:8.

Bethlehem, N. H., Is Like Tiny Village of Nativity

BETHLEHEM, N. H.—This peaceful little "Christmas town" nestled in the New Hampshire hills bears a striking resemblance to the Holy Village for which it was named. Its location is similar to that of Bethlehem in Judea, and, strangely enough it is a village of inns and Jewish people, just like the real Bethlehem in the beautiful story of the Christ Child. This similarity exists, however, only in summer when 22 magnificent hotels, taverns and inns, nine of which observe the Jewish dietary laws, are hosts to those who come, year after year, to enjoy the beauty of green fields and purple mountains. At Christmastide the population is less than a thousand souls and most of them are natives whose hardy ancestors built their log cabins along Bethlehem streets where the palatial hotels now stand.

Men in Army, Navy Await Yule Season

For men in the army and navy the Christmas holidays are gala days. Army furlough privileges permit many men to visit their homes while active field training is suspended. Railroads last year cut their rates drastically for the men in uniforms, and it is expected the same will hold true this Christmas season.

For those who remain in the camps special Christmas dinners, religious services and holiday festivities will be arranged. The same arrangement will be made for men in the fleet, few of whom will be able to spend the holidays at home.

Red Tape

The expression "red tape" had its origin in the custom in public offices of tying up documents with red tape. Later, when it was necessary to consult the documents the tape made the work slow and disagreeable.

South St. Paul, Minn., Dec. 2, 1941—The market for slaughter steers did not change measurably from the close of last week. Quality of offerings showed a seasonable decline on Tuesday especially the supply being almost entirely short-feds. Medium to Good grades cleared at $9.50 to $11.50, according to the Federal-State Market News Service, with a few Good and Choice loads at $11.75 to $12.25. Common kinds sold at $8.00 to $9.00. Heifers were steady, Common and Medium grades going at $7.25 to $9.25, with a few Good to Choice at $10.50 to $12.00. Cows lost 25c in extremes, while bulls held steady. Vealers were weak to 50c lower, bulk Good and Choice $9.50 to $11.00, strictly Choice $11.50. Stockers and feeders were steady, most Medium to Good stockers selling at $8.50 to $9.50, with a few Good and Choice $9.75 to $10.75. Choice 405 lb. stock steer calves brought $12.25.

After holding a steady course for several days, hog prices dropped mostly 10c on Tuesday, with some sales of light lights and feeder pigs off 15c. A bulk spread of $9.70 to $9.80 took the Good and Choice 170 to 330 lb. barrows and gilts. A scattering of heavier weights turned at $9.60, but these kinds were very scarce. Most of the Good and Choice 140 to 170 lb. averages meanwhile were disposed of at $9.00 to $9.75, and Good sows of all weights bulked at $9.[illegible].

Fat lambs lost fully 25c to start off the week's trading, and quality considered, some sales were completed at mid-trading period providing practically a complete recovery, although top money remains 25c under last week's close. Other slaughter classes held a steady trend, while feeder lambs were on the strong side of listed quotations. Good to Choice native and Dakota fat lambs sold late from $10.75 to $11.00, Medium grades largely [illegible]. Choice slaughter ewes secured $5.75, and odd head of yearlings sold up to $9.50. Feeder lambs turned chiefly from $9.50 to $10.25, best making $10.60.

DICK RAINES TO MEET NAGURSKI IN CITY DEC. 11

Bronko to Face Big Obstacle In His Campaign for Comeback

MATCHES TO BE HELD IN CITY AUDITORIUM

Andy Moen to Compete with Abe Coleman in the Semi-finals

Bronko Nagurski's come-back campaign will face a dangerous obstacle next Thursday night, December 11, when the famed Bronko crawls through the ropes to meet Dirty Dick Raines in the main event on promoter Bill LaFave's star-studded holiday wrestling card. In meeting Raines, Nagurski will be staking his hopes of another match with champion Szabo, for a defeat to the Bronko would eliminate him from the ranks of the title-contenders. Raines, who hails from San Antonio, will have an 8 pound weight advantage, weighing 243 pounds to Nagurski's 235 pounds. Dirty Dick, with his body-crunching "back-breaker" as a specialty, is one of the "bad men" of wrestling, and just this past week he received a suspension, being barred from all Minneapolis wrestling rings because of allegedly brutal tactics in subduing the likeable Rudy Patek in a match there last week.

The semi-finals match, which should provide considerable entertainment, will have the 234 lb. Andy Moen meeting powerful Abe Coleman, the 5 foot 5 inch, 215 pound grappler from New York.

Lord Albert Mills, 6 foot 5 inch titled contender from London, England, weighing 230 pounds, and Mark Hoesly, 237 pound wrestler who met Cliff Gustafson in a match here recently, will meet in the card's third match.

For the fans who enjoy "straight" wrestling, promoter LaFave has arranged two special matches featuring local mat-men. In the program's opener, Orrin Pederson, promising 185 pound local wrestler, will face Paul Rosten, 180 pounds, of Plummer, while, in another special match, Ernie Palmer, former Big Ten title-holder, will come to grips with Kermit Brenna, 187 pound Holt wrestler.

The matches, which will be held in the Auditorium, with the first event billed for 8:30 P. M., will be refereed by Jack Sampson, of Wahpeton, and Harry Johnson.

Rural Schools May Get Sanitary Toilets Under NYA Project Shortly

H. W. Thelander, county supervisor for the Farm Security Administration in Pennington and Marshall Counties, has received word that the state departments of education and health are notifying all rural school boards in this county that an opportunity has presented itself by which such rural school boards can obtain sanitary privies for their schools.

These sanitary privies are in strict accordance with the standards of the Minnesota department of health and the U. S. public health service, and can be obtained from NYA projects being set up in the future for only the cost of materials and transporting into the county.

Any rural school boards that are interested in availing themselves of this opportunity and should get in touch with the county superintendent of schools or Mr. Thelander.

Prowler Quint to Open Schedule Friday Night

New Faculty Member

DELVER DALY

Native of Minneapolis and a graduate of the University of Minnesota, who recently joined the Lincoln high school faculty in the capacity of boys' physical education teacher, succeeding Chester A. Nelson.

Lenny Lorentson and Johnny Campbell, at the forwards; Orrin Pederson or Jack Melby, at center; and Orlin Gjernes, Homer Matheson or Bob Powell, at the guard positions, will probably be Coach Harry Newby's starting line-up when the Prowlers open their basketball campaign by playing the Fosston Greyhounds on the local floor Friday night. The Prowler alternates who are certain to see service early in the contest are Don Berg and Milt Reierson, forwards; Bob Abbott and Dale Hostvet, centers; Bob Paulson, Billy McKechnie, Bud Eide, and Mark Leverson, guards.

Coach Mike Lagather's Fosston team, which divided a two game series with the Prowlers last year, (losing a 21 to 19 thriller to the locals early in the season and defeating the Prowlers, 31 to 23, in a return game played on the Fosston floor) has been badly riddled by graduation, losing such stars as Russ Pearson, Howie Shimanski, and Sid Johnson; but it is reported that the Greyhounds have been building their smooth passing offense around their stellar guard, short, chunky Marvin "Porky" Thompson, and their fast-stepping forward, Russ Hagen, and that the team has every intention of handing Newby's Prowlers a trouncing.

Playing their second informal scrimmage with Bjorkman's Toggery team Thursday night, the Prowlers revealed considerable improvement in their play as they banged out a 36 to 30 win in a rough-and-tumble contest. Lenny Lorentson, Johnny Campbell, Orrin Pederson, and Jack Melby, sparked the high school to their win over the City leaguers.

Many Heart Ailments Avoidable, Says State Medical Association

Heart disease is still the gravest disease problem among Americans of mature age. It still heads the annual list of disease killers according to officials of the Minnesota State Medical association.

"There is no simple method for preventing heart ailments", the officials point out in the announcement. "But good living habits and good care for all acute infections will help greatly to cut down the premature deaths."

Over-weight and over-strain pave the way for disease of the heart, they declare. Also neglect of chronic ailments in other organs of the body. Many heart deaths could be avoided, the doctors point out also, if people with damaged hearts would learn to limit their activities to their reduced capacity.

Republican Women's Club to Pick Officers Friday

The Pennington county Republican Women's club will elect officers for the ensuing year at a meeting to be held Friday afternoon, December 5, in the Civic and Commerce association room, Mrs. J. N. News, president, announced today, urging all interested women to be present. Lunch will be served at the close of the business session.

Local Schmidt Bowlers Whip Bemidji Keglers

The local City league leaders, the Schmidt's City Club team, journeyed to Bemidji last week and, rolling a fine 2651 total, defeated the Bemidji Schmidt's team by 21 pins in a total pins match. Paul Dahl's 565 total paced the winners, while Mike Corrigan's 565 total was the high score for the match.

Doctors Issue Simple Rules to Avoid Severe Attacks of Influenza

Flu constitutes a grave challenge to medical science, according to today's bulletin from the Minnesota State Medical association's committee on public health education.

The prospects of war-time epidemics on a country-wide, if not a worldwide scale, are not to be dismissed lightly, according to the doctors; and, in spite of continuous research since the last war no satisfactory immunization process has been developed that can be relied upon to protect against a virulent surge of the disease. The thing for individuals to remember, the bulletin says, is that a few simple rules of hygiene go a long way toward protecting against bad after effects which cause the most trouble to flu patients.

The first is: go home and go to bed right away if you feel exhausted and feverish, even if you don't seem to have much of a cold.

The second is: stay in bed after you think the worst is past and you might as well get up.

The third is: call a doctor especially if you have a fever or cough.

Basketball Tomorrow Night

Don't forget that the Prowlers bust open their basketball season tomorrow night, when they play Fosston. Not much is known of the Fosston club, but I have an idea that they'll look a lot smoother in their team-play than the Prowlers. Fosston features the McMillan style of play, with short passes and nifty ball handling, and such a team always looks good, even when losing. In comparison the Prowlers will perhaps look ragged; but study the actions of the local boys, and watch their position play, and you'll see that the Prowlers have possibilities. If the boys can assimilate the stuff that Coach Newby is giving them, by tournament time the Prowlers should be tough enough.

Jung's Set Up Pin Marks

The Jung's Bakery team bowling the Narverud Cleaners in the Women's City league last week certainly took the Cleaners to the "cleaners". The Jung's bowled games of 772, 823, and 734, for a 2329 total. And that was the actual pins count. Edna Lee, captain and anchor, had games of 172-159-194, for a 525; Blanche Boyd scrambled the pins for 509 total, having games of 119-187-203; Alice Swanson with games of 192-162-123, totaled 477; Sylvia Evenson added to the Jung's total with games of 158-176-119; while Nayome Berg, the team's pilot, rolled a 151-129-95, for a 365.

He Hits the High—and the Low

Sewell Gross, maestro of the Lyle Culvert team, bowling in a City league match Friday night pounded out seven strikes in one game which, with a couple of splits and a blow, gave him a 203 game. That was the high. And then on Sunday night, in an informal game (polishing up his hook ball delivery, he called it) Sewell rolled an 81 score, having seven blows and three splits. That was the low.

The Hockey Hornets are Stirring

It's becoming apparent that the States-Dominion hockey league, for this season at least, will be in a black-out; but hockey fans will be able to watch the ice sport, for the 40 & 8 are completing plans for their junior hockey team, the Hornets. The States-Dominion could probably have operated this year, for all the clubs assert that they are financially able to support hockey. The problem, of course, was to secure capable players. Canadian restrictions are such that it is practically impossible to get hockey players across the line; and while it is said that there are hockey players available on the Iron Range, that source has been pretty well hand-picked. Rather than ice a mediocre team the local directors have decided to suspend league hockey here this winter.

But the Hornets are going right ahead getting ready for their campaign, and their prospects of "going places" are bright. Walt DePaul will coach the juniors this year, and he reports that the club has had several practice sessions, on a sheet of river ice south of town.

The 40 & 8 team directors are endeavoring to have the high school furnish an eligibility list of the boys that are playing hockey, for such an arrangement would facilitate the scheduling of games with high school teams in this vicinity.

They're Called the "Bums"

That's the name of Connie Geston's high school senior class basketball team; and they'll be playing the Prowler reserves in a preliminary game tomorrow night. I can't understand why the boys didn't call themselves the "Acorns." They're nutty enough.

Nagurski Here Again

Bronko Nagurski, Minnesota's all-time football player, and former world's heavy-weight wrestling champion, will make his second appearance in a local ring when he meets Dick Raines on promoter Bill LaFave's wrestling show here next Thursday night. Aside from the fact that Nagurski is one of the top-ranking wrestlers, it will be interesting to get another glimpse at the fellow that is recognized as being the greatest football player ever produced by Minnesota. He's the guy, you know, that they said ran his own interference. When you see him next week try to imagine yourself throwing a block at him, or meeting him in head-on tackle. It would be about like running into the Soo depot.

City Basketball Players Wanted

Duane Battelson, supervisor of the City basketball league, is in need of players to complete the rosters of the six teams in the league. The teams have secured sponsors, and now all that is required is to get the basketball minded fellows out for practice. The Auditorium floor will be used for league games and practice sessions.

Social Item

Mister Leonard Helquist and Jesse DuChamp motored to St. Hilaire Thursday night, and fulfilled a social engagement.

New Captain of Gophers

DICK WILDUNG

Of Luverne, stellar player on the University of Minnesota football team, who last week was elected by his teammates to serve as captain of the 1942 Gopher eleven.

Prepare to Distribute Yule Baskets to Needy

Representatives of fifteen local organizations which in past years have given Christmas baskets to needy families of the community last Friday afternoon attended a meeting called by Miss Margaret Odell of the county welfare office for the purpose of comparing lists in order to insure that there is no duplication in the distribution of baskets and to make certain that no deserving family will be overlooked.

RECREATION HIGHLIGHTS

Puppet Shows

"The Sleeping Beauty" and the "Owl and the Pussy Cat" will be staged in the arena puppet theatre this afternoon at 4:20 o'clock. Everyone is invited to attend these free performances. There will be no show this coming Thursday, but one week later, December 18th, a Christmas production will be shown.

Camille Dostal, puppet leader, announced that last week's show was very successful. A large crowd of parents and children was on hand. Abigail Thomas, Shirley Bowers, Arlene Eide, and Delores Anderson puppeteered last week and contributed largely to the success of the show. Doreen Welsh acted as door attendant during the show.

Handicraft

Miss Lucille Thomas, handicraft instructor, is leaving the recreation program and will not be available after Saturday of this week. However, classes will continue. All those who worked under Miss Thomas are invited to continue their work until a replacement has been made. A new handicraft leader should be working soon. The children who are working on Christmas gifts are especially encouraged to keep up the good work.

Old Toys

The arena craft shop will again be used this winter for the repair of old toys to be given as gifts to worthy families. It is expected the Boy Scouts will be out this year, as in the past, picking up toys from persons who have them on hand and are willing to donate them to a good cause. If it is more convenient, the toys may be brought directly to the craft shop, where they will receive new coats of paint, removal of dents and other general repair. People are encouraged to give all toys that are not in use or that need repair.

"Ice-Capades" Feature Minnesota-Born Star at Falls Theatre on Sunday

Sheer enchantment on ice—that is the spell woven by "Ice-Capades," which opens at the Falls Theatre Saturday midnight at 11:15 and continues through Sunday and Monday, bringing a scintillating galaxy of the world's skating champions headed by Dorothy Lewis, Minnesota-born star.

James Ellison scores in the masculine lead, portraying with finesse the young newsreel cameraman who photographs the wrong girl when assigned to cover a skating exhibition. His wrong girl proves to be such a sensation that Jimmy is obliged to run around in circles looking for the skater he thought he was photographing through a distance lens.

Jerry Colonna and Vera Vague contribute many hilarious laughs to the film, with Alan Mowbray and Phil Silvers holding up their share.

PRIORITIES HIT 177 FIRMS, 4,677 WORKERS IN STATE

Employment-Security Division Makes Survey in Minnesota

Priorities, governmental allocations of raw materials, have so affected the operations of 177 firms in Minnesota that 4,677 workers face unemployment. Of that number, 3,038 already have been laid off. An additional 1,639 will lose their jobs in the near future unless there is an adjustment in the flow of materials.

These statements summarize results of a state-wide survey just completed by the employment-security division to determine the immediate, as well as the long range, effect of priorities on Minnesota's industries. These survey data are based on questionnaires mailed to 4,764 establishments having 105,069 employees, and personal contacts with the management of 410 establishments having 69,175 employees. Thus 6,174 firms having 174,244 workers were asked to report on any priority problems with which they were confronted.

The division received reports from 2,144 firms, having 124,478 employees. Failure on the part of 4,030 firms to file reports was accepted as evidence that priorities had not yet become a problem so far as those individual establishments are concerned.

Truck and Bus Inventory in State 60% Completed

Truck and bus owners in Minnesota have done better than those in some other states in returning questionnaires in the truck and bus inventory for national defense, but a greater return is necessary to make the project a complete success, M. J. Hoffmann, commissioner of highways, said today.

Returns in Minnesota to date are more than 60 per cent. Returns in other states range from 83 per cent in Wisconsin and better than 75 per cent in half a dozen other states, down to less than 20 per cent in five states where the canvass was started late, according to a news release from Washington.

Mailing of follow-up letters to those who have not answered their questionnaires is being started in Minnesota this week.

Don't Keep Car Windows Closed Tight in Winter, Health Warning Issued

Your automobile makes a perfect incubator for colds, "flue", bronchitis, and a host of other ills, if you shut the windows tight against winter weather, says a warning from Northwestern National Life Insurance company.

The modern motorist and his passengers, says the bulletin, muffle themselves in woolens and furs, in the warmth of their living room. They dash 10 or 20 steps through fresh air to reach the car, climb in, slam the door, and make sure every window is tight as the driver turns on the heater.

Within the next two minutes they are sitting in an incubator. The air is close, warm, humid—perfect for rapid growth of microbes. If one of their number has a cold, all can reasonably expect to share it within the next 48 hours or so.

Even if none has a cold at the time, the farm moist interior "tenderizes" their nasal passages and their heavily clothed bodies, so that later exposure to outdoor weather is much more likely to cause bronchitis and associated ills.

In older cars there is often a leakage of carbon monoxide from the motor exhaust. Without adequate ventilation, this irritates the respiratory passages, and worse still, tends to dull the senses and increase the liability to accidents.

May Put on 1942 Plates Ten Days before Jan. 1

Automobile owners may replace their 1941 license plates with 1942 tags between December 22 and January 1 without fear of being arrested, according to a ruling made in St. Paul last Wednesday by Attorney General J. A. A. Burnquist.

Tire Safety Rules for Winter Driving

Two primary requirements for tire safety at this particular season of year were issued this week by W. F. Rosenwald, traffic engineer of the state highway department:

(1) It is dangerous to use tires after the thread is gone, especially if you drive more than 35 miles an hour. This is true on any wet surface, but the hazard is emphasized during the current season because of the frequency with which motorists are likely to encounter slippery surfaces due to ice or sleet.

(2) Be sure to keep your tires equally inflated. A low tire on one side will cause a motor vehicle to "wander" in one direction and requires a continuous pull on the steering wheel to hold its direction straight. Use of a standard type valve cap will assure positive sealing of the air pressure in tires regardless of the condition of the valve core and the preservation of balanced tire pressures will afford easier and safer driving.

Quartermaster Corps Official Cites Better Meals Served Soldiers

It's a far cry from the army rations of George Washington's day to the ample table spreads enjoyed by Uncle Sam's troops today. Citing two army menus separated by a span of 165 years, Capt. E. M. Burns, a native of Newfolden, made this point vividly clear when interviewed over Chicago radio station WBBM Saturday, November 29. Capt. Burns is administrative assistant to the Sixth Corps Area Quartermaster, with headquarters in Chicago.

Old records of the Quartermaster Corps, Capt. Burns said, disclose that the following was the first ration—one day's allotment for one man—issued the Continental troops: One pound of beef or three-quarters of a pound of pork or one pound of salt fish; one pound of bread or flour, one pint of milk and a quart of spruce beer or cider. Also three pints of peas or beans and a half pint of rice or one pint of Indian meal per week.

As a typical dinner served by the Quartermaster to the Sixth Corps Area troops these days, the speaker cited this menu: Roast beef with pan gravy and sage dressing; mashed potatoes, cauliflower; tomato salad with French dressing; rice custard, bread and coffee.

No Waiting Period for Job Insurance Needed for Returned Soldiers

Former soldiers who were employed during the year previous to their induction, and who now are returning to civilian life, as a rule are qualified for unemployment compensation and can begin drawing benefits immediately if they do not find jobs, it was pointed out today by Victor Christgau, director of the employment-security division.

The 1941 legislature passed amendments to the employment and security act, granting special consideration to men who find themselves unemployed at the expiration of their military service.

At the same time, the division is making a concerted effort, in cooperation with the re-employment committees of local draft boards, to place men who have no jobs to which to return when they complete their military training.

The amount of benefits payable to a returned selectee depends on the wages earned during the year just previous to induction.

Further details can be obtained at any local office of the employment-security division.

3,694 STATE RURAL CREDIT FARMS ARE SOLD SINCE 1938

George C. Jones, Conservator, Submits Report to Gov. H. E. Stassen

How much progress Minnesota has made in disposing of the farm lands acquired in its ill-fated venture in rural credits was shown in a report submitted to Governor Harold E. Stassen this past week by George C. Jones, conservator of rural credits.

Jones reported that the department has sold 3,694 farms during the past three years and that it will have available for sale less than 1,000 farms on January 1st. Of the farms sold, 854 went to former owners or children of the former owners; 1,474, to tenant farmers, and 995, to local farmers adding to their holdings or buying farms for sons or daughters. Only 371 were sold to outside buyers.

In 1936, 1937 and 1938, the department acquired an average of 1,000 farms a year on foreclosures. In 1939, acquisitions of farms dropped to 517, the report said, and to 218 in 1940. The total this year will not exceed 150. Delinquent payments amounted to $388,800 on January 1st, 1939. The total now has been reduced to $90,000. Outstanding bonded debt has been reduced $5,405,000 since January 1st, 1939, the report pointed out.

Delegates will come from Montana, North Dakota, South Dakota, Minnesota and Wisconsin to hear how their three enterprises, started from scratch in 1926, have grown from an annual total gross of $20,000,000 in 1938 to $51,000,000 in 1941.

"THE WINNING GOAL"
Here in Minnesota we take our football seriously. The Football fever hits us along in the first cool days of autumn; but it only results in a pleasant, wholesome quickening of the pulse that lasts through the colorful autumn days. We surge with pride over our Minnesota championship teams manned by home town boys from Faribault, Austin, Marshall, Milaca, International Falls, Brainerd, Bemidji, Slayton, St. Cloud, Eveleth, Chisholm, Luverne and numerous other towns.
After the game many followers of football gather to discuss the game and relax taut nerves, over a bottle of wholesome beer. One of the winning goals in life is to live happily and temperately, and the Brewers of Minnesota are proud to supply the fans with a beverage of moderation that "hits the spot" following the game. Why not try a bottle of delicious, relaxing beer after seeing or hearing the next game?

After thanking all friends and relatives, they were congratulated and a delicious lunch was served.

When to Take Bath

For social freshness the bath should be taken in the morning, to cleanse away the perspiration salts and decomposed surface fats of the night. For a good night's sleep, however, a five minute soaking in a tub of warm or hot water just before retiring is usually helpful. A cold shower at bedtime is likely to produce wakefulness rather than sleep.

Kitty's Komments

This time yearly, school children make their rounds selling Christmas Seals. As young workers for a good cause they're doing their bit. Let us do ours by purchasing from them as many Seals as possible. Let us use the real Christmas Seals for our letters and packages. They mean so much more.

Years ago my father spoke of a nephew who at the age of eighteen developed T. B. Then it was called galloping consumption. A strong lad he was, but he had a very bad cold that had left him in a weakened condition. With the knowledge and care they can have to-day the result was inevitable. The youth died.

Before research and sanitoriums the disease was known as the "great white plague", so many people succumbed to the ravages of T. B.; T. B. being the abbreviation for tuberculosis.

The little Christmas Seal is doing its bit. Let every letter and card we send this Yule-tide season bear these little messengers as a toast to good health for all mankind.

Hognosed Snake

The hognosed snake is called "puff adder" because, when disturbed, it flattens its head and neck, puffs its body, hisses fiercely. If this doesn't work, it rolls over and plays dead.

CAR DEFECTS ARE OBJECT OF DRIVE BY STATE PATROL

347 Arrested in October for Driving Cars with Defective Equipment

Everytime a car crashes anywhere on the 10,000 rural miles of Minnesota's truck highway system, state highway patrolmen try to be there to render every possible aid to the accident victims. But they are even more anxious to render that kind of aid which will prevent the accidents occurring.

That is one reason why for the past several weeks the state highway patrol has been giving especially rigid attention to those defects of the motor vehicle itself which experience has shown are likely, if the operator neglects to have them corrected, to be the causes of serious traffic accidents, particularly during the winter months of uncertain footing and long hours of darkness.

Highway patrolmen know from the story of traffic deaths and accidents in the past that every faulty brake, every defective light, every obscured windshield and every loose steering wheel is a potential accident cause which may result in someone's death or injury.

With this in mind, state highway patrolmen during October made 347 arrests of drivers operating cars or trucks with dangerously improper equipment and carried this phase of their safety efforts on through November. In addition to arrests they gave out 1,012 verbal or written warnings and issued 2,491 illegal equipment tags.

Defective lights alone were responsible for 871 patrol warnings during the month, and 1,902 tags for operating illegal equipment. Faulty brakes accounted for 230 tags, lack of a horn or other warning device for 80; no workable windshield wipers for 31; no rear vision mirror for 45; and unmuffled exhaust pipes for 100 tags. Of the law violators detected in driving with illegal motor vehicle lights, 811 motorists were driving with the rear light out and 530 with only one headlamp burning.

Driving with improper equipment caused 953 motor vehicle accidents during 1940. Thirty-nine of these were fatal and 446 resulted in non-fatal personal injuries. The most tragic offenders among defects held responsible for traffic mishaps last year were faulty brakes and defective lights. The state highway department reports bad brakes figured in 357 of these accidents, illegal lights in 337, faulty tires in 109 and defective steering mechanism in 75.

BLACK LABORDOR DOG CHANGES HIS REPUTATION

St. Peter—The aftermath of pleasant hunting season brings forth this story. Mike, a black Labrador dog, said to belong to half a dozen families in town has raised his standing among hunters. Although usually considered a sort of useless hound Mike has proved his worth. While making the fields ahead of some of the nimrods Mike came to a sudden stand, and then made a quick dash into the brush and lo, and behold, came out with a fine pheasant rooster in his mouth, alive. Talk about taking them alive, that dog Mike is tops now with half dozen families.

State Tax Commissioner Explains Law Applying to '42 Cigaret Licenses

Cigarette dealers in Minnesota will obtain their licenses at home after January 1, 1942, when authority for issuing such licenses is to be transferred from the department of taxation to the governing bodies of cities and villages in the state and to county boards for townships and unorganized villages. After that date licenses for the sale of cigarettes are to be obtained in the city or village where the dealer conducts his business; in townships and unorganized villages, licenses may be issued by the county board.

The 1941 legislative act does not repeal the law prohibiting the sale of cigarettes to persons below 18 years of age, nor revoke the penalty for smoking cigarettes by persons of that age.

Inquiries received by G. Howard Spaeth, commissioner of taxation, indicate there is a general misunderstanding as to the licensing of cigarette dealers under the new law, many dealers believing a double fee will be imposed beginning January 1, 1942. The only license fee to be collected, however, is that paid locally and at the time and place the license is issued.

Dealers will avoid confusion and delay by applying to their local governing body for their 1942 licenses and not send applications to the department of taxation as formerly, as formerly, as applications so received must be returned. During 1941 there have been issued 19,316 cigarette licenses to dealers in Minnesota.

Minnesota Taxpayers Will Save Million Due to Lower State Levy

In accordance with a law passed at the last session of the Minnesota legislature, the state mill levy on real estate and personal property has been written into the ledgers at 9 mills instead of 10 mills as heretofore, according to the Minnesota Taxpayers Association. New levies are being prepared on this basis.

The reduction of one-mill will save the taxpayers of the state the coming year a total of $1,100,000 and will yield an estimated $9,900,000, the taxpayers group points out.

The reduction was due to the action of the legislature forcing through a bill increasing the gasoline tax from 3 cents back to the old rate of 4 cents a gallon. Along with the gasoline tax raise was a companion bill abolishing the old one-mill state road tax; and allocation of the extra one cent for gas taxes was required to be made to rural districts for road purposes on the same basis as the one-mill levy previously provided.

Poultry Expert Urges Better Management and Feed for Laying Flocks

Don't splurge too much in the poultry business if you want to put more nickels in your pocket and come out with fewer debts. Minnesota is expected to better 1941 egg production by 15 million dozen eggs next year, and in terms of the increased number of laying hens on Minnesota farms this means an increase of less than a dozen eggs per hen.

This would be a big job if hens were already laying at top speed, but Minnesota hens now average only a little more than 100 eggs a year, which amounts to working only about nine days out of every month. Getting them to work 10 days a month instead of nine will do the trick, says Cora Cooke, extension poultry specialist at University Farm.

There is no magic formula to increased egg production, she adds, pointing out that the egg producer who does things just a little better than they need to be done is the one who gets the eggs. Extension Folder 103, "Feed Makes Eggs," lists the ingredients of an all-purpose mash and suggests substitutes wherever possible to lower costs.

INDIAN PREDICTS WINTER WILL HAVE MUCH SNOW

Fergus Falls—Rene Eagleface, an Indian of many summers, was in the city this week on his way to visit cousins on the Sisseton reservation. In pioneer days an Indian could make long-distance weather predictions with a fair degree of accuracy, basing these predictions on the type of hives the muskrats were building, thickness of the layer of bark on certain trees, etc. While here Eagleface was asked what kind of winter we would have this year. The Indian seemed to be in deep thought for a moment, then replied, "Ugh, winter of heap big snow." Asked what he based his prediction on, Eagleface replied promptly, "White man put up much snowfence."

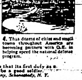
Help!

More than 400 companies, all over America, are helping General Electric speed defense work by supplying parts that G.E. would make itself in normal times.

1. Two of these subcontracting firms ordinarily manufacture fishing tackle. Another normally makes watches, and still another makes carpets.

2. For making searchlights alone, subcontractors from five states prepare parts. About 75 companies contribute to building a steam turbine.

3. More than 150 different firms supply parts in a steady, scheduled stream for radio transmitting and receiving equipment for the armed forces.



4. Thus dozens of cities and small towns throughout America are becoming partners with G.E. in helping speed the national defense program.

General Electric believes that its first duty as a good citizen is to be a good soldier.

COUNCIL MAKES GIFT TO POWER PLANT PATRONS

Votes 30 Per Cent Discount on December Light Bills, Payable Jan. 1

HARTZ GETS PERMIT FOR HUGE BUILDING

Action Taken to Start Work on New Storm Sewer District

In recognition of the solvent state of municipal finances, the city council at its December session Tuesday evening presented a welcome Christmas gift to patrons of the local power plant when it unanimously adopted a resolution introduced by Alderman H. W. Kinghorn offering a thirty per cent discount on December light bills payable January 1 instead of the usual ten per cent discount for prompt payment.

The added 20 per cent discount will amount to approximately $2,500, it was estimated by City Clerk P. G. Pederson.

The council approved the largest construction project in recent years when it issued a permit to L. B. Hartz Stores in the amount of $70,000, covering construction of the new building to house the Hartz super market and bakery, excavation work for which has been completed. The permit calls for a structure 128 by 140 feet in dimensions, with sixteen apartments on the second floor. A permit also was issued to Erickson, Solheim & Ness, contractors, for a residence to be built at an estimated cost of $3,000.

A letter was read from C. D. Gustafson, president of the Mercy Hospital association, objecting to the condition of the sidewalk recently built by the city in front of the hospital. Engineer I. E. Quist said the walk had apparently been damaged by frost. It was voted to lay the matter on the table until next spring, when corrective measures can be taken.

A proposed ordinance providing a local license for cigaret sellers at the rate of $10 a year was given its first reading. When put into effect, the local license will supersede the present $12 state license.

A project for the installation of sanitary sewers in Fairfield addition at the north edge of the city received approval and the contract to supply the necessary tile and fittings was awarded to the Central Lumber company on its bid of $103.50, the lowest of four received.

Engineer Quist presented a plat showing the projected new storm sewer district in the city. The council voted to advertise for bids for materials for the first portion of the work on Eighth st., the bids to be opened December 26.

Acting favorably on a recommendation of the city recreation board, the council approved a schedule calling for a skating fee at the arena this winter of five cents for children and nine cents for adults. The small fees will supplant the issuance of season tickets, as has been the custom in recent past years.

As a precautionary measure in the present war, the council voted to engage the services of a watchman to guard the municipal power plant property.

The principal address will be given by John A. Johnson of Minneapolis, national Townsend representative for Minnesota, who has selected for his subject, "Pensions, Our National Defense." Senator E. L. Tungseth also will discuss the Townsend national recovery plan.

The drive will be staged thruout the county next Wednesday, December 17, and Chairman Dahlen said that with this country now engaged in its greatest war effort, he is confident of the loyal support of all citizens.

Children of Thief River Falls and surrounding community probably don't need an extra reminder of the fact that Christmas is just two weeks distant, but nevertheless they are going to get a welcome one Saturday afternoon, December 13, in the form of a pre-holiday visit from Santa Claus.

Jolly Old Saint Nick has sent word down from his headquarters at the North Pole that he wants to check up on the little boys and girls and see how they have been behaving since his last visit a year ago. At the same time he notified officers of the Civic and Commerce association that he takes it for granted all the youngsters have been behaving perfectly, and he is bringing along some huge bags of remembrances to distribute at the Auditorium with the aid of a cooperating committee under the direction of Ole Ekeren.

On arriving in the city Saturday at 2 o'clock, Santa Claus will immediately be escorted to the Auditorium to visit with his little friends and present them with reminders of the occasion.

Good news for young people of the community is contained in the announcement by T. M. Thronson of the arena management committee that the skating rink in the arena will be opened to the public next Sunday, December 14, assuming a continuation of the present cold weather.

Mr. Thronson stated that no season tickets will be issued this season, but that the schedule of admission charges will be on the basis of five cents for children and nine cents for adults. Tickets for adults will also be sold at three for 25 cents, seven for 50 cents and 16 for $1.

Owing to the fact that there will be no senior hockey here this winter, the public will have much more use of the rink than in recent past years. Charles Dostal will have charge of the rink, and a refreshment booth will be maintained by the management.

Mr. and Mrs. John Ward and daughter Lois Mae returned Tuesday night from New Ulm where they attended the silver wedding anniversary on Sunday of Mr. and Mrs. George E. Paterson.

CO. TAXPAYERS GROUP ELECTS FOUR TO BOARD

Bennes, John Scholin, Alfred Longren and S. Singer Are Named

COMMITTEE REPORTS ON ASSESSED VALUES

Group Disclaims Credit for Lower Taxes Levied in This City

At the postponed annual meeting and election of the Pennington County Taxpayers association, held Friday evening in the Civic and Commerce association rooms, E. M. Bennes was reelected to the board, while also named were three new members, John Scholin, Alfred Longren and Stephen Singer. The last three succeed F. J. Barzen, V. C. Noper and O. F. Parnow. A. J Rau, president of the association, was in charge of the meeting.

A committee consisting of O. L. Ihle, S. E. Hunt and Alfred Longren submitted a report giving comparative valuations on adjoining tracts of farm lands in Pennington and Marshall counties, tending to show sharply higher assessed valuations on Pennington county property.

In answer to rumored charges that the association was more concerned about reducing taxes in the city of Thief River Falls than in rural areas, President Rau disclaimed any credit for the lower tax rates put into effect in the city for next year, pointing out that they are due to good management by the city administration and to the huge earnings of the municipal power plant, much of which goes to pay the city's operating costs.

At the same time the county board came in for criticism for not being more cooperative. Among other matters discussed were the possibility of building county roads at lower cost and of buying culverts on a more economical basis, as well as clerk hire in the county auditor's office.

T. M. Thronson, city assessor and secretary of the association gave a talk in explanation of real estate valuations in Thief River Falls, and advocated establishment of a county assessor system thruout the state as a means of adjusting city and rural valuations to an equitable basis.

A resolution was adopted requesting the county board to publish the names of persons receiving old-age assistance, some speakers contending that some are receiving aid who are not entitled to it.

Lunch was served at the close of the meeting under the direction of Julien Provencher.

The resignation of George M. Wilson as secretary was received, and it was indicated that appointment of a successor will be made before the end of the year.

Mr. Hunt, Mr. Peterson and W. E. Dahlquist were appointed delegates to the joint annual meeting of the Minnesota Federation of County Fairs and the State Agricultural society to be held shortly in the Lowry hotel in St. Paul. Named as alternates were Harry R. Lund and Robert J. Lund.

EDUCATION BOARD PLACES INSURANCE POLICIES MONDAY

Miss Aneta Dahlquist Gives up Post as Faculty Member Here

Principal business to come before the local board of education at its December session Monday evening was the placing of $496,500 in insurance policies on school property in the city. The policies were divided among 14 of the 18 agencies that had formerly written them, those omitted being the G. A. Brattland and H. A. Kjoe agencies. The policies are written on a five-year basis, one-fifth of the total of $496,500 in force expiring each year.

At the request of the city council, the lease held by the city on the old Central school was ordered canceled, the building being needed no longer for the use of the National Youth Administration.

Accepted by the board was the resignation of Miss Aneta Dahlquist, fourth grade teacher in the Washington school and a member of the local school faculty the past 18 years. Miss Dahlquist plans to enter the ladies ready-to-wear field in Los Angeles.

Authorized by the board was the payment of $7,500 in outstanding bonds and $1,773.13 in interest. The current payment will reduce the funded debt of the district to $228,000, a total of $13,500 having been paid this year.

It was voted to distribute pay checks for the month of December on December 17 in advance of the Christmas holiday recess, which starts December 20.

GERMANY AND ITALY DECLARE WAR ON U. S.

Radio dispatches this morning brought the expected news that Adolf Hitler had declared war on the United States at a meeting of the German reichstag today, and that similar action was announced in Italy by Premier Mussolini. Hans Thomsen, Germany's charge d' affaire in Washington, served notice of the declaration on the state department at 8:30 this morning.

Local citizens relaxing in their homes last Sunday afternoon were astounded when radio programs were interrupted by announcements that, with Japanese envoys in Washington discussing with Secretary of State Hull a peaceful settlement of differences between the two nations, Japan had Sunday morning made a surprise and unprovoked attack on the giant Pearl Harbor naval and air base in the Hawaiian Islands.

Testifying to the fact that the assault was part of a campaign that had been planned well in advance, the Japanese staged almost simultaneous attacks on the Philippine Islands and the U. S. possessions of Guam and Midway islands, as well as on British bases at Singapore and Hong Kong.

The government at Washington later announced that several hundr soldiers in and near Honolulu had lost their lives in the attack by Japanese bombers, as well as an undetermined number of civilians. In addition, ships in the U. S. fleet stationed in the islands were damaged to a degree not yet revealed, and a considerable number of American fighting planes were disabled.

It seemed apparent that the U. S. forces were caught off guard, due no doubt, in part, to the fact that Japan postponed its declaration of war until after launching its initial attack.

An apparent attempt by Japanese warplanes to bomb the San Francisco bay area was reported Monday night by Brigadier General W. O. Ryan of the U. S. air force command in that area. He stated that a large number of unidentified aircraft were turned back at the Golden Gate after

ITINERANT NURSE COMPLETES WORK IN PENNINGTON CO.

Red Cross Worker Finishes Three-Months Tour of Duty in County

Miss Ruby Goodman, itinerant Red Cross nurse who recently completed a three-months tour of duty in Pennington county, submitted a report on her work to the nursing activities committee of the county chapter last Wednesday evening, and also gave a talk at the roll call victory coffee party Saturday afternoon.

During her period of service Miss Goodman inspected 657 pupils in schools outside of Thief River Falls, including vision testing, weighing and measuring, and inspecting teeth and throat.

Two home nursing classes were conducted in Thief River Falls, one for mothers and the other for students in the teacher training department. Of the total enrolled, 35 completed the course and will receive their certificates.

Miss Goodman stated that the immunization program is now in progress, and will continue until January 15. Families are notified thru the schools as to the dates for their township if they are interested in having their children immunized for diphtheria or smallpox. The cost if fifty cents for either smallpox or diptheria, or 75 cents for both.

Of 203 children who were discovered to have dental defects by the nurse last year, 113 defects have since been corrected, while out of 67 children who had visual defects, 64 have had corrections made. The high percentage of corrections clearly demonstrates the value of the nursing service, said Miss Goodman.

In addition, she gave talks to twelve organizations thruout the county concerning the need of a full-time county health nurse in Pennington county.

ROOSEVELT IN TALK TUESDAY SEES LONG WAR

Refers to Axis Nations as Crafty and Powerful Bandits

ADMITS SUCCESSES OF JAPANESE ATTACK

Says Germany and Italy are Also at War with the United States

President Roosevelt warned the nation Tuesday night that it is in for a long, hard war, against "crafty and powerful bandits" with Germany and Italy as much the enemies of the United States as is Japan.

But he emphatically denied Japan's boast that she had gained naval supremacy in the Pacific by her lightning stroke at Hawaii and he declared confidently: "We are going to win the war and we are going to win the peace that follows."

Making his first report to the nation on the past and future of the conflict that has suddenly engulfed the country, the chief executive starkly acknowledged that Japan's initial successes have been extensive.

"Many American soldiers and sailors have been killed by enemy action," he said, adding that the damage done at Pearl Harbor in Hawaii was "admittedly serious". And, he said, the people must be prepared at any time for an announcement that Guam, Wake, and Midway islands have been seized by the enemy.

But, on the other side of the war ledger he placed 18 months of preparation, assembly lines already producing a profusion of war materials, and of plans for doubling, and quadrupling that output. The latter included a seven-day week for the war industries, and the construction of new plants.

In addition, he balanced against the power the ruthlessness of the enemy, the determination of a united people, which he said will be satisfied with nothing short of complete victory.

He spoke from the heavily guarded White House, his first talk with the nation since the Japanese attack of Sunday, with the exception of his terse request to congress for a declaration of war.

Repeatedly, and with great emphasis, *he spoke of Japan's relationships* with Germany. The latter he accused of pushing Japan into the war with promises that she would become the master of the Pacific, and be given "a stranglehold on the west coast of North Central and South America.

Remember always, he solemnly warned, "that Germany and Italy, regardless of any formal declaration of war, consider themselves at war with the United States at this moment just as much as they consider themselves at war with Britain and Russia."

Repeatedly, the president asked the people not to accept wild rumors of successes or failures. To do that, he said, was to be deceived by the propaganda of the enemy. The government would give them all the facts that it could confirm provided that their revelation would not be of assistance to the enemy, he pledged.

"We are now in this war," he said. "We are all in it—all the way. Every single man, woman and child is a partner in the most tremendous undertaking of our American history. We must share together the bad news and the good news, the defeats and the victories—the changing fortunes of war.

"So far the news has all been bad. We have suffered a serious setback in Hawaii. Our forces in the Philippines, which include the brave people of that commonwealth, are taking punishment, but are defending themselves vigorously."

SQUIRREL TAKES UP ABODE IN KITCHEN RANGE

Mabel.—When Miss Mattie Antrim, who maintains a residence in Mabel, and is employed as a teacher in Richland Center, Wisconsin, returned home for her Thanksgiving vacation imagine her surprise on opening the oven of the kitchen range to find a live squirrel nesting comfortably therein. The squirrel was fat and "sassy" and it took much persuasion to get the "squatter" to move on. Finally when the outer door was left open Mr. Squirrel finally departed for the wide open spaces.

RED CROSS SIGNS 1417 MEMBERS IN RECENT CAMPAIGN

Total Receipts of Roll Call Including Donations Are $1,761.71

With a county quota of 1,500 members, the Pennington county chapter of the American Red Cross closed a highly successful roll call campaign last week with 1,417 members and with total receipts, including donations, of $1,761.71, Mrs. A. M. Holte, campaign chairman, reported at a victory coffee party held Saturday afternoon in the veterans memorial rooms in the Auditorium.

Mrs. Holte expressed the appreciation of the roll call committee of the cooperation of all citizens of the county whose contributions made possible the excellent results of the drive.

Herman A. Kjos, chairman of the county Red Cross chapter, issued the following statement:

"On behalf of the American Red Cross, and the County Chapter, I am taking this opportunity to thank all those who took part in making the Red Cross Drive for memberships a splendid success. We want to include the newspapers for their excellent publicity, Mrs. A. M. Holte, the county roll call chairman; Mrs. Edwin Hanson, rural roll call chairman; the local chairman of every division, the teachers in their respective districts, the coworkers and solicitors, and the large group of those who became members for 1942 and those who made contributions."

More than fifty persons attended the coffee party Saturday. In addition to the report by Mrs. Holte, talks were given by Mrs. Mary V. Shaw, longtime chairman of the county chapter, and by Miss Ruby Goodman, itinerant Red Cross nurse, who recently completed three months of work in the county.

Police Squad Car Is Too Well Known; Private Car Is Used to Nab Speeders

Use of a private automobile by the police proved more effective than the easily recognizable squad car in the apprehension of speeders during the past week-end. Fined $5 each in municipal court for driving too fast were Alfred Ryman, Clifford Hedeen, Clifford Engelbretson, Roy Nelson, Clarence Carlson, C. Ruthebakke, Elmer Johnson, and W. W. Christofferson, all of this community; and Otto Knapp of North Dakota. Also charged with speeding was C. E. McCracken, who has not yet appeared in court. At the same time James Burlagrod was fined $15 on charges of reckless driving and speeding.

U. S. ON DEFENSIVE AS JAPAN LAUNCHES PACIFIC BLITZKRIEG

(Continued from page 1)

searchlights were turned on and other unrevealed measures taken to thwart an attack.

President Roosevelt appeared before a joint session of Congress Monday morning, and in a short message asked that body to declare war on Japan. This action was taken shortly after by a unanimous vote of the two houses, with the exception of one woman member of the lower house from Montana.

In his message President Roosevelt said, "As commander-in-chief of the army and navy I have directed that all measures be taken for our defense. Always will our whole nation remember the character of the onslaught against us. No matter how long it may take us to overcome this premeditated invasion, the American people in their righteous might will win thru to absolute victory."

Great Britain Monday carried out her pledge to support the United States in the arena of the Pacific ocean by declaring war on Japan, as did Canada and several Central American countries.

The cause of the Allies suffered a further reverse Tuesday when two of Great Britain's largest battleships, the 35,000-ton Prince of Wales, and the 32,000-ton Repulse were admitted to have been sunk by the Japanese off the coast of Malaya, not far from the Singapore base.

President Roosevelt said in the course of his address to the nation Tuesday evening, "No honest person, today or a thousand years hence, will be able to suppress a sense of indignation and horror at the treachery committed by the military dictators of Japan, under the very shadow of the flag of peace borne by their special envoys in our midst.

"The course that Japan has followed for the past ten years in Asia has paralleled the course of Hitler and Mussolini in Europe and Africa. Today, it has become far more than a parallel. It is collaboration so well calculated that all the continents of the word, and all the oceans, are now considered by the axis strategists as one gigantic battlefield."

DAIRY PRODUCTION WILL BE THEME OF LOCAL MEETINGS

Preliminary Plans are Made Tuesday to Encourage Bigger Output

Dairy leaders from all parts of Pennington County met at Thief River Falls Tuesday to discuss methods of increasing the dairy production in Pennington County. In order to meet the increased production asked for by the State Farm Defense Board, Pennington county farmers will have to increase their milk production by 3,815,000 pounds over that which was produced in 1941.

To get this increased production these dairy leaders have scheduled fifteen meetings in the county next week to carry the information which they received at the county gathering back to their neighbors.

G. H. Kelehan, extension specialist working with AAA and former county agent of Ottertail County, pointed out at the county meeting that dairymen who feed and manage their cows for best possible production will not only help reach goals for defense goals but also stand a better chance of making money than those who are satisfied with half a job of feeding.

The county schedule of meetings is as follows:

Tuesday, Goodridge hall, 8 p. m.; Kompen School, 1:30 p. m. District 69, 8:00 p. m.; Dist. 37, 8 p. m.; Civic & Commerce Rooms, 8:00 p. m.; District 11, 8:00 p. m.; Silverton Hall, 8:00 p. m.; District 106, 8:00 p. m.; District 135, City View, 8:00 p. m.; Nelson school, 8 p. m.

Wednesday, District 178, 8:00 p. m.; District 125, 8:00 p. m.; Civic and Commerce Rooms, 8:00 p. m.; Thursday, Mavie School, 8:00 p. m.; Friday, District 82 (Lundeen), and Commerce Rooms in Thief 8:00 p. m.

WE HAVE LOST AND WE HAVE WON

The inevitable war with Japan is here at last and while there is much in the record of the first days of that war that is discouraging it is also true that we have reason to rejoice over much of what has happened.

From the standpoint of military considerations the Japs have dealt us several heavy blows. They caught us off guard with a vicious attack that had been carefully prepared while their special envoy talked to us of peace. We were caught in the trap and have lost the first round of the battle for survival.

Our military reversals, however, have been more than offset by the advantages we have gained in other ways. By their stealthy attack the Japs have accomplished for us what no American leader could accomplish. They have united our nation. For many months we have been divided by a bitter controversy over foreign policy and this division has sapped our strength. Now our country stands united as never before and, united, there is no power nor combination of powers that can defeat us.

But the treacherous attack of the Japs has gained for us more than this. It has gained for us the wholehearted co-operation of our neighbors. In quick succession, one country after another has declared war upon our enemy and the people of North and South America now stand together in a common cause to an extent that would not have been possible had not the Japs betrayed their true character.

Weighing the good with the bad in these first days of a struggle that probably will last a long time, and giving full recognition to the seriousness of our losses, we still believe we have gained a decided advantage over our adversary. The road ahead of us is long and hard and there will be times when further progress seems next to impossible. But it is not the first time the American people have travelled a hard road and we will emerge at the end of this one, vindicated and victorious.

ONLY ONE OBJECTIVE NOW

Germany and Italy have now declared war on us but a formal declaration in this case is a mere formality. Actually we have been at war with these countries for a long time. Hitler's declaration of war against us was written many years ago in his Mein Kampf when he declared that his system of government and our system of government could not both exist side by side. It would have to be one or the other. And it will be one or the other. About the only difference his formal declaration will make to us will be to put an end to the period of argument. Up to the present time Americans have had a right to disagree on some questions that now are not debatable.

We know that our Constitution contains a Bill of Rights that guarantees to us certain liberties. In an emergency it may become necessary to suspend some of these liberties in order to preserve them. The Constitution also has something to say about treason. According to our Constitution a citizen of the United is guilty of *treason if he makes war upon his country, if he adheres in principle or practice, to his country's enemies, or if he gives aid or comfort to his country's enemies.*

As a nation our one objective at the present time is to defeat our enemies and win the war. Toward that end we still have a right to disagree among ourselves but criticism that tends to destroy morale or weaken our effort cannot be tolerated. We are engaged in a life and death struggle. To win the fight we are now engaged in will require all of our energy, all of our ingenuity, all of our courage. Regardless of past opinions or prejudices, good Americans have only one objective today. Win the war.

Perhaps it is a fortunate coincident that brings "Bill of Rights Week" to us during the first week of our war with Japan. The Bill of Rights is that portion of our Constitution in which are defined the rights of minorities and individuals. We think of them in terms of freedom of speech, freedom of the press, freedom of assembly, freedom of religion, trial by jury and a few other generalizations of this kind. Because we have come to look upon them as rights, we are too inclined to take them for granted, without due consideration to the fact that we enjoy these privileges because preceding generations fought for them. Now, as we are confronted with the necessity of fighting in defense of our nation, it is well to keep in mind that the one thing that makes our nation worth defending is the Bill of Rights. The forces of oppression which we are now opposing recognize no right but the right of the strong to rule. It is the challenge of the jungle and centuries of progress are at stake. Whether or not our children and our children's children will enjoy the privileges we have inherited will depend upon our willingness to safeguard those privileges.

A rattlesnake warns before he strikes. Not so the snakes we are now fighting. The Hitler method of attack is to lull the victim into a feeling of security by reassuring promises and then, when least expected, to give him the knife. The method has proven very successful in the conquest of small nations but the knife was not long enough to reach the heart of the Russian bear. And the Japs, following the same plan, will find that the American Eagle they tried to murder, is still very much alive.

Here is a suggestion, made to us during the past week, that we are glad to pass along. Dogs and rats will be less annoying in your neighborhood if all garbage cans are placed in a rack that will prevent them from being tipped over.

Frank Rinkel, elected alderman from the fourth ward, will not be able to qualify because state law prohibits a state employee from holding an elective office. Frank probably is due for a little ribbing from his friends for being the type of fellow who thinks it is more important to make a living than to be an alderman.

Topics of the Times

By N. A. H.

Enemy submarines will be kept *busy for some time yet, it appears.* The United States is launching merchant ships at the rate of one a day.

If you're stuck with the problem of what to give for Christmas, why not make it a book of Defense Stamps.

With the Japanese having a premier named Tojo and a foreign minister named Togo, proofreaders have to watch their steps these days.

Prediction—There won't be as many Christmas parcels mailed to foreign countries this season as in normal years.

Down at Detroit Lakes a man was fined $50 for possessing venison out of season. Appropriately enough, he lived at Bad Medicine Lake.

You can go ahead with plans for that holiday trip. There isn't going to be a railroad strike after all.

Mail carriers in England are cheering. Christmas greeting cards have been banned because of a paper shortage.

Mayor LaGuardia of New York, head of civilian defense in the United States, last week married a movie actor and a radio singer. That won't help any.

Times change. A year ago funds were being collected in this country for Finnish relief.

After that Japanese war declaration, there no longer is any question of public sentiment being divided in the United States.

Radium Man's Turkeys Score Heavy Winnings at Show in Alexandria

A more complete report on the prizes won by Allen's Turkey Farm of Radium at the turkey show held recently in Alexandria was made available last week when John O. Allen returned from that city. He won the grand championship with his live yearling tom, reserve championship for his dressed 14-pound young hen, sweepstakes on his display in the dressed division, and first in the bat-pack even-dressed division. The show, rated as one of the three largest in the country, had an entry list of 400 live and 300 dressed birds.

The President's Last Bid for Peace

Text of Note to Jap Emporer

Almost a century ago the president of the United States addressed to the emperor of Japan a message extending an offer of friendship of the people of the United States to the people of Japan.

That offer was accepted and in the long period of unbroken peace and friendship which has followed, our respective nations, through the virtues of their peoples and the wisdom of their rulers, have prospered and have substantially helped humanity.

Only in situations of extraordinary importance to our two countries need I express to your majesty messages on matters of state.

I feel I should now so address you because of the deep and farreaching emergency which appears to be in formation.

Developments are occuring in the Pacific area which threaten to deprive each of our nations and all humanity of the beneficial influence of the long peace between our two countries.

THOSE DEVELOPMENTS CONTAIN TRAGIC POSSIBILITIES.

The people of the United States, believing in peace and the right of nations to live and let live, have eagerly watched the conversations between our two governments during these past months.

We have hoped for a termination of the present conflict between Japan and China.

We have hoped that a peace of the Pacific could be consummated in such a way that nationalities of many diverse peoples could exist side by side without fear of invasion; that unbearable burdens of armaments could be lifted for them all; and that all peoples would resume commerce without discrimination against or in favor of any nation.

I am certain that it will be clear to your majesty, as it is to me, that in seeking these great objectives both Japan and the United States should agree TO ELIMINATE ANY FORM OF MILITARY THREAT.

This seemed essential to the attainment of the high objectives.

More than a year ago your majesty's government concluded an agreement with the Vichy government by which five or six thousand Japanese troops were permitted to enter into northern French Indo-China for the protection of Japanese troops which were operating against China further north.

And this spring and summer the Vichy government permitted further Japanese military forces to enter into French southern Indo-China for the common defense of French Indo-China.

I think I am correct in saying that no attack has been made upon Indo-China, nor that any has been contemplated.

During the past few weeks it has become clear to the world that the Japanese military, naval and air forces have been sent to southern Indo-China in such large numbers as to create a reasonable doubt on the part of other nations that this continuing concentration in Indo-China is not defensive in its character.

Because these continuing concentrations in Indo-China have reached such large proportions, and because they extend now to the southeast and the southwest corners of that peninsula, it is only reasonable that the people of the Philippines, of the hundreds of islands of the East Indies, of Malaya and of Thailand itself, are asking themselves whether these forces of Japan are preparing or intending to make attack in one or more of these many directions.

I am sure that your majesty will understand that the fear of all these peoples is a legitimate fear inasmuch as it involves their peace and their national existence.

I am sure that your majesty will understand why the people of the United States, in such large numbers, look askance at the establishment of military, naval and air bases manned and equipped so greatly as to constitute armed forces capable of measures of offense.

It is clear that a continuance of such a situation is unthinkable.

None of the peoples whom I have spoken of above can sit either indefinitely or permanently on a keg of dynamite.

There is absolutely no thought on the part of the United States of invading Indo-China if every Japanese soldier or sailor were to be withdrawn therefrom.

I think we can obtain the same assurance from the governments of the East Indies, the governments of Malaya and the government of Thailand

I would even undertake to ask for the same assurance on the part of the government of China.

Thus, a withdrawal of the Japanese forces from Indo-China would result in the assurance of peace throughout the whole of the South Pacific area.

I address myself to your majesty at this moment in the fervent hope that your majesty may, as I am doing, give thought in this definite emergency to ways of dispelling the dark clouds.

I am confident that both of us, for the sake of the peoples not only of our own great countries, but for the sake of humanity in neighboring territories, have a sacred duty to restore traditional amity and prevent further death and destruction in the world.

'Waving Bloody Shirt'

Red Cross Helps Solve Problems Of Our Recruits

Through Its Directors In Camps Red Cross Links Men With Home

Washington, D. C.—On the home and military fronts the American Red Cross is turning its focus on the man in uniform. In his behalf, more than 10,000 nurses are being recruited. Volunteers are donating their blood for a huge plasma bank. Red Cross women in chapters throughout the country are making [illegible] surgical dressings, and knitting sweaters for men in outlying posts and sailors on patrol.

But these are just fragments of the story. In military and naval stations, the Red Cross is concerning itself with the personal problems of the service man, helping him adjust himself to military life. For the disabled, the Red Cross is on the job in service hospitals, helping to speed recovery of the sick through a morale-building program.

In mobilizing a [illegible] man fighting force, the personal problems of the able-bodied man in uniform have to turn become problems of the morale divisions. Red Cross field directors stationed in all camps and reservations have been entrusted with the task of helping to solve these problems.

Speaking in a nation-wide broadcast recently, Chief of Staff Marshall, of the Army, addressed the following words to Red Cross field directors:

"When you help straighten out any of the great variety of tangles that human beings seem unable to avoid, you are helping to maintain morale on the home front and on the military front, you are helping us in training for defense."

The disabled man in a service hospital also can look to the Red Cross for help in speeding recovery. [illegible] social workers, trained for this specialized assignment, are on duty at Army general and Navy hospitals to aid service personnel [illegible]

Prowlers Whip Fosston; Bemidji Comes Friday

Playing touch-and-go basketball the Prowlers opened their 1941-42 season Friday night, with a resounding 34 to 23 triumph over a well-conditioned Fosston team. And now the Prowler cry is "Bring on the Bemidji Lumberjacks"; for tomorrow night the 8th region champions, led by veterans Jack Vinji, Glen Back, and Tom Corrigan, meet the Prowlers on the local floor.

Fosston, shooting at the west basket, opened the scoring in Friday night's game when, after 30 seconds of play, Keith Marshall popped a shot into the net. Johnny Campbell counted the first point for the locals on a free throw, and a moment later Johnny pulled a play reminiscent of Eddie Flasch, when he took a Fosston rebound and dribbled the length of the floor and lifted a short shot into the basket. Don Kerley's free throw knotted the count at 3-all. Lenny Lorentson lofted a left-handed shot into the net; and Campbell on a fast dribble, went in for a push-up shot.

Porky Thompson for Fosston and Lorentson for the Prowlers, each rang up free throws, and just before the period's end, Campbell, on a one-handed hoist from the free throw line, counted a field goal. Bob Johnson collected a field goal on an angle shot from side-court; but Don Berg marked up an equalizer when his left-handed shot from the free throw line found the hoop. Bob Johnson picked up another field goal on a drive into the basket. Berg counted a free throw, and after Thompson had marked up a Greyhound basket, Orrin Pederson popped in an under-the-basket shot. Thompson's free throw and Hagen's dribble-in shot, concluded Fosston's scoring in the first half. Bob Powell's one-handed toss, from close up, gave the Prowlers a 17 to 13 lead at half-time.

The Prowlers, continuing their fast breaking offense, and playing a rushing game on defense, outscored the Fosston Greyhounds, 17 to 10, in the second half. Johnson's free throw gave Fosston point as the third period opened. Milt Peterson, on a pass from Lorentson, counted a field goal; and Don Berg angled in a one-handed shot from the floor. Bob Johnson, taking a long pass, and Thompson, on close push-up shot, scored field goals for Fosston; while Jack Melby registered a Prowler free throw. Lorentson, on a tip from Melby, popped in a field goal, and Melby, while tipping in a shot, was fouled by Kerley. The field goal counted and Jack made good on his free throw. Don Berg hooped another one-hander into the basket. Kerley converted a Fosston rebound into a field goal. Jack Melby, on a pivot play, flipped a short shot into ring. Berg chalked up a free throw. Thompson recovered a rebound and lofted the ball into the net for Fosston's final points. And "Mouse" Efteland closed out the game's scoring with a push-up shot from the free throw lane.

Johnny Campbell, Don Berg, Jack Melby, and Lenny Lorentson played effective games for the Prowlers, with Berg, Campbell and Melby being the high scorers for the locals. Fosston's play was sparked by Marvin Thompson, who was the game's high point man, scoring 9 points. Both teams were erratic in their shooting, missing numerous trys from the field, and the free throw line. The Prowlers connected with six free throws and missed eleven, while Fosston marked up five free throws and missed eighteen tries.

In an interesting preliminary game the Prowler "B" team, paced by Billy McKechnie and Bob Wright, outscored the Senior "Bums" 33 to 16.

Continuing their "feud" with the high school Prowlers, the Bjorkman's Toggery team, with Si Kompelien and Red Eide leading the attack with 14 and 11 points, respectively, defeated Coach Newby's boys, 37 to 27, last Wednesday night. Keeping Score

.... With BUCK OLSON

It Was a Surprise

It surprised me to have the Prowlers come through with that 34 to 23 win over a fair Fosston team. Frankly, I didn't think that the Prowlers had progressed to the point where they could handle the Greyhounds—but the boys did, and they looked promising in doing it. Of course it must be remembered that the Prowlers' play, their style of offense and defense, was a surprise to the Fosston team, and the Grayhounds consequently were unable to get organized. The Prowlers long-passing game and their fast break, while erratic at times, proved effective; and the locals rushing defense, chasing the ball all over the court, made it difficult for Fosston to set up their plays.

Of the individual Prowlers the play of Don Berg and Jack Melby was especially impressive. Don appears to relish the new style of play, for he was loose in his actions, aggressive in playing the ball, and he had drive when going in for his one-handed shots at the hoop. Don collected 8 field goals and 2 free throws, to top the Prowler scorers. Jack Melby put on a fine game of center play, particularly in the second half. All Jack needs is a little confidence in his ability to score, and I think that he'll pick that up when he learns how easy it is for him to pivot from his guard and drop the ball into the net.

Tackle Bemidji Friday

And tomorrow night the Prowlers meet the Mr. Big of eighth region basketball, the Bemidji Lumberjacks. Babe Peterson, one of last season's Prowler stars, just about hit the score on the point last Friday night when he said that Thief River would beat Fosston by a dozen points, and Babe comes up with the prediction that this week the Prowlers will defeat Bemidji by five points. But Babe is silly when he spouts such an optimistic score. If Babe really wants the outcome of tomorrow night's game, it'll be like this: Bemidji, 36; Thief River Falls, 25. Bemidji has lost Worth, Thorbrogger, Johnson, and Brown, from their starting line-up of a year ago; with Jack Vinji, playing a guard position, being the only returning regular. But they have Glen Back, Tommy Corrigan, and Grover, reserves who played considerably last year, in the line-up, and Coach Glenn Barnum, who has only a small varsity, has been giving the Lumberjacks offensive plays that are usually given to the boys in mid-season. Coach Harry Newby of the locals, reports that Bemidji is about three weeks in advance of the Prowlers, and that the Lumberjacks should be rated the favorites in tomorrow night's contest.

They're a Road Team

Stan Cockrell's Schmidt's City Club bowlers apparently aren't afraid of bowling on strange alleys. A couple of weeks ago they traveled to Bemidji and trounced Mike Corrigan's Bemidji Schmidt's team; and this past Sunday they bowled on the Baudette alleys, and came up with a win. Bud Kelly was in the Schmidt's line-up Sunday—and still they won. Stan told me they carried Bud along to provide the glamour for the outfit, and to hear the girls exclaim, "My, but isn't he round and dimpled and cute!" But dimpled Bud rolled a respectable 520 pin total.

Resplendent's the Word

Resplendent are the members of the Bjorkman's Toggery basketball team when they are rigged out in the new gold and black jackets that Cliff has provided for his boys. They came trooping into the high school gym Friday night, and from the stir they caused you would have thought that the state champion Buhl team had entered the place.

Watch Nagurski's Shoulder Action

Note the movements of Bronko Nagurski's shoulders in his wrestling bout with Dick Raines tonight. I was told that Nagurski, when he played football, was able to use those shoulders much like Joe Louis uses his fists. That the Bronko, having a lift of about a foot and a half in his shoulders, was able to deliver a blow that was nearly a knock-out punch, when he nudged his shoulder into an opposing line-man.

By the way, Nagurski was honored by the International Falls high school, the Bronko's home town, when it was decided that the high school athletic teams would carry the nick-name of Broncos.

RURAL COUNTIES' RELIEF LEVIES UP $293,291 IN 1941

Rise in Spite of Increased Employment, Says State Taxpayers Assn.

Although employment is reported to be at the highest point in 10 years, and economic conditions have shown improvement due to defense expenditures, welfare and relief tax levies in Minnesota counties have shown an increase of $293,291 over a year ago, according to a preliminary report just issued by the Minnesota Taxpayers association. The reports from county auditors include 77 rural counties, all but seven having reported so far.

Welfare levies for 77 rural counties in 1940 were $5,806,071, as compared with $6,099,362 in 1941, the report discloses. Total county levies for all purposes were $14,836,733 in 1940 and had jumped to $15,139,054 in 1941, showing an increase of $302,321 for the year in expenses of all rural counties.

Road and bridge levies also showed a rise of $195,238 over a year ago. In 1940, road levies were $4,154,362, while this year they are $4,349,600. Bonds and interest and miscellaneous items show a decline for the period, while revenue funds are up by $25,846.

Nearly all of the total increase, however, can be attributed to the rise of nearly $300,000 in relief and welfare costs.

WINTER SHOWS TO HOLD BIG SALE OF PUREBRED STOCK

Annual Sale at Crookston to be Conducted February 5th and 6th

One of the largest consignment combination sales of purebred livestock in recent years will be held in connection with the Red River Valley Winter Shows at Crookston on February 5 and 6, 1942. The two-day sale will climax the events of the Winter Shows week. 160 head of purebred animals of the leading breeds of beef and dairy cattle, sheep, and hogs from fifty-seven breeders in the Red River Valley counties of Minnesota and North Dakota will go on the auction block.

This purebred stock will go to improve existing herds and flocks and furnish foundation animals for new livestock breeders. The sales committee of the Red River Valley Livestock Association at its meeting in Crookston on December 6 certified the animals to be listed for the sales. The sales manager, A. J. Dexter, was authorized to again secure an auctioneer of national reputation to cry the sale.

In commenting on the coming 1942 sale, T. M. McCall, president of the Red River Valley Livestock Association, stated "The fine cooperation of consigners for the forthcoming sale in withholding outstanding animals from ready private sale, will enable us to maintain the high reputation of Winter Shows sales. With the 1941 sales of 120 animals exceeding $8,800 gross, the 1942 sales should easily top this figure."

The sales committee members present for the final arrangements meeting included Andrew Johnstad, Beltrami, chairman; Gordon Clow, Hallock; J. H. Rosendahl, Warren; E. E. Carmen, Ada; Emil Lerud, Twin Valley; A. J. Dexter, St. Paul, sales manager; A. A. Habedank, Ada, sales clerk; and O. M. Kiser, Secretary, of Crookston.

Women More Honest

According to studies made of the records of many states, women are far and away more honest than men in accepting jury duty and far less likely to rig up flimsy and untruthful excuses to get out of it. Women were found more frank, truthful and public-spirited than men in undertaking this public obligation, according to a Philadelphia judge.

FINANCES OF 'U' REPORTED FOR '41 BY COMPTROLLER

Income from Usual Sources Totals $12,447,705 for Year

Books of the University of Minnesota were balanced at the end of the last fiscal year, June 30, 1941, on an annual business of $12,849,423.42 it was shown in the annual report of the comptroller, William T. Middlebrook, which was made public today. Income from usual sources was $12,447,705.71, and outgo for usual purposes, $12,450,323.42. In addition to the latter the University redeemed certificate issued for building purposes, in the sum of $156,000 during the year, increased its endowment from gifts by $190,321.58 and set up a $45,000 reserve for depreciation.

Among the income items were the last two PWA grants receivable, namely, $171,183.58 on Coffman Memorial Union and $41,847 on Ada Comstock Hall.

From intercollegiate athletics the University took in $480,288.80 during the year and expenditures under that heading, including a contribution towards physical education expense were $268,811.12.

Contributions by the state of Minnesota to University of Minnesota income were just under one-third of the total, namely $4,299,168.36 or 33.4 percent. These were made up of the legislative maintenance appropriation of $3,540,000; income from the 23-100 mill standing tax, $244,217.05; the state's share of the cost of indigent patients in the University Hospitals, $200,000 and the so-called special projects, mostly researches in agricultural and minerals, $314,841.31.

The permanent university fund yielded $351,424.55 and the Swamp Land fund $65,965.64.

Student fees of every type provided $1,421,341.07 of the university's income; and that together with hospital income, sale of livestock and agricultural products and the like, made a lumped item called "fees and receipts" of $2,488,054.77.

Trust fund income, mostly on existing funds to finance scholarships, fellowships, special research projects, and the like, came to $1,116,576.29 and the federal government turned over $706,309.16 in addition to the building items already given.

The university's many self-supporting service enterprises, in which outgo normally approximates income yielded receipts of $2,717,099.47. Outgo under this same heading was given as $2,411,717.94, and trust fund distributions and re-investments were placed at $944,585.59.

Chief item of expenditure, Mr. Middlebrook's report showed, was that for instruction and research, namely, $6,299,118.69. Cost of administration was less than two percent on the entire budget, or $203,932.41, and general university expenses, which include the library, trucking, inter-campus trolley line, student employment bureau and similar essential services cost $625,292.46. Physical plant upkeep, operation and heating came to $745,744.96, second largest among the items of cost but far below that for instruction and research.

Bridge and Common Sense

A person lacking in common sense cannot play bridge, according to a noted authority on psychology. But, he claims, in general, lack of common sense is due mostly to careless mental habits—failure to pay attention and carefully analyse all the facts in each situation.

'Tree Planters' State'

Nebraska was styled "The Tree Planters' State" by legislative act on April 4, 1895.

Since at least one person in a hundred is likely to stutter, it is estimated that the United States has 1,300,000 stutterers.

Apples mentioned in the Bible were probably the fruit we know as apricots, in the opinion of some botanists.

GRYGLA

SANTA CLAUS WILL VISIT GRYGLA DEC. 17

Wednesday, Dec. 17, promises to be a big day for the kiddies in this area as that is the day that Santa Claus has promised to be here. All the children, who, we know, will want to see Jolly Old St. Nick and perhaps whisper their requirements for Christmas, are invited to be at the local hall at one o'clock. In addition to being here in person, Santa Claus will bring a bag full of goodies to be distributed among all the little folks.

Members of the local Civic and Commerce Association have been in communication with Santa Claus the past week and they announce that at this time all arrangements have been completed for Santa Claus arrival. Due to the fact that Grygla has neither bus nor train service we are led to believe that he will arrive by special plane. Don't forget the date.

North Star Farmers Club

The North Star Farmers Club met at the hall last Thursday evening. After the usual business meeting, an interesting program prepared by Mrs. Robert Thorson and Mrs. Curtis Nordby, was presented. Following the meeting lunch was served followed by an hour of dancing.

The January meeting will be in the form of a holiday party and as the usual meeting date comes on New Years night, the date is subject to change. On the program committee appointed were Mrs. Emil Boyum, Mrs. H. M. Anderson and Emil Strom, Wilfred Thorson and Elmer Wick were named on the program committee.

GOVERNOR SEEKS PROTECTION FOR BUTTER INDUSTRY

Questions Soundness of Diverting Fluid Milk into Other Products

Concerned over the prospect of permanent injury to Minnesota's co-operative creameries and the vast butter market of the state in the government's effort to divert fluid milk into other products, Governor Harold E. Stassen has appealed to federal authorities to protect the creameries which have made Minnesota the No. 1 butter state of the nation.

In the letter to Secretary of Agriculture Claude Wickard this past week, Governor Stassen:

1. Submitted a request on the part of dairy and farm leaders of the state that butter be included in a reasonable proportion to the cheese, powdered milk and other products supplied Great Britain.

2. Asked for information as to dairy products that will be required of Minnesota during the coming year.

3. Proposed that dairy and farm leaders upon receipt of this information adopt an orderly plan to get the supplies that will avoid disruption of Minnesota's great dairy industry.

Federal authorities have been seeking to divert as much milk as possible to cheese, powdered milk, casein and other products, sought by England under the leaselend bill, and prices have been increased steadily on these articles, with the result that more and more milk is being diverted from butter making.

Calls for Observance of Week of Dec. 8-15 as Bill of Rights Week

On the occasion of the 150th anniversary of the ratification of the federal Bill of Rights, which gives the freedom basic to the American form of democracy, Governor Harold E. Stassen joined with President Roosevelt and Congress in designating the week of December 8 and 15 as National Bill of Rights Week, "to be set aside in this Anniversary Year for special commemoration of this historic event, and I urge our citizens to give earnest cooperation and support to the endeavors of Citizenship Educational Service in sponsoring the national observance of this One Hundred and Fiftieth Anniversary of the ratification of the Bill of Rights; for, in so doing, we rededicate ourselves, both individually and collectively, to the proposition that "Liberty is not only a heritage, but a fresh conquest for each generation."

Make No Bones

It is said that the expression "make no bones" originated in England with people living on the coast. Eating their fish in haste, they declared that they "made no bones" about it; that is, they disregarded the bones.

The Years Are Rolled

A frost of stars across the night,
And one star glittering with light
Above the rest. A song that yields
Its swelling beauty in the fields
Where shepherds watch their flocks, and see
The wonder of a mystery.

Within a stable's rock-hewn walls
The flickering lamplight softly falls
Upon a mother, young and fair,
Upon a Babe with shining hair.

And still the star points out the way
That leads into the Christmas Day.
Above the hideous shriek of bombs
The song the Angels sang still comes,
Rising in soaring beauty far
Beyond the evil sounds of war.

The years are rolled up, one by one,
And Mary holds her little Son
Against her heart. Each new-born cry
Lifts like a prayer towards the sky,
While countless Marys smile through tears,
Forgetting for a time, their fears
In joy that a child is born
Upon another Christmas Morn.

MINNESOTA HISTORICAL SOCIETY

PENNINGTON CO. TO SHARE IN PAGEANT AT WINTER SHOWS

Mrs. E. F. Wright Is Named Chairman for This County

Pennington county will be represented in the Pan-American pageant to be presented by Red River Valley counties at the Red River Valley Winter Shows, at Crookston on February 3, according to County Agent Ernest Palmer.

Mr. Palmer, accompanied by Mrs. E. F. Wright, pageant chairman from Pennington County, met with representatives from other valley counties at a planning meeting at Crookston on Monday evening of this week to make plans for this event. Each county was assigned a definite part of the pageant and the selection given Pennington County was a Mexican folk dance. This pageant of Pan American countries will include five episodes giving the story of the history and development of the various natures and cultural program, agriculture, religion and home.

Plans for the completion of the participation by Pennington County in the pageant will be made within the next two weeks.

"The control of tuberculosis is an important part of national defense," says Dr. Bruce H. Douglas, Detroit, Mich., president of the National Tuberculosis Association.

46 OF PENNINGTON SCHOOLS JOIN IN LUNCH PROGRAM

Approximately 1,500 Children Now Sharing in Project

School lunch programs, carried on by community sponsoring groups with the aid of foods furnished by the Surplus Marketing Administration, will be operated in approximately 4,100 schools in Minnesota this year, according to a prediction by Walter W. Finke, state director of the division of social welfare.

Mr. Finke said that approximately 175,000 children would be served in these schools. He based his estimates on the number of schools already participating, and on reports received from sponsoring groups which expect to start programs in the near future.

In Pennington County approximately 46 schools serving 1500 children are now participating in the school lunch programs, according to an estimate furnished by Alfred Bredeson, chairman of the Pennington county welfare board.

During the peak month of the 1940-41 school year, the program was operating in 3,127 schools, serving 131,105 children in the state.

The large variety of foods available for school lunches this year has been a big factor in the expansion, in the opinion of Mr. Finke. The list includes many foods which can be served easily and still make an important contribution to the diet of the children. Commodities on the school lunch list for the first time this year include concentrated soup, peanut butter, pork and beans, grapefruit segments and honey.

Job Insurance Payments 40 Pct. Under Last Year

Despite layoffs resulting from material shortages, November job insurance payments in Minnesota were 40 per cent below a year ago, it was reported Friday by Victor Christgau, director of the employment-security division.

The division issued checks totaling $208,678 in unemployment compensation claimants last month compared to $487,201 in November 1940. Payments rose 11 per cent from October to November of this year, however, the October payments being $268,829.

Weekly job insurance checks in November averaged $11.09 each and there were 25,171 checks distributed.

organization. The land, measuring 100 ft. by 150 ft., was purchased by Red Owl Stores from the county last summer. The new, modern building measures 50 ft. by 125 ft. with a partial basement.

The building is constructed of brick and one of the latest style fronts has been installed. This front, installed by the Chicago Vitreous Enamel Company, is of porcelain enamel finish in brilliant colors. The upper part of the building is done in light green cut by a decorative red band. The lower portion of the front is finished in a darker shade of green.

All of the latest style equipment and construction have been incorporated in the new building. The floor is finished in 12 inch blocks of linoleum tile of light green. The walls are plastered and painted light green and the ceiling is in sound-proof celotex, painted a light yellow. Red decorations have been carried out giving the interior of the room a warm, bright appearance.

The building is heated with modern overhead blowing type heat units. This forced air system changes the air in the store building every five minutes and not only spreads the heat evenly throughout the building, but is also effective for cooling in the summer months. The latest style fluorescent light fixtures have been installed, which gives the store a bright, day-light appearance at night.

In addition to the new building the property includes a large parking lot of approximately 10,000 square feet. This lot is 50 ft by 150 ft. and has been completely curbed and surfaced with gravel. The parking lot will be lit with flood lights from the side of the building.

The J. W. Crawford company of Minneapolis, which held the general contract, has been represented here by Ray Mers, superintendent. Subcontracts were carried out locally by Peck Plumbing and Heating company, plumbing and heating installation; George Paulson, wiring; Harry Roberts, painting; Gunvald Storhaug, plastering; Northern Woodwork company, millwork; and A. V. Brodin, sheet metal work.

All of the fixtures and equipment of the store were built here on the job. F. C. Hathaway, construction supt. of Minneapolis, has been here the last three weeks supervising a crew of local carpenters and painters on the store fixtures.

Here supervising the installation of the store and merchandise is General Superintendent P. S. Nickel of Fargo, assistant Sale Promotion Mgr. E. E. Rice of Minneapolis, and District Supervisor B. M. Hornbacker of Grand Forks. Manager Sam Farlow and his staff of clerks are busy stocking the shelves of the large store with merchandise.

One of the outstanding features of the new Red Owl store is the meat and fish department. Approximately 40 feet of cases will be used for display. In Thief River Falls installing the meat department are W. E. Erickson of Minneapolis and Frank Walker of Jamestown, North Dakota. Clarence Simonson of this city will manage the meat and fish department.

The new Red Owl Market is operated on the self-service principle, rubbered tired go-carts carrying two light weight steel baskets are provided for the customers, thus eliminating the burden of carrying merchandise in their arms. The "shopping on wheels" method has proved to be a big hit in the large food markets throughout the nation, according to the management.

A feature of the meat department will be the fish and seafood setup. The Red Owl management state that they plan to carry the year around, a complete assortment of ocean and lake fish of many varieties.

Another feature the store possesses is the large fruit and vegetable department. Over 70 running feet of floor display has been installed to display the complete arrangement of fruit and vegetable products to be carried in the store. A battery of vapor sprays keeps the produce garden fresh.

One of the most unusual conveniences of the new Red Owl Super Market is the coffee and refreshment bar. Here coffee, beverages, sandwiches, and ice cream varieties will be served at all times. The Coffee Bar is attractively designed along modernistic lines and includes all the latest type of equipment. The Red Owl Super Market is one of the few food stores in the Northwest including a coffee bar.

Sam Farlow will continue as manager of the new store, having been advanced to the managership last summer. He has been in the Red Owl organization since 1933, and previously managed the Red Owl Stores in Bottineau, North Dakota. Mr. Farlow is married and has two children.

Clarence Simonson will manage the meat department of the new Red Owl Super Market. Mr. Simonson is a local man and is well known here as a meat operator. He has been in training in various Red Owl markets in this vicinity during the last several weeks.

All of the previous personnel are continuing in the new Super Market and in addition, a number of other local people have been employed.

Former Rockwell Aide Found Guilty by Jury in Minneapolis Trial

Eighteen persons who have been on trail in federal court in Minneapolis in recent weeks were convicted this past week on the charge of advocating the overthrow of the United States government by force and violence, and now await sentence.

All were members of the Socialist Workers' Party and as such reputed to be affiliated with the Trotskyite Communist party. They were indicted along with eleven others July 15 following an extensive investigation by government agents; and their trial, unique in the annals of the courts, has held the spotlight for many weeks.

Prominent among those convicted was Grace Holmes Carlson, who was formerly employed in the state department of education by John G. Rockwell, former commissioner of education, and was one of the causes for the disagreement between Rockwell and the present board of education, resulting in his removal from office.

SPENDS 2 YEARS CLEARING UP BIRTH RECORDS

Coleraine—In January 1940 the office of John McMahon, Itasca county clerk of court, began clearing up birth records, realizing that the demand for complete and accurate birth record of employees, in certain lines of employment, is becoming continually more necessary and obdurate. Then the public became birth-record conscious and the result is that in nearly two years since January 1940 McMahon's office has corrected more than 3,000 birth records.

Local Girls Assist with Speech Day at St. Cloud

The Speech Day recently sponsored by the St. Cloud state teachers college was a success, according to members of the college department of speech. Some 600 or more pupils from 40 high-schools participated. The activities centered around extemporaneous speaking, original oratory, interpretive reading, manuscript reading and discussion. Members of the St. Cloud Teachers College faculty together with students who are minoring in speech or majoring in English at the College were responsible for the arrangements. Mildred Brieland and Ardith Burtell of Thief River Falls were among those who assisted.

HOBO PICKS UP FARMER'S PURSE BUT DROPS IT AGAIN

Farmington. — Alertness of a Farmington business man saved a farmer of the community the tidy sum of $150. A merchant happened to be looking out of his store window when he noticed a hobo stoop and pick up something from the sidewalk and start to walk away hurriedly. Sensing that it was something of real value the merchant stepped out on the sidewalk and accosted the hobo and as he did so the man dropped the parcel on the walk again. It proved to be the pocketbook of Martin Mohn, a nearby farmer, who had cashed a cream check for $150 just a short time before and had just realized that he had dropped the purse somewhere nearby.

HAS COPY OF HORACE GREELY NEWSPAPER

Wheaton.—Laurel Olson has a collection of old newspapers which includes a copy of "The Log Cabin" published by Horace Greely & Co., simultaneously in New York and Albany, N. Y., dated August 23, 1840. Mr. Olson also has a copy of a newspaper printed in Dansville, N. Y., in August 1870, a copy of The Wheaton Gazette printed July 19, 1889, and a copy of the Anoka (Minn.) Union, printed May 11, 1859. Horace Greeley, the best known editor of his day, devoted the whole first page of his four-page national newspaper to two articles, one giving the history of Maj. Gen. William Henry Harrison, a hero of the war of 1812, who was elected president in 1840, and died in his first year in office. The other front page article was an attack on Martin Van Buren, who was then president.

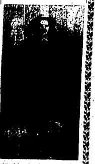
Wins in Chicago Show



Word has just been received by the county agent's office that the clothing exhibit entered by Marilyn Noper of the Nunien 4-H Club at the National 4-H Club Congress at Chicago in connection with the National Livestock Show was adjudged a blue ribbon exhibit.

Miss Noper's exhibit at the national show had previously been judged the champion clothing exhibit of the Minnesota State Fair. Placing in the blue ribbon group at the National 4-H Club Congress is considered an outstanding achievement and brings distinct honor to this community.

Miss Noper's exhibit consisted of a brown wool tweed suit with full length coat and brown accessories. She is a daughter of Mr. and Mrs. V. C. Noper.

Italian Woman's Dolls Famous Around World

TURIN, ITALY. — A lonely war mother has created one of the world's foremost doll factories here, managed by Madame Lenci in a fashion that would gladden Santa Claus' heart. Madame Lenci's real name is Signora Elena Konig di Scavini. Born an artist, and developing a passion for dolls as a child, she started making them when her husband was killed in the World war. Now her Lenci dolls are made by 300 workers and she maintains a sales exposition in the heart of Turin. Madame Lenci's ideas come from a big collection of historical and geographic costume designs. Her most famous order for dolls was from Premier Mussolini for four figures to be presented to Japan as gifts. They cost him more than $100 each.

St. Francis Started Use of Yule Crib

It was St. Francis of Assisi who gave the Crib the tangible form in which we know it today. In 1223 he visited Rome and told Pope Honorius III his plans of making a scenic representation of the place of the Nativity. The Pope gave his sanction and on Christmas eve, St. Francis constructed a crib and grouped round it the figures of the blessed Virgin and St. Joseph, the ass and ox, and the shepherds. He used live animals in a real stable.

The custom spread from Italy to Spain, Portugal, France, the Netherlands and Germany, and from these countries it has spread to all corners of the earth.

Museums throughout the world possess very ancient cribs. The Metropolitan Museum of Art, New York, has a group which dates from before 1478.

The custom of placing cribs out of doors as Christmas decorations in the yard has become popular the past few years.

In the Spotlight

The double-barred cross, thrown into relief by the lighthouse beacon on the Christmas seal, is one of the best known humanitarian symbols in this country. It is the insignia of the local tuberculosis association. A glaring spotlight has recently been thrown on the tuberculosis menace in that the disease has always taken grim advantages of periods of stress. We must, and tuberculosis authorities believe we can, keep tuberculosis under control in this country. The associations are making every effort to do their part. The people's part at this time is to buy Christmas Seals as generously as possible.

HAS COPY OF HORACE GREELY NEWSPAPER

Wheaton.—Laurel Olson has a collection of old newspapers which includes a copy of "The Log Cabin" published by Horace Greely & Co., simultaneously in New York and Albany, N. Y., dated August 15, 1840. Mr. Olson also has a copy of a newspaper printed in Danaville, N. Y., in August 1876, a copy of The Wheaton Gazette printed July 19, 1889, and a copy of the Anoka (Minn.) Union, printed May 11, 1889. Horace Greeley, the best known editor of his day, devoted the whole first page of his four-page national newspaper to two articles, one giving the history of Maj. Gen. William Henry Harrison, a hero of the war of 1812, who was elected president in 1840, and died in his first year in office. The other front page article was an attack on Martin Van Buren, who was then president.

Word has just been received by the county agent's office that the clothing exhibit entered by Marilyn Noper of the Norden 4-H Club at the National 4-H Club Congress at Chicago in connection with the National Livestock Show was adjudged a blue ribbon exhibit.

Miss Noper's exhibit consisted of a brown wool tweed suit with full length coat and brown accessories. She is a daughter of Mr. and Mrs. V. C. Noper.

Italian Woman's Dolls Famous-Around World

TURIN, ITALY. — A lonely war mother has created one of the world's foremost doll factories here, managed by Madame Lenci in a fashion that would gladden Santa Claus' heart. Madame Lenci's real name is Signora Elena Konig di Scavini. Born an artist, and developing a passion for dolls as a child, she started making them when her husband was killed in the World war. Now her Lenci dolls are made by 300 workers and she maintains a sales exposition in the heart of Turin. Madame Lenci's ideas come from a big collection of historical and geographic costume designs. Her most famous order for dolls was from Premier Mussolini for four figures to be presented to Japan as gifts. They cost him more than $100 each.

In the Spotlight

The double-barred cross, thrown into relief by the lighthouse beacon on the Christmas Seal, is one of the best known humanitarian symbols in this country. It is the insignia of the local tuberculosis association. A glaring spotlight has recently been thrown on the tuberculosis menace in that the disease has always taken grim advantages of periods of stress. We must, and tuberculosis authorities believe we can, keep tuberculosis under control in this country. The associations are making every effort to do their part. The people's part at this time is to buy Christmas Seals as generously as possible.

St. Francis Started Use of Yule Crib

It was St. Francis of Assisi who gave the Crib the tangible form in which we know it today. In 1223 he visited Rome and told Pope Honorius III his plans of making a scenic representation of the place of the Nativity. The Pope gave his sanction and on Christmas eve, St. Francis constructed a crib and grouped round it the figures of the blessed Virgin and St. Joseph, the ass and ox, and the shepherds. He used live animals in a real stable.

The custom spread from Italy to Spain, Portugal, France, the Netherlands and Germany, and from these countries it has spread to all corners of the earth.

Museums throughout the world possess very ancient cribs. The Metropolitan Museum of Art, New York, has a group which dates from before 1478.

The custom of placing cribs out of doors as Christmas decorations in the yard has become popular the past few years.

OUTPUT OF EGGS, MILK PRODUCTS TO INCREASE IN 1942

State AAA Chief Announces Completion of Survey in Minnesota

All time production records for eggs and milk products were forecast for 1942 by Charles W. Stickney, chairman of the Minnesota A.A.A. and chief of the U.S.D.A. Defense Board. The forecast was based on summaries of the "farm to farm" food for defense survey made during the past six weeks by farmer-elected county and community committeemen.

Although all of the county summaries have not been received in the state A.A.A. office, Mr. Stickney said that returns from 80 counties indicated production of eggs, milk, pork, and vegetables will be the greatest in many years with some products reaching new production peaks.

"The sharp increases in production of foods needed in national defense will mean thousands of dollars in additional income to Minnesota and Northwest farmers," Mr. Stickney said.

Survey summaries indicate a tremendous increase in the production of eggs. Some counties show farmers anticipating increases as high as 41 per cent over 1941. Egg production for the state will probably average around 28 per cent higher. This means a total production of 206,931,000 dozen eggs as compared to 161,667,000 dozens, the estimated production for 1941. Minnesota's 1942 goal is 181,667,000 dozens.

Milk production lagged behind the sharp increase for eggs, but was substantially above the estimated production of 8,451,000,000 pounds for 1941. Summaries indicate an increased production of about 11 per cent over 1941, or 9,397,000,000 pounds. It must be remembered that before this increase was asked, Minnesota milk production was at the highest peak in history.

Pork production will be sharply higher, summaries indicating farmers will market about 25 per cent more hogs in 1942 as compared to 1941. The goal for the state was a 12 per cent increase for 1942.

November Auto Deaths Drop 24 Below 1940

After a disastrous start in October, the second Minnesota Editorial association campaign to "Save 100 Lives" by reducing traffic accidents, staged a comeback during the month of November, according to accident report figures just released by the state highway department. Forty-four persons—men, women and children—met death in 42 fatal traffic accidents during November, as compared with 68 during November of 1940—a saving of 24 lives. More than 50% of the victims were violating, or were in cars of drivers who were violating, the law at the time. Nineteen fatally hurt were pedestrians, of whom 12, or 63% were walking contrary to pedestrian regulations. The number of traffic fatalities for the month was 12 below the "budget of allowable deaths" fixed by the editorial association's traffic safety committee, which had anticipated 56 fatalities.

Kitty's Komments

I was sitting in my favorite easy chair by the radio, content and relaxed listening to the discussion by the University of Chicago Round Table when I was startled by a news bulletin breaking in—"Pearl Harbor was being attacked by Japanese planes."

It came like a bolt out of the blue, and when I told the rest of my family, they openly scoffed at the idea, "Why, even at that time Japanese statesmen were in Washington, negotiating the peace in the Pacific question." It couldn't be possible.

Then it came again, a verification to the first bulletin I'd heard. A tense group we became, feeling rather ill with that sense of impending disaster such a message had brought.

It was no longer a mere supposition, we were at war, and for how long only the future can tell.

This has been the toughest job I've ever done, trying to concentrate and write while I listen to news bulletins coming from the West coast where they tonight are undergoing a black-out.

With relatives and friends out there, it's with a tense and worried feeling you wait and listen for every word concerning the grave situation; and I couldn't write at all when I heard that unidentified aeroplanes had been heard over the San Francisco area. Not until I heard this was a test was I able to think of anything else, but air attacks.
